POLITICS OF THE WEST

GENERAL FEELING THAT BRYAN HAS NO CHANCE. Effort to Make Votes Out of the Labor Troubles—Effect of the Wheat Crop.

DENVER, Colo., June 15.—(Special to the New York Commercial-Advertiser.)—Notwithstanding the feeling that the mining states and many of the strongly Democratic states in the South and West will give Mr. Bryan emphatic majorities in 1930, there seems to be an indefinable though distinct impression in the minds of men of affairs in these states that Bryan will not be elected President next November.

It is not difficult to discover the origin of this impression, for it arises from the excellent commercial and agricultural conditions which are general west of the Mississippi River. Some importance is attached by Democrats to the strikes which prevail in several of the large cities. These strikes, however, with few exceptions, are for the extreme principle of unionism.

Wheat is not the only thing upon which prosperity is founded in the West. The corn crop is, after all the backbones of the agricultural situation, for it is from the corn fields comes the feed for the livestock which supplies the market of Chicago, Kansas City and St. Louis.

Without attempting to make any political predictions, it is apparent even to the Democrats that conditions are against Bryan and that the best chance he has of winning is by the aid of the "outs" who are generally regarded as the "enemy's country."

Oh! These Women. A rather youngish woman, with a fat and placid child, entered a west-bound car in H street Tuesday afternoon. She settled herself with that air of peace of mind and well-being that comes from wearing an up-to-date Spring hat and a well-made new gown.

Worldly Reflections. Style is born in a woman and born on a man. A woman without any religion is just as impossible a thing as a baby without any locking pins.
