

WON BY HIGH SCHOOLS.

Defeated Portland University in a Debate.

The debate last evening between the Columbian Society of the Portland University and the To-Logoson Society of the Portland High School was won easily by the latter. The question was: "Resolved, That the United States and the several states should establish courts of compulsory adjustment of disputes between public and private corporations which possess franchises of a public nature." The winning team took the affirmative. The judges were: Messrs. J. F. Ewing, R. W. Montague and Dell Stuart, whose finding was 24 points for the university and 33 for the high school. Arthur E. Breese acted as chairman.

Frank Hayek, of the To-Logoson Society, opened the debate. He gave a résumé of the question, the present relief, a commission of three men under the Court of Equity, one to be appointed by the corporation, another by the employees, and the third to be agreed upon by the employers and the employees. Mr. Hayek explained the position of his team well, and became very enthusiastic in his discourse.

The opening for the negative was made by E. A. Dunsmuir, whose principal argument was that the proposed scheme was contrary to the law of liberty. He said that no commission should be given the authority to say what a man should work for.

"It is an acknowledged right," said he, "for a man to say, 'I will work for you for a certain sum,' and it is also a right for every employer to refuse to pay that amount and offer a lower one." He added that it would also kill the competition between corporations, and showed the disastrous effect of this.

The next speaker was H. W. Bailey, for the high school. He asserted that the present system of the injunction was not what was best. His four reasons for the same were that it is an ex parte measure; denies the right of trial by jury; denies all results, not casually that it is issued only after the strike has been precipitated. To show that the proposed plan was practical he pointed to New Zealand, France and Massachusetts, where, he said, it is working to perfection. He concluded with reasons why compulsory arbitration should take the place of bloody strikes.

G. Wakefield was the next man to come forth for the Columbian Society. He thought that unions in general were encouraged, in the hands of which there is already too much power. He declared that labor should be able to accept or reject, but should not be able to make the proposition. "It is inconsistent," said he, "to economize laws. And then government has no more right to meddle with corporations than it has with unions, and that has to take a hand in the affairs of private corporations. The laboring class antagonize the rich simply for jealousy."

Raymond W. Steel, the next speaker, probably won the most points for the To-Logoson. His delivery was excellent, and he tore down his opponents' arguments with seeming ease. He showed that the negative was based on a false premise, and then proceeded to quote from various prominent people to show his authorities. He told how easily it will be for the proposed law being enforced and the lack of additional cost to the corporation. He also told a decided stand against the present interstate commerce act, which he thought was unjust.

H. Snively closed for the university. His delivery was especially good. In conclusion, he said, his argument was of the line of impracticability of the proposed law, going on to show that outside people could not do the work, and that the negative was based on a false premise.

Steel closed the debate with rebuttal for the high school. He brought up every one of the arguments of both sides, and his treatment of them brought forth great applause.

At the announcement of the decision the Columbian debaters gracefully shook hands with their opponents, and were in turn greatly cheered by the audience.

EAST SIDE AFFAIRS.

Severe Bicycle Accident—Other Matters.

Alex Strong, who lives on East Burnside street, sustained a fracture of his left shoulder yesterday afternoon in a bicycle collision on Grand avenue. He was riding northward on the west side of Grand avenue—the wrong side of the street—when he was overtaken and run down by a car. Mr. Griffith, of course, had the right of way, but it seems that Strong did not see him coming. Griffith expected that Strong would turn to the right and thus get out of the way, but he did not do so. They were then within 10 feet of each other, and it was impossible to avoid a collision. The car, which was driven by Griffith, struck Strong on the left shoulder, and he was thrown from his bicycle. Griffith, in order to save Strong from being hurled headlong on to the plank, seized him by the arm and held him up, but could not prevent his being struck by the car. Strong was badly wrecked. Griffith, who escaped with only a severe shaking up, took Strong into the near drug store, where it was found that the latter's shoulder had been fractured. He was sent home and his injury was attended to. The accident seems to have been the result of no fault of Griffith. He was on the right side of the street, and he had all his lights on, and he was proceeding with the greatest care. He was holding Strong from going down on the street doubtless prevented more serious injury. Griffith remained until Strong was properly cared for.

