

PORTLAND OBSERVER
AutoReview

The Chevy Bolt EV is a pure electric car with lots of standard and package features. If you've never driven an electric car, you're in for a surprise. Fuel economy is measured in miles per charge, not per gallon of gasoline. The Bolt is powered by an elec-

Bolt EV

tric motor producing the equivalent of 200 horsepower and 266 lb-ft of torque. Electricity is stored in a 60 kilowatt lithium-ion battery pack.

The Bolt can travel up to 238 miles on a single charge, according to its maker Chevrolet and that's a believable figure given the fact that there are two regenerative on-board charging devices.

The Bolt Premier with a retail price of \$41,780 adds all the LT standard and package features plus leather seating, upgraded 17-inch wheels, roof rails, heated outboard rear seats, a Surround Vision 360-degree camera, ambient lighting and a rear seat armrest.

The best compliment we can pay to the Bolt is to say driving it is pretty unremarkable. The big difference you'll notice is that there's no engine noise since there's no engine, so you notice road and wind noise a lot more than in a gasoline-engine car. But mostly you just get in the Bolt and drive.
