old friends/classmates and enjoy good company.

For Event Tickets Call:
Wendy @ 503-422-9207 or Tony @ 503-706-4566

Students Design Pump for Humanity

Students from Oregon Episcopal School have designed a water pump to create a brighter future for people in developing countries. InvenTeam designed the pump to

increase efficiency of raising water from wells where electricity is not available. They used materials commonly available throughout the world, such as a bicycle, so the pump can be constructed and repaired by those using it.

InvenTeams are part of a national initiative to encourage students to rely on inquiry and hands-on problem-solving to find solutions to real problems.

The invention is currently on exhibit through Jan. 5 at the Museum of Contemporary Craft, 724 N.W. Davis St.

Your Care Our First Priority

**Dr. Marcelitte
Failla**