Preliminary Surveys Made.
The operating committee of the City Water Committee has caused surveys to be made for the proposed water main in the vicinity of the Deerebaker factory, the object being to obtain an estimate of the probable cost of the main. The surveys extend out the Sandy road, and also along East Twenty-eighth street south to the connection with a 4-inch water line. At the meeting of the Water Committee recently held the petition for a 6-inch main was referred to the operating committee. On completion of the factory plant, water will be needed for the boilers and for the large number of men employed there. Mrs. Hawthorne proposes to erect 10 cottages north and 10 south of the school. There will, no doubt, be other buildings going up when the factory is in operation, and the main will likely pay interest on the money it will cost. The committee will not lay a main on an unimproved street, however, and can only extend one out the Sandy road. The intention is to improve East Twenty-eighth street from Burnside to the Sandy road, and extend a spur from the City & Suburban Railway to a 4-inch water line, and to make a circuit. A 6-inch main will be laid out the Sandy road to East Twenty-eighth street, then extend south along East Twenty-eighth to a 4-inch water line, with the main that supplies Mayor Gates' addition, and also northward through the Deerebaker factory ground, across Sullivan's Gulch, to a connection with the main on East Broadway, thus making a complete circuit. Of course, it is by no means settled what will be finally done, but there is hardly any doubt but the main will be laid at the proper time, as the interests involved are large.

Honored by President McKinley.
J. L. Ferguson has just received the news of the death and account of the funeral of his sister, Susan Lenox Watson, widow of Pay Director Watson, United States Navy. She died at Washington, Monday, of pneumonia, aged 79 years. Mrs. Watson's father was James Ferguson, father of J. L. Ferguson, of the East Side, who served on board Lord Nelson's flagship at the battle of Trafalgar, became a master in the United States Navy and served through the war of 1812. John Ferguson, who was Mayor of New York during the war of 1812, was Mrs. Watson's uncle. She is survived by

three daughters, a stepson—Captain E. W. Watson, United States Navy—and J. L. Ferguson, a brother, of Portland. The latter has received an extended letter from John Ferguson, of Charleston, S. C., giving an account of the funeral. At the funeral Mrs. McKinley, wife of the President, sent a magnificent wreath for the casket. The burial was at Arlington cemetery, and, as it was raining at the time, President McKinley gave the order for the erection of a canopy over the grave where the interment took place. The Portland relatives of the distinguished woman are pleased over the honors bestowed on her by President McKinley and wife.

St. Johns Cycle Path.
The St. Johns cycle path has been completed, and those contemplating a wheeling trip today cannot choose a more inviting route. It follows the Willamette boulevard through University Park to St. Johns. The path is a wide one, and two wheelmen can pass each other without danger of collision. A good route is to follow the Piedmont path to the Vancouver road and then go west on the Portland boulevard to a connection with the Willamette boulevard.

Horse Had to Be Shot.
A horse belonging to William Hunter, who was visiting at the home of his father, in the northeastern portion of the city, was so badly injured yesterday that the animal had to be shot. The former drove from Carlton, Yamhill County, and put his horse in his father's stable, when the horse was kicked on the foreleg, fracturing it. It is a severe loss.

An Old Soldier's Funeral.
The funeral ceremony of Chauncey E. Barton, an old soldier who served under Grant in the Vicksburg campaign, the great battle of Fort Donelson and at the battle of Shiloh, will take place this forenoon from Dunsmuir's undertaking parlor, East Sixth street, at 10:30. Services will be under the auspices of the Post No. 4, A. R., of which he was a past commander.

East Side Notes.
Samuel Webster, of Sunnyside, returned a few days ago from Honolulu, where he spent some time. He was there during the prevalence of the plague and the burning of many buildings to stamp it out. He got away on a salubrious note.

The funeral of Mrs. Mary Long Oliver, who died Friday morning, took place yesterday morning at Dunsmuir's undertaking chapel, and was well attended. At the close of the services the remains were taken to Lane Field cemetery.

Mrs. Gillespie's pupils in the school of expression will give their April public rehearsal at University Chapel, East Thirtieth and Stark streets, next Monday evening. Exercises begin at 8 o'clock. All are cordially welcome.

A pleasing program was rendered at the Burkhead hall, evening by the Epworth League of Centenary Church. It was made up of fine music. The Centenary orchestra discoursed selections. These were: "The Song of the Lark," by Mrs. Joseph Taylor, Miss Emma Allen, Herr Anton Zilm and Jesse Waddell. J. F. Bamford was accompanist. The exercises of the nine young women, "Heaven of the Nations," was excellent.

PERSONAL MENTION.
S. B. Hicks, of Seattle, is registered at the Portland.

