The Week in Review

Shocking Random Kill

The so-called "Facebook killer" who brazenly gunned down a Cleveland man at random on Easter Sunday, killed himself Tuesday as cops closed in. Authorities said Steve Stephens, 37, (left) shot and killed Robert Godwin seemingly at random, recording the encounter on his phone and uploading the horrific video to Facebook.

Arrests in Park Murder

Two arrests have been made in the shooting death of a Vancouver teenager last week at Holladay Park across from Lloyd Center. The young men arrested are ages 17 and 18 and police said more suspects may be involved.

Police Chief Cleared

An investigation has found that Portland Police Chief Mike Marshman did not violate police bu-

reau rules on truthfulness and he has been returned to duty, Mayor Ted Wheeler announced last week. Witnesses backed up Marshman's statements that he never asked another officer to sign him in for a training session.

Improving Oregon Jobs Report

Oregon's unemployment rate edged down to 3.8 percent in March, from 4.0 percent in February. This was the lowest unemployment rate since comparable records began in 1976.

Blazers Eye Game Two

Golden State won the opening round of the NBA playoffs against the Portland Trail Blazers on Sunday in Oakland and will host game two of the best-of-seven series on Wednesday. Damian Lillard and CJ McCollum put on a dazzling display of shot-making for the Blazers in game one, but the Warriors withstood the challenge with a 121-109 victory.

Dr. Billy R. Flowers

Q: What age groups can a chiropractor help most?
A: This is like asking which age groups benefit most from good health. And yet, each age group has specific problems for which your chiropractor has specific answers.

Infant and Young Children
 Other mothers are often amazed to see a mother carrying her infant out of the adjusting room. And yet,

THE SPINA COLUMN™

An ongoing series of questions and answers about America's natural healing profession.
Part 35. Different Benefits by Age Group

since the delivery process itself causes a high percentage of subluxations, infants to need chiropractic care.

Obviously, children and infants are treated differently than adults. There are new, highly sophisticated methods of adjusting children and infants to insure the best possible results with the least possible discomfort. Though young children can't tell you they're in pain, their irritability is often a sign of the need to be checked.

Young Adults and Teenagers
 More and more young adults and teenagers are getting involved in active sports. As a result, more and more of them are getting injured, requiring prompt chiropractic care.

Obviously half of the girls in our society develop scoliosis (curva-

ture of the spine) during puberty. Left untreated, scoliosis keeps getting worse over time. However, it can almost always be corrected when chiropractic care is initiated in time.

Needless to say, every teenage girl should be checked regularly for scoliosis and all teenagers and young adults should see their chiropractor regularly to make sure their newly active sports lives aren't creating spinal problems they'll have to live with the rest of their lives.

Adults
 The world today is experiencing a terrible level of stress. Long work weeks, seemingly impossible deadlines and economic woes create incredible pressures. In addition, most adults breathe in polluted air,

drink chemically treated water and consume an average of nine pounds of food additives and chemical preservatives in a year, putting even more stress on their bodies. One sure way to keep the stress level from causing potentially dangerous subluxations is with regular chiropractic checkups.

Senior Citizens
 Retirement age for many people has become just plain tiresome. Aches and pins, often the result of untreated subluxations, abound. Yet it hardly seems fair that having to suffer with pain or being drugged into numbness are fair rewards for all the years of hard work.

Depending on the degree of subluxations degeneration, your chiropractor can often provide help.

For senior citizens who've been fortunate enough to suffered minimal trauma in their lives, virtually complete spinal recovery should be almost as easy as it would be for younger people.

For those who have suffered needlessly for years, your chiropractor can often slow or stop the degeneration, making life more comfortable. It is certainly worth the effort so that our senior citizens get the dignity of health care they deserve.

Something for Everyone
 As you can see, there are practically as many reasons to have regular chiropractic checkups as there are people. Make an appointment for yourself and your loved ones soon.
