SUSTAINABILITY

The Oregon Convention Center has taken a big step towards conservation by replacing some 2,000 light bulbs and fixtures with a mixture of induction and LED lighting along with compact fluorescent light bulbs.

Convention Center Reduces Energy

New fixtures,
lights to cut
demand by half
and more

Oregon Department of Energy, the Convention Center expects to pay just \$125,000 for the \$760,000 project.

"By using some of the money that's available for energy conservation projects, we can maximize our investment, conserve resources and provide jobs to the community, Thorpe said." At the same time, OCC is significantly reducing its carbon footprint."

The Convention Center is switching to a mix of induction and LED lighting along with compact fluorescent light bulbs. The new fixtures and lights are expected to decrease energy usage by half and upwards of 90 percent in some areas.

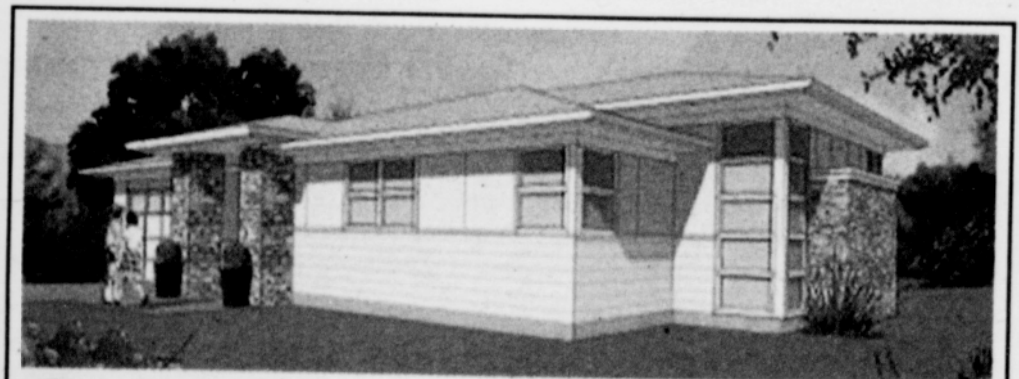

"In some cases, our new lights are ten times more efficient and last seven times as long," Thorpe said. "Plus we get brighter, more natural lighting throughout the building."

The lights' efficiency and longer lifetime will add up to savings and decrease annual energy usage by 2.7 million kilowatt hours.

Workers started changing thousands of lights in the Oregon Convention Center in mid-January and finally finished the big job last weekend.

It gives new meaning to the classic joke, "how many people does it take to screw in a light bulb," when some of the 2,000 bulbs and fixtures are installed up to three stories high. The answer is: it takes a four-person crew about five weeks to do it, and it may save the Convention Center more than \$130,000 a year.

Ryan Thorpe, OCC's director of operations, applied for federal stimulus money for the project in 2009. After additional incentives from the Energy Trust of Oregon and the

Green 'Water House' Tours

The Portland Water House, a sustainable demonstration house in northeast Portland, was viewed by over 750 curious community members at its January opening. The Water House, located at 1616 N.E. 140th, just north of Halsey, will continue to be showcased at specific times for the remainder of the year.

Upcoming open houses are scheduled for Friday, Feb. 11 from 11 a.m. to 2 p.m.; Friday, March 11 from 11 a.m. to 2 p.m.; Sunday, March 27 from 1 p.m. to 4 p.m.; Friday, April 8 from 11 a.m. to 2 p.m.; and Sunday, April 17 from 1 p.m. to 4 p.m. If you have a group who would like a tour, call 503-823-3520.
