ore was found, the latter reporting one exceptionally high assay, and an average of more than 55 from numerous tests across the face of the ledge. The Big Buffalo is proving fully as good as reported, both in value and extent

MANY MINING CLAIMS FILED.

Your correspondent has linked the re-publican party with a shear at the prist-bood of a certain religion. The principles of the republican party are incorporated into its platforms, and it is not respon-sible for the actions or utterances of the individual of high or low degree. When a man starts out to trace fundamentals, and by a natural gravitation wallows in the stink of earth, alternating between stale burg, rothen cheese, butcher shoas and beer, rotten cheese, butcher shops and dark-cellar spleen, he is not one jot more disgusted with the community in which he lives than that community is with him, and there is but one place that I know of where he will not find the abusive Dutch and quarrelsome Irish, and that place is what cultured folk call hades, and plain people call hell. The Irishmen that he lauds are quite welcome to the quality of admiration that they have attracted. The Germans that he vilifie have no apologies for such as he. They have been among the foreleaders of Amre-lean civilization; it was their Frederick who did not conceal his contempt for George's treatment of the American colo-nists; it was their Frederick who refused to allow the mercenary Hessians to cross his torritory and come to America to nillage the country, ravish women and carry off young girls; Steuben, De Kalb and Sigel gave us German honor and German fory, and the impress that Germans have eft upon American civilization and Amer-ican patriotism is not to be approached with an Inexpecienced pen. The bugaboo of Manila bay has been overlooked. Dewey was there to smash the Spaniard. The civilized world knew of the American antipathy to foreign en-tanglements: the policy of these states was shaped by extraneous events; the hindsight of the White House was clearer than its foresight; but when a policy was defined or partly defined, the German em-peror, in the person of his ambassador at Washington, assured the nation of Ger-many's friendship and Germany's neutral-ity. The German admiral was in Manils ay, primarily for the same reason that the English admiral was there, as other admirals whose country had sub-ects cooped up in the Philippines, and if ects cooped up in the range in sight to here was any landgrabbing in sight to pass the time away, all of them would have been at it. The conduct of the Ger-mans, to say the least, was open and above board, while the conduct of the English was and is today Falstaffian. The exigencies of diplomacy will explain a good many things that are now obscure. The and, it is devoutly to be wished, will also explain away the carmarks of union-jack-assery now discernible in Washington. That an Irishman feeds fat on the ancient grudge he bears England is a favor-ite subject for the small-beer essayist. It never occurs to the surface philosopher that England's difficulty was at one time America's opportunity, or that that word opportunity is big with history. In the premises, the Irishman hates the devil's premises, the ariseman match Miner and trinity to-wit, Chamberlain, Miner and Rhodes, their privies and their red-handed machinations, and his hate includes their predecessors in past generations. That predecessors in past generations. That the Irishman hates the Englishman is not

the him, to set up a bastard empire and to call themselves the nobility. He can read his title clear, and he is not of the sluff that can be appeared by an orcastuff that can be appeared by an occa-sional sop. He is preserving a patiotism "bequeathed by bleeding sire to son," and he cannot help it if cheap men will grow! and bark, for God has made them so. J. H. MURPHY.

BRET HARTE'S ARRIVAL.

A Pistol Ball Nearly Spolled His First Drink in Gold Diggings.

Youth's Companion.

"I entered the barroom. It was crowded I entered the barroom. It was crowded with miners and traders, and a few smart-ly dressed professional-looking men. Here again my vanity led me into extrava-gance. I could not bear to address the important.

EAST SIDE AFFAIRS.

Preliminary Work on New Cannery -Repairing a Bridge.

preliminary work was done yesterday toward the creation of a large can-nery building for the Oregon Packing nerry building for the orregton of a large can-nerry building for the Orregton Packing Company on the bail theek on East Yam-hill street between East Eighth and East Ninth streets. Furthase of this half block was made over a year ago, but until block was made over a year ago, but unit the present no definite movement toward construction was made. The work yea-terday was in getting the levels and set-ting the grade stakes for the basement foundation. Through the front of the ground there is quite a deep ravine, while the rear is high ground. The connery will front both on East Righth and East will front both on East Righth and East Tamhill streets, and there may be an entrance from East Ninih, giving the Two knds of brick have been delivered Man

The last Eighth street, and the intention is to excavate for a full basement. The cannery building will cover the entire stories. At present and for a number of years the Oregon Packing Company has occupied the three-story structure on the corner of East Seventh and Bel-mont streets. It has stood there for about 20 years and has been operated with more or less aucoass until the pre-and management came into possession. The main building is 6x100 feet, and some additions have been made to it, bat for geveral years it has been found too small for its purposes. Every year the output for its purposes. Every year the output for its purposes. Every year the output, has increased and the storing enpacity has been taxed. The present building will be moved to the pror of the ground on. East Tambili street and it will be a part of the plant, leaving the part to be built. 150x100 freet.

