As nearly perfect as they could be made. In attaining these ends the two girls felt that they would be achieving a result quite as worthy of their college diploma as teaching small boys and girls grammar and the rule of three.

The young women set about their experiment in a scientific manner. They visited personally, or through well-qualified representatives, over 100 laundries, chiefly in Boston. They did not intend to go into this new venture with their eyes shut, but even after minute and careful investigations they concluded that such a business would be safe and profitable for women to undertake.

By this time they had a thorough theoretical knowledge of the appliances needed and of the most approved way of conducting the business.

Senseless Superstition.

"I drew a tooth for a wee mite of a girl yesterday," said the dentist to a Washington Post reporter.

"It was one of her first teeth, and it wasn't much larger than a pinhead. I dropped it, quite by accident, and then I had to go down on all fours and look for that tooth.

"I was a new superstition to me, but she seemed to take great stock in it. Anyway, it was a good way to get rid of the tooth, and a great deal less dangerous than the way some mothers have of swallowing the first teeth their children lose."