H. Logan, of The Dalles, is registered at the Imperial.

P. R. Kendall, of Astoria, is registered at the Imperial.

N. F. Strain, of Kelso, is registered at the St. Charles.

James Carter, of Kalamazoo, is registered at the St. Charles.

M. F. Hardy, of Astoria, is registered at the Perkins.

Max Luedemann, of Antelope, is registered at the Portland.

E. H. Jones, and wife, of Seattle, are registered at the Imperial.

B. F. Mulkey and wife, of Monmouth, are guests of the Perkins.

Lewis Hall and wife, of Weiser, Idaho, are guests of the Portland.

E. E. Shaw and wife, of Oak Point, are registered at the St. Charles.

E. W. Daggett and wife, of Arlington, are registered at the Imperial.

Dr. A. T. Knoder and wife, of Clatskanie, are registered at the Perkins.

Mrs. M. E. Edwards has removed her dressmaking parlors to 133 Tenth street.

N. Jones, a Wasco County sheep-raiser, is registered at the Perkins, from Walter.

Walter Gulick, of Pendleton, has taken F. H. Nolte's place, as stenographer to the Chief of Police.

Miss Jessie Marshall, who underwent a severe operation at St. Vincent's Hospital about four weeks ago, has returned to her home in Woodlawn.

Robert T. Platt, of the law firm of Platt & Platt, was called East suddenly yesterday on business of his father, the late ex-Judge Henry C. Platt, of Milford, Conn.

WASHINGTON, March 28.—Wilson T. Hume, of Portland, is in Washington, and is attending with the members of the delegation in advocacy of early action on the Alaskan bill.

Chief Moses and his Indians, who have been here for some time, have secured an allowance of \$1000 for their expenses, and will start for home tomorrow.

DOES THIS INTEREST YOU?
Six transcontinental trains daily via the O. R. & N. Quick and shortest route across the continent to Denver, St. Louis, Omaha, St. Paul, Minneapolis, Chicago and all points East. Has the finest diners, sleeping cars, coaches and baggage cars. Library cars that money can buy. Continuous connections; no waiting for trains from other roads. No change of cars; and a route laid with the heaviest steel, and well ballasted. Ticket office, 254 Washington street.

HANDSOME MOVING PICTURES.
See handsome moving pictures now on exhibition, tree, at Union Pacific ticket office, 15 Third street.

Dangers From the Cold and Blustery Spring.
From New York Herald.

"The present fall of temperature over a large area of country, and the probability of its continuance for some time, is very likely to affect the public health, by the increase of all such troubles as commence with the 'ordinary cold.' In this connection we cannot lose sight of the fact that grip is still prevailing, and although it has been on the wane there is a threat in the present cold wave of a revival of the former malignancy of the scourge."

"We can hardly congratulate ourselves that the danger from pneumonia is likely to be less with the incoming and inclement Spring than it was in the months gone by. It goes without the saying, then, that we cannot take too many precautions."

Dr. Humphreys' Specific "Seventy-seven" (77) restores the checked circulation indicated by a sudden chill, the first sign of taking cold; starts the blood coursing through the veins and so "breaks up" the cold. Manual of all diseases, especially about children, sent free.

For sale by all druggists, or sent on receipt of price, 25c and \$1.00. Humphreys' Homeopathic Medicine Co., cor. Williams & John Sts., N. Y.

PRUNES BADLY DAMAGED.

THEY ARE STARVING TO DEATH.

SAYS R. K. WARREN.

Thinks Protracted Cold Weather Did More to Destroy the Crop Than Did the Frost.

PORTLAND, April 28.—I have just returned from my prune orchard on the Columbia River, in Clark County, and am forced to admit that the Italian prune crop in that county is practically ruined. This fact is plain to all who make a careful examination of my own orchard, and is confirmed by the testimony of several of the large growers in different localities. Now, as to the cause. Were the prunes killed by frost, or by the continued cold weather?

Let us review the weather conditions during April. Up to the 7th of the month this prune crop seemed assured. On the contrary, of that date a cold wind swept over the Northwest, accompanied by hail and snow. The Italian prune was just in the fruit-forming stage. On the mornings of the 8th and 9th frosts prevailed, but from observations taken in various localities the temperature did not fall below 20 degrees. Our efficient Secretary of Horticulture has repeatedly stated that it requires a temperature of 25 degrees to kill the young prune. Since the dates above noted, the weather has continued cold—temperature ranging from 40 to 20 degrees. During the greater part of the day, with an occasional light frost in the early morning of a few days.

