## MARKET IS NEGATIVE

Speculators Waiting for Uncertainty to Clear Away.

SHIPMENTS OF GOLD TO EUROPE

Foreign Money Centers Adding to Their Floating Indebtedness to New York.

NEW YORK, Aug. 11.-There was a rise today in the price of St. Paul & Omaha of By over that of yesterday on a single transaction. America Tobacco gained 1%, Republic Steel preferred as much, and Pullman 116. Lend preferred lost 74 in addition to yesterday's 4%-point decline, without any news to explain the movement beyond reports of poor business. The common stock fell 1% to the lowest price on record. Sugar advanced a point in the morning on buying, attributed to covering of an important outstanding short account, forced to cover by the operations of a bull pool in the stock. Most of the gain was lost in the late dealings. These comprise the only move. ments weeth individual mention on the day's market.

The significance of the market continues purely negative, the determined restraint of the apeculation marking the walting for a solution of the many points of uncertainty in the situation. The bank statement conformed pretty closely to expectations, the exports of gold for today amounting to \$1.35,000, evidently not flooring in the statement. The carlier exday, amounting to all the earlier ex-figuring in the statement. The earlier ex-ports were offset by the receipts of gold from the Pacific Coust and the currency from the interior so far as to bring the decline in cash resources down to less than \$300,000. It is of special interest to than \$300,000. It is of special interest to observe that, while the week's fixture of American capital in foreign investment has been carrying out gold in payment, foreign money markets are still adding to the num of their floating indebtedness to the New York market, as reflected in the loan expansion, which is made on steeling exchange collateral. Further receipts of gold are expected in New York next week on account both of Klondike. next week on account both of Klondike and Australian receipts at San Francisco. but a heavy additional outgo to London is considered well assured. No authorized announcements can be had of shippers' plans, but it is reported that tentative arrangements have already been made for shipping at least \$5,00,000 and competent estimates are made that the total will reach \$10,000,000. This leaves any Paris demand out of consideration, the rise in the Bunk of England's bid for gold leaves. ing a doubt whether any inducement res to ship to France

The market for securities in New York was practically paralyzed this week, collings dwindled progressively, until in

relaxing them elsewhere.

The bond market has shown some sympathy with stocks all week. United States old is declined %, the new is %, the 2s is, is %, and refunding 2s, when issued, % in the bid price.

# CASH HOLDINGS WILL DECLINE.

Surplus, reserve decrease...... Specie, increase The banks now hold \$38,125,800 in ex-

cess of the requirements of the S per The Financier says: The gold exports of the week have not

affected the weekly showing of the New Tork banks to any extent, but it is nev-ertheless true that the \$5,500,000 of specie shipment, less about \$1,400.000 received in operations with the interior, must have depleted reserves considerably, and there is reason for believing that pext week's averages will reveal a decided falling off in cash holdings. In fact, if the exports of the next few days come up to estimates, the surplus reserve of the banks will go below \$20,000,000 by a fair margin. Against the losses sustained the receipts from the West must, of course, be considered, but as the crop senson is at hand it is only natural to look for a flow of money to interior points for the a flow of money to interior points for the remainder of the month and September. There is no indication of stringency in this. On the contrary, bankers, who have all along predicted higher rates, are wondering if they were not too positive in their assertions. It is plainly to be seen, however, that the factors now at work in the money market favor a stif-fening in quotations. Call money touched I per cent in New York inst week, the lowest of the year. The utter stagnation in speculative circles makes the demand only nominal, and the rise of \$4.488,000 in the loens of the banks has week appears inconsistent. The explanation is that internationl operations incident to

ble. The binks when they subscribe for United States loans often class their al-letments as foans, that is, loans to the Government, and this may have been done indirectly now, but by the borrowings of customers from the bunks to pay for their English bonds. The loans ex-pansion caused the rise in deposits, but not to the amount that other operations called for. The loss in cash and increased legal reserve requirements are accountable for the contraction of \$1.68.005 in excess reserve. Circulation is still expanding rapidly and will continue to do

