

Skills for Manufacturing Jobs

Making an impact for underserved women

Oregon Tradeswomen and Bank of America are deepening their partnership to help create a skilled workforce to fill some of Portland's 87,000 advanced manufacturing jobs. It's a sector that is projected to grow 19 percent by 2022 – adding family-wage jobs for women while boosting the local economy.

The BofA Charitable Foundation named Oregon Tradeswomen, Inc. as a 2015 Neighborhood Builder partner, which combines \$200,000 in flexible funding to promote women in the trade industry and launch a pilot program around women in manufacturing.

"Oregon Tradeswomen is making a significant impact for underserved women in Portland. This investment will empower the organization to build leadership capacity and expand to meet evolving needs in our community," said Roger Hin-

Oregon Tradeswomen help fill a critical gap for young women by offering ways to explore the variety of exciting and high-paying careers available in the trades.

WE STAND UP FOR WHAT WE BELIEVE IN!

OUR FUTURE

It is our primary goal as a labor union to better the lives of all people working in the building trades through advocacy, civil demonstration, and the long-held belief that workers deserve a "family wage" – fair pay for an honest day's work.

OUR FAMILIES & OUR COMMUNITIES

A family wage, and the benefits that go with it, not only strengthens families, but also allows our communities to become stronger, more cohesive, and more responsive to their citizens' needs. Our ongoing efforts to establish Area Standard wages and benefits knows no boundaries of race, creed, color, gender, beliefs, or country of origin.