Now, it is a well-known fact that the effect of frost is indicated when, on examination, the young fruit is turned black. Of course, development immediately stops. But on the 26th when the examination was made, I found scarcely any evidence of frostbitten fruit. On the contrary, the trees were still holding a large portion of the fruit, which had grown since the frosts of the 7th and 8th to the size of wheat kernels. On shaking the branches, however, the fruit would fall, and a careful inspection revealed the fact that the stem had turned yellow for a quarter of an inch or more from the base of the fruit, thus plainly indicating an arrest of sap circulation and consequent death of the prune from starvation. The cause, therefore, is plainly evident, namely, the long-continued cold weather chilled the sap and an atmosphere rendered a free circulation of sap and deprived the young fruit of the necessary food for its nourishment. True, the frost may have killed some of the fruit, but the weather turned warm after the frosts. I am firmly of the opinion that we should now be rejoicing in the prospect of a bounteous fruit harvest.

I might say, in passing, that in the opinion of experienced growers, frost has never done material injury to the prune crop of Clark County. It would seem to be necessary, therefore, in order to insure a good crop of prunes to guard against the effects of a severe winter. The "smudge" arising from burning piles of wet straw.

R. K. WARREN.

TO PROTECT HALIBUT BANKS.

Dominion Government Asked to Shut Out Americans.

VICTORIA, B. C., April 28.—Fishermen of the west coast of Vancouver Island are petitioning the Dominion Government again for the establishment of a patrol to protect the British Columbia halibut banks from American poaching schooners. The coast seal hunting season ends Tuesday and school children are returning home. The average catches are larger than last season.

Cannot Pass on the Ice.
Advices from Skagway today are to the effect that the ice is refusing to permit any more icebergs to pass, and that of which has become dangerously honeycombed.

New Barracks at Work Point.
Work Point will be a scene of great building activity this summer, the large Imperial appropriation made in last year's estimates for the erection of new barracks and works being expended in the course of a few months.

The delay in proceeding with the work is due to the fact that the Imperial authorities could not construct any more buildings until land had been secured. This obstacle has been removed, the War Office having acquired a large tract lying above the barracks, and the work is now being pushed forward.

The total appropriation made was \$250,000, half of this amount being met by the Dominion authorities.

COMMENCEMENT EXERCISES.

High School at Grant's Pass Closed on Account of Smallpox.

GRANT'S PASS, Or., April 28.—The commencement exercises of the High School today were thus ended by the smallpox. In the presence of a goodly audience. Although the school was closed early in March on account of the smallpox, the graduating class continued its studies at the expense of the parents.

An entertaining programme was rendered, the excellent address by Judge H. L. Benson being on "Singleness of Purpose." Although the frost had nipped many of the flowers, the program was a success. As they will probably be accepted to various Coast terminals, this will bring in many visitors to Portland this summer.

GREAT NORTHERN.
Will Take Temporary Quarters May 28 at 208 Morrison.

Mention has been made by The Oregonian that the various railroad offices in the vicinity of Third and Washington streets would be forced to seek other quarters, owing to the proposed building to be erected on the site they occupy by the Henry Failing estate. This has been the railroad men considerable hard thinking in the efforts to secure temporary quarters. General Agent Harder, of the Great Northern, announced yesterday that he had decided to remove to 208 Morrison street about May 28. He will occupy the place where the Henry Failing store was formerly located. He will remain there until the new building is finished. His new offices in that building will join those of the O. R. & N. on

MORE THAN 400 STUDENTS.
Increased Attendance at the Agricultural College.

CORVALLIS, April 28.—The total enrollment at the Agricultural College is now 412 students. The college has received students at the institution. Inquiries for catalogues and other information indicate that next year's attendance will be very large. If next year's increase is as great as the present, the enrollment will approach 500.

The present enrollment is distributed as follows: Seniors, 85; juniors, 85; sophomores, 74; freshmen, 188; special, 2; graduate course, 20; total, 465.

The hophouse of W. A. Wells, two miles from Corvallis, was totally destroyed by fire last night. The value was \$1500; insurance, \$1000. The origin of the fire is unknown. Workmen left the adjoining field in the evening, and the fire was returned at 7 this morning they found the building in ashes.

TO OREGON FOR FOSSILS.

Expedition From University of California for the John Day.