British loan subscriptions are respon

#### THE BRITISH LOAN. Its Relation to the Monetary and Political Situation.

Manchester (N. H.) Union, Dem. It is stated in New York that the British Government has authorized J. P. Morgan & Co. to invite the subscription in this country for £10,000,000 sterling British exchequer bills bearing 3% p cent, this amount being the whole of th new war loan. It is further stated the this action is highly significant as to the relatively suronger position of the mone market here than abroad. It is, in facsignificantly suggestive in many ways. T unprecedented success of the loan to or Government during the Spanish-America War renders it practically certain the England can borrow in this country a the money that is needed to meet the cost of the struggle with the Boers, an at rates which the British Government does not expect to secure at home on on the Continent. The proposition of P. Morgan & Co., therefore, speaks for cibly of the strong financial resource of the United States and of the mann in which these resources are looked up-It is also of interest to consider when

this money will come from, if the loa is placed here, to ask what sort of peopl in America Great Britain now turns to I her pressing need for money to meet he extraordinary expenses. The loan wants be subscribed for by the wealth individual capitalists of this country they look for larger returns than 1½ pe cent, because they can afford, or thin they can, to take greater risks in th nature of their investments. Of cours it is understood that the members of the banking-house of J. P. Morgan & Co will not furnish it; they act merely a agents between the British Governmen Dealings dwindled progressively, until in the latter part of the week the day's aggregate of shares sold dropped back to figures not reached before since the stagmation of January, 1891. There was even less life in the bond market, the daily average sales having felien considerably below \$1,000,000 par value. Beyond the slight sugging tendency which is the natural result of this inantiton there have been no important changes in prices. It would be possible to detail quite a long list of different factors, all probably having something to do with the stagnation in stocks. But these factors all converge in the money market, and it is there that the index must be watched from which to point the direction of emergence from present conditions. The week has been important for the developments toward equalization of international money-market conditions. As interest rates in New York at present are the cheapest in the world, it follows that the process of equalization will raise rates here while relaxing them elsewhere.

The bond market has shown some sym. it belongs. When traced to its source, it will be found that the money which goes to the taking up of the Government bonds or of British exchange bills is from the small accumulations of the plain people who have tolled to save something for a rainy day or have made some provision in case of death or loss by fire or ac-

cident. Exports of Gold Will Decrease New

York Bank Reserve.

NEW YORK, Aug. 11.—The weekly bank statement shows the following changes:

cleant.

But if these institutions, representing the labor and the hope of the plain people of the United States, have sufficient surplus to enable them to take up an entire British war loan, as undoubtedly is the case, something is suggested of the vast number of periods in the nature of their investments now many want to be sure of their money many want to be sure of their money when they ask for it; how many look to realize in full upon their policies in the nature of their investments now many want to be sure of their money are policies in the nature of their investments. 288.700 to realize in full upon their pources in case of death or accident or fire. And this thought leads, must always lead, to a consideration of the sort of money which these millions of the common people, these depositors in savings banks, these holders of policies of one kind another, may expect to receive in these nothers of policies of one and and another, may expect to receive in time of need from the institutions which they have made their agents. The Brit-ish lean, of course, goes away in gold and will come back in gold, since it can scarcely be conceived that any one not cherishes the expectation that England will ever recognize other than a single standard of value; but this lean, large as it is, represents but a small part of the surplus earnings of the people of America, and if here in America we choose for ourselves a chearer sort of money, if we try to make a 50-cent dollar do the work of 100 cents, the loss must fall upon those who first saved up that money in honest, hard-earned, 100-cent dollars.

This consideration is certain to recur again and again to every thinking man and woman; it will not be obscured. Conventions may resolve that one question the surplus earnings of the people of

ventions may resolve that one question or another constitutes the paramount issue before the country; paramount issues are not made by resolutions. So long as there is a serious proposition for the free and unlimited columne of silver at the ratio of 15 to 1, when the actual difference in value between silver and gold is 22 to 1, just so long that prop-osition will constitute an issue which cannot be lost sight of, which will not be ignered.

return for a moment to the pro-To return for a moment to the pro-posed British loan, it is an argument frequently advanced that cheaper money means more money. If this were true, Great Britain ought to be seeking to place her loan where money is plenty— that is to say, where dollars are cheap. There are a few countries with sliver as more or less distinctly the basis of their currency today, but they are not their currency today; but they are not caning money to Great Britain or to any other country. Their people have need of all the money they can come by, and they do not find it plentiful simply because it is cheap.

