Dr. Billy R. Flowers

THE SPINA COLUMN™

An ongoing series of questions and answers about America's natural healing profession.

Part 26 KIDS AND CHIROPRACTIC As the twig is bent so grows the tree

Q: I have recently noticed my son has one shoulder higher than the other. Could this be a sign of a problem in his spine?

A: Good thinking, mom! It surely could. In fact having one shoulder higher than the other is a cardinal sign of curvature of the spine. According to Chiropractic research, the earlier a curvature is caught, the higher the potential for success. To be certain about health of your child, call our office today for a professional spinal evaluation. Spines (big or small)

are our specialty.

Q: I have been told that my child needs an operation for a curvature in her spine. Is there an alternative?

A: You most definitely should have a thorough Chiropractic checkup on your child immediately. Spinal surgery gets. All conservative efforts at handling your child's problem should be considered before consent-

ing to surgery. Our office is highly trained and skilled at handling problems like that of your child's. Don't be fooled by the thought of "watching the condition" either. Without proper assistance it won't go away. Offer your children the best in health care. Give them regular Chiropractic checkups. As the twig is bent so grows the tree!