UNIVERSITY OF CALIFORNIA, Cal., April 28.—The University of California will send an expedition into Oregon this summer to gather fossils in the famous John Day fields. The party, which will consist of Dr. J. C. Merriam, assistant professor of paleontology and historical geology, and four students, will leave Berkeley on May 1 and return until the middle of August. A special agent of the University of Munich will accompany the expedition.

Jurors Drawn for May Term.
ST. HELENS, April 28.—The following named persons have been drawn to serve on the jury for the May term of Circuit Court:

William Holmquist, S. M. Rice, John Dibble, W. H. Hankins, N. M. Perry, R. R. Ralston, H. T. Bennett, of Warren, U. M. Bugheny, Alex. Snow, T. B. Dugan, of Vancouver; G. C. Jaquish, Fred Henderson, N. Despain, of Goble; W. K. Tichenor, M. P. Young, Norman Merrill, of Clatskanie; W. H. Bumgarner, C. L. Smith, of Deer Island; A. H. Mathews, of Pittsburgh; A. J. Guigley, of Clatskanie; Thomas Boyle, Westport; Henry L. Colvin, Alta L. Woodward, A. S. Graham, of Marshfield; John W. Boals, William Roberts, of Maytag; A. K. Morgan, J. C. Hudson, of Hascam; John Scott, of St. Helens; Aaron Guelberg, of Fishhawk; J. N. Brum, of Yankton, and John Peterson, of Mist.

Yesterday P. J. Kaufman filed papers to institute suit for divorce from Anna Kaufman. It is alleged in the complaint that the defendant, who is the mother of six children, who are in the Boys' and Girls' Home, is in a house of ill-fame in Portland.

Seven-Day Mail Needed.
HEPPNER, Or., April 27.—The people of the Heppner Hills region are much pleased with the new train service, that brings them the Oregonian the same day it is printed, and keeps them in close touch with the world. But they feel that they are entitled to their mail and daily paper seven days a week, instead of six days, as now.

The Sunday Oregonian, with its wealth of interesting reading, leaves Portland fresh from the press, comes up the Columbia Valley and nights from the east-bound train at Heppner Junction. It is still to be seen in the hands of the readers, and is sent to sit around their 24 hours while its subscribers are longing for it. Why? Because the good Government has not yet gotten around to giving Heppner people a seven-day mail service.

While the Sunday Oregonian is still sitting around at Heppner Junction, doing neither itself nor anybody else any good, The Monday Oregonian comes along and says: "You are now out of date and out of the world. The Government has not yet gotten around to giving Heppner people a seven-day mail service. The Sunday Oregonian is still sitting around at Heppner Junction, doing neither itself nor anybody else any good. The Monday Oregonian comes along and says: "You are now out of date and out of the world. The Government has not yet gotten around to giving Heppner people a seven-day mail service. The Monday Oregonian comes along and says: "You are now out of date and out of the world. The Government has not yet gotten around to giving Heppner people a seven-day mail service."

Those who are losing their hair or have parted with their locks can have it restored by a remedy that is sent free to all. A Cincinnati firm has concluded that the best way to convince people that hair can grow on any head is to let them try it, and see for themselves. All sorts of theories have been advanced as to why hair falls out, but it is the remedy we are after, and not the theory. People who need more hair, or are anxious to save what they have, or from sickness, dandruff or other causes have lost their hair, should at once send their name and address to the Allen Medical Dispensary, 1005 Butterfield Building, Cincinnati, Ohio, and they will receive a free trial of the hair restorer, which will be sent by mail a sufficient quantity to grow out their hair, and to prove its remarkable action in quickly restoring all three of dandruff and scalp diseases, and forming a new growth of hair.

A Cincinnati firm has concluded that the best way to convince people that hair can grow on any head is to let them try it, and see for themselves. All sorts of theories have been advanced as to why hair falls out, but it is the remedy we are after, and not the theory. People who need more hair, or are anxious to save what they have, or from sickness, dandruff or other causes have lost their hair, should at once send their name and address to the Allen Medical Dispensary, 1005 Butterfield Building, Cincinnati, Ohio, and they will receive a free trial of the hair restorer, which will be sent by mail a sufficient quantity to grow out their hair, and to prove its remarkable action in quickly restoring all three of dandruff and scalp diseases, and forming a new growth of hair.

Those who are losing their hair or have parted with their locks can have it restored by a remedy that is sent free to all. A Cincinnati firm has concluded that the best way to convince people that hair can grow on any head is to let them try it, and see for themselves.