## An "All-Round" Opinion.

Charles Francis Adams writes to the Cherlee Francis Adams writes to the New York Evening Post that he doesn't see anything to be gained by putting up another National ticket. He thinks the "anti-imperialists" would show sense by concentrating their efforts on the election of an "opposition" House of Representa-tives. He hopes to see William McKinley ro-elected. He would like to see Bryan in the Senate. "We would then soon learn," he says, "what if anything there is in him." Bryan in the White House, Bryan in the White House with Altgeld, Croker and George Fred, Massachusetts, as his next friends and prisers, is a wholly different proposition. Adams. He writes:

There is a Scriptural adage in regard to the Bank Clearances.

## SEALER MINNIE WRECKED

VICTORIA SCHOONER LOST IN NORTHERN WATERS.

Captain Jacobsen and the Crew Are Safe on Board the Walter L. Rich.

Mrs. Victor Jacobsen, of Victoria, re-Mrs. Victor Jacobsen, of Victoria, received a letter Thursday from John Haans, master of the sealing schooner Walter L. Rich, saying that the schooner Minnie had been lost and that all hands were safe aboard the Rich, Captain Jacobsen had been skipper of the Minnie for 18 years. There are no particulars of the wreck, but it is believed to have occurred at Unimak Pass. The Minnie was last heard of at Dodge's Cove, on the west coast. She was there for her hunters, after sailing from here June T., and got nine canoes with 18 Indians. She left there early in July, and sailed for Unaers, after salins from here June Z. and got nine canoes with 18 Indians. She left there early in July, and sailed for Unalaska, where the sealers make their head-quarters until they enter the sea at the beginning of this month. The Minni- was 67 feet long, and of 46 tons. She was

on the ocean beach two miles below the Cliff House during the night. The vessel became becalined outside the Heads and drifted on the beach. The captain and crew were at no time in any danger. The Neptune will probably prove a total loss. She is of 18t tons gross, and its owned by Sudden & Christensen, of this

Inspectors' Splaries Readjusted. WASHINGTON, Aug. 11.—The Treasury Department has made its annual read-justment of the salaries of Steamboat Inspectors for the current fiscal year, sal-aries being allowed in accordance with the number of vessels inspected. Under this readjustment the inspector at Port-land vill receive \$1500 and the Inspector at Scattle will receive \$300. The Inspector at Portland last year inspected between 100 and 150 vessels, while the Scattle Inspector had between 200 and 300.

built at Victoria many years ago. In 1889 a United States revenue cutter seized her for illegal sealing in Behring Sea. Cap-

tain Jacobsen distinguished himself by evading the United States authorities and

the Minnie Into Victoria, prize

The Wreck of the Minnie. SEATTLE, Aug. II.—The steamer Alli-ance arrived from Nome today with news of the wreck in Behring Sea of the Vic-toria whaling schooner Minnie, on July 25, in a dense foe. The Minnie was driven on the reefs of Ugamok Island at the entrance to Unimak Pass, through which she was trying to beat her way into the North Pacific. No lives were lost, the crew escaping to shore in the lifeboats. Five of them were picked up by the Alliance and brought to this city, while the remainder boarded the whaler Walter Ride. The Minnie is reported to be a total loss. She was a 45-ton vessel, owned in Victoria by Captain Victor Jacobson.

## BALLASTED WITH OATS.

her master.

Government Orders Investigation of the Pak Ling Londing. SEATTLE. Wash., Aug. 11.—An investigation of the improper loading of the transport Pak Ling has been ordered by the Government. Sensations are promised and it is now said that some attache of the Quartermasters' department will be let out of the service for his stupid-ity. The Pak Ling was in a deplorable condition and would undoubtedly have sunk in the slightest gale of wind. She was not topheavy, as alleged, but her ballast had been removed and oats substituted. This is the first time onts were ever used for ballast,
