"In 1899 the net proceeds of the sales of

the public lands, after deducting all ex-penses incident to the disposal of them, 658 students, with professors and instruc-tors aggregating 2611, and with a total inwas \$1.933,258 22. Of this amount the sum of \$1,108,610 28 was appropriated in accord-ance with the provisions of the act approved August 50, 1890, to the maintenance and support of the colleges for the benefit of agriculture and the mechanic arts, esamount \$545,546 28 was received as interes on the land grant of 1962, and \$1,106,610 3 ablished under the provisions of the landwas United States appropriation under the grant act approved July 2, 1862. Of the act of 1890, thus leaving to them an emaining sum arising from the sales of come of \$4,254,221 54 from other sources the public lands the present bill proposes to appropriate \$450,000 the first year, with than grants of the United States. an increase of \$48,000 per annum for a period of 10 years, after which time the fixed annual appropriation will amount to

"This proposed action is in fact merely supplementary to the line of Congression-al legislation respecting the use of the public lands for educational purposes for the last 60 years. It is in no sense legisla-tion for a particular class. It looks toward the development of resources which affect

ur National well-being and the betternent of the entire population.

"By an act approved July 2, 1862, Con-gress offered to donate to each state 30,000 acres of the public lands for each Senasrese o tor and Representative in Congress to which it was then entitled. The principal conditions of the act were (1) that the States accepting the same should agree to invest the proceeds of the sale of the ands in such a manner as to produce an income of not less than 5 per cent per annum; (2) that no portion of the principal sum derived from the sale of lands or of the income therefrom should be applied

directly or indirectly, under any pretense whatever, to the pure chase, erection, preservation, or repair of any building or buildings; (3) that any state which should take and claim the benefits of that act modern research and activity have b

> tary Science Club became the first distinctively collegiate organization for the study of household economics. The New England kitchen, organized by college women, with the view of accuracy in food preparation, sells nutritious lunches daily to several thousand people, and its work has been taken up by Baltimore, Chi-cago and New York.

"Out of the 50 agricultural colleges in the United States, those of Kansas, Iowa, North and South Dakota, Colorado, Connecticut, Michigan, California and Ore-gon teach household economics.

"The world's auxillary to the World's Fair in 1893 organized the National House-hold Economic Association, which has now vice-presidents and members in nearly every state in the Union, "The subject of preservation of food

was brought to our attention by the lengthy investigation given the canned meats used in Cuba during the war with Spain, which was only one of the oc-casions where preserved goods must be used. Such preservation demands and is given the best labor of scientific men. To read Dr. Lethby's lecture on preservation of food is enough to make a wom-

an turn green with envy of the men, whose study of food problems has been such a widespread philanthropy. Men realize that locating the north pole, and the added knowledge it would bring to

us, depends largely on food preparation and preservation, Women do not. And that is the difference. Women are always behind, and men cannot wait; so men do the work that women should do, and then women must needs do the work that men should do." The rich, full tones of Mrs. W. T. Bush-

ong's well-modulated contralto in "Sep-

tember," by Charlton, was a delightful contrast to the artistic ripple of Wien-

plano by Miss Mary Sinclair, Mrs. W.