1902100 feet. A member of the firm stated yesterday that the plans for the cantery have not been fully completed and will not be for about 10 days. However, the intention is to put up a building that will be modern in all respects, and whose capacity will be several times more than the present plant. The cost of the building and plant at present caunot be known, but will probably be above 10,000. The company was fortunate to secure the half block probably he above \$50,000. The company was fortunate to secure the half block where the building will be crected at a low price over a year ago.

Merry Skaters.

Herry Skaters. The merry skaters were out in force predetage foremoon on the ice on the low ground between Union avenue and East Second street and between East Morri-rom and Hawthorne avenue. There was guite a wide expanse of ice, and it was covered with boys and men, who had a good time. In the alternoon the ice was not as good for skating. A considerable portion of Columbia sloogh is also frozen, and has afforded excellent skating.

Minerals in Morrow County.

HEPPNER, Feb. 17 .- Beginning 15 miles uth from Heppner, this county has 10 wnships of well-timbered mountain ownships of well-timbered mountain ands, which invite prospectors. Coal has been found, but never systematically searched for. Gold and sliver have been found in streaks, but generally pinched out before any considerable bodies were reached. D. B. Statter has just returned to Heppner after working for sev-eral months on prospects sliuated 30 miles south of here. He found considerable float and seams of low-grade ore, carry-ing gold and silver, but they pinched out before leading to permanent veins. The southern part of Morrow county borders the parts of Grant and Baker where such mining developments are being carried out.

STUBBORN MIDNIGHT FIRE.

Blaze in Union Block Was Difficult to Extinguish.

A stubborn fire raged for one hour at midnight last night in the second and third stories of the Union block, at the corner of First and Stark streets. The biase originated in the room of some young men who lodge on the third floor, during their absence, it is said, and had gained considerable headway before it was discov-ered. The alarm was turned in at 11:25,

the Frishman hates the Englishman is not true. If that were the case, he would often be haiting his associate and friend, one whose sympathles is shaped by the congenital hand, and one who does not inject polities into opinions nor call vile names. That kind of dirty work is the business of the anonymous ass. 12

of Siachtersnek the same rod hand that hung his compatitots for the same cause; he sees in the sufferings and death of Pieter Maurits Retief and his comrades a

Pieter Maurits Retief and his comrades a reflection of his own history and his own travails, he sees in the sickness, poverly and distress of the South African Dutch in 1888 his own Skibbereen; he sees in the arrogance and treachery of Frere. Loch and Miner what has marked his history down the centuries; he sees in the plead-ings of Oom Paul with Chamberlain the mome entreaty of the Dutch embassies to Cromwell, "All, all, all, except the free-dom of my country"; he sees on the Tu-gela the spirit and the glory of Taxel; and he hears in the hymn of the Boer but by that time the fames had extended through three rooms on that floor and had burned through into two apartments on the second floor. It was a difficult fire to fight, swing to the manner the

nportant, white shirt sleeved and dis-ond-planed barkceper as a mere boylsh upplant for information. I was slily nough to demand a drink, and laid down, uppli

alas! another quarter. "I had asked my question, the bar-keeper had handed me the decanter, and had poured out the stuff with as much ease and grown-up confidence as I could assume, when a singular incident oc-curred. As it had some bearing upon my fortune, I may relate it here.

The celling of the saloon was supported by a half-dozen wooden columns about 18 inches square, standing in a line paral-iel with the counter of the bar, and about two feet from R. The front of the bar was crowded with customers, when sud-denly, to my astonishment, they one and all put down their glasses and hurziedly backed into the spaces between the col-umns. At the same moment a shot was fired from the street through the large open doors that stood at right angles with the front of the counter and the column

"The bullet raked and spintered the moldings of the counter rand the columns. "The bullet raked and spintered the moldings of the counter front, but with no other diamage. The shot was returned from the upper end of the bur, and then, for the first time, I became aware that two men with leveled revolvers were shooting at each other through the saloon. "The bystanders in range were fully protected by the wooden columns: the harkeeper had ducked bolow the countar at the first shot. Six shots were ex-changed by the duclists, but us far as I could see nobody was hurt. A mirror was smisshed, and my glass had part of its rim corried cleanly away by the third shot and its contents spilled. "T had remained standing near the coun-ter, and I presume I may have been pro-tected by the columns: but the whole

tected by the columns: but the whole thing passed so quickly and I was so ut-terly absorbed in its dramatic novelty that I cannot recall having the slightest ensation of physical fear. Indeed, I had own much more frightened in positions of cas perit.

"My only concern, and this was para-mount, was that I might beiray by any mount, was that I might berray by any word or movement my youthfulnes, ha-conshment or unfamiliarity with such an experience. I think that my shy, vain schoolboy will understand this, and would probably feel as I fild. Be strong was this feeling that while the sting of gun-powder was still in my nestrils, I moved
