NEGLECT OF PATRONESSES

Behavior Approaching Actual Rudeness of Young People at Smart Functions.

"I wish," said a charming society woman recently, "that you would say something about the way the young peoof this town treat their patronesses. It is simply unbearable, and it is getting worse all the time."

If this had been the first complaint of the kind confided to me, I should have been surprised and possibly inquisitive; but is all probability. I should not have magnitoned it. As, however, it is about the 60th time that I have heard it, with specified details in some cases, it is borne in upon me that no occasion can be more fitting than the present for an unpreju-diced discussion of a matter of so much

Plates were set for rial position communds respect and deference, and whose very presence is an honor to any function—it seems almost beyond belief that they should be sub-jected to rudeness, and from the very 150. At the conclusion of the feast. Neighbor J. C. Jones, tonstmaster, announced toasts which were responded to by those present. Miss Maud Hayes gave a farewell party graons at whose carnest solicitation they have consented to serve.

Caddish Behavior.

It not infrequently occurs (this is attested by a score of those who have sufforod) that the young men who have preferred the request neglect to approach, or in any way recognize the presence of the patronesses during the entire evening. It is enough to try the patience of the most amistble woman to find that she has made a careful and becoming tollet and gra-clously gone from the comfort of her own fireside to spend fruitless hours in recelving guests who don't, apparently, want to be received, and who assume an air of lofty indifference when they chance to come in her vicinity. The attention is awkward, to say the least. Does it arise from ignerance, or is it due to careless-

ness and a contempt for good form?
It can hardly be supposed that the young people of today have grown up young people of today have grown up lacking to opportunity to obtain a working knowledge of the usages of polite fing knowledge of the usages of polite fing knowledge of the usages of polite forced upon one, unwillingly enough, that the present generation has decided that the present generation has decided that it can dispense with its mainners.

Psychological Problem

But I have been wondering whether the girl in current fiction reflected the girl in roal life, or whether the girl in real life was influenced by the heroine in print. However, that seems to suggest a psychological problem, altogether too deep for discussion here.
