Association met here today, and was in
sension from 18:30 A. M. until 5 P. M.
Much business of a routine nature was
transacted. James Winstanley was appointed a member of the sales committee. The affects of the association were
repurised in good shape. Recently several
sales at fair figures were mide, and more sales at fair figures were made, and more are under consideration. The secretary was instructed to open an office here, and will begin at once the pooling of the 1000 crop, on the same general plan and on substantially the same contract with the growers as the Fruitgrowers' Association of California has with its producers

The hop statistics, as gathered by the osciclation, show by 15,000 or 20,000 fewer balos at present in the state than is chimed by some dealers. The board fund-by constanded that there were now on hand not to exceed 32000 bales in the state, and that future developments would show that even these figures are too high. The

No Delay at Tillamook.

Captain Harts, United States engineers, returned on the steamer Harrison this afternoon from Tillamoon, where he went to make an examination of the harbor and entrance to it. It had been reported that the government work there was not progressing as rapidly as it should; but he found that these reports had been very much exaggerated, as upon personal examination he found that everything was being forwarded satisfactorily. The combination freder and snapships was near. ination dredge and snagpuller was nearing completion, and would be at work in a short time, carrying out the proposed improvement of the inner harbor. As to the channel over the bar to the ocean, he believes that it shows more water than it has for some years, although it has shifted somewhat to the north; but when the winter winds change to those of sum-mer, the channel is apt to shift back again, as all the bar channels on the Paeific coast do. As the Harrison came out from Tillamook he paid special attention to the soundings, and at the time there was about a three-foot tide, but no bottom was found at any place less than II feet. He says that at mean low tide there is at least I4 feet at the shallowest
