# STOCKS ARE HIGHER

Rising Prices Attend the

Receipts From Alaska Will Replen ish the Drain on the Reserves of New York Banks.

NEW YORK, Aug. 18.—The Wall-street NEW YORK, Aug. 18.—The Wall-street axiom. "When gold grees out, stocks 50 down." for once was exploded this week, as the shipment of over \$3,990,000 was attended by rising prices. As the exportation of over \$1,000,000 gold during the past two weeks does not make very serious inreads on the country's holdings, and as constant accessions are before reous inreads on the country's normal, and as constant necessions are being received from natural sources, Wall street's squanimity was not surprising. Where the drain will be most keenly felt is in the reserves of the New York banks. Discussion of its influence on future among conditions had some weight on the money conditions had some weight on the money conditions had some weight of the

week.
But for the interest aroused by an
analysis of the Brooklyn Rapid Transit
annual statement, professional operators
would have had little material or influwould have had little material or influence on prices today. Although the report showed that a shade over 1 per cent was earned on the stock, discussion of specific items was uninvorable. For instance, the high ratio of operating expenses and outstanding loans of \$1,000.-400 aroused comment. Decided pressure was exarted against the stock from the outset, an extreme loss of 2½ being made, with the net loss reduced to 1½ on purchases by the short interest. In People's Gas a fall of 2 per cent was without ladequate explanation, but this stock also recovered somewhat in the final dealings. These movements were the chief features of the market, its narrowness being ac-These movements were the cher restures sof the market, its narrowness being accontinated by the absence of London operations, it being a holiday there. Railway stocks were relatively better sustrained than the general run of special-ties. The publication of the second week

rained than the general run of specialties. The publication of the second week
of August earnings for many lines showing numerous increases, acted as a peopfor this division. These statements demonstrated that tennage was increasing in
swidely separated sections.

As the time approached for the publication of the bank statement, business
became very restricted. The statement
met general expectations as to the cash
loss of \$3.561.500. Accommodations to the
runderwriting syndicate, in connection
with the British loan, accounted for the
greater part of the increase of loans of
\$2.501.000. Deposits were reduced \$3.501.000,
and the general effect was the shrinkage
in surplus reserves of \$1.500.000. A replenishment of the banks' losses this
week is expected to occur speedily, advices from Pacific Coast points announcling the receipt of \$1.500.000 Alaskan gold.
This, it is believed, will be made avail-Eng the receipt of \$1,00,000 Annakan gaid.

This, it is believed will be made available to the local banks by Government
drafts on the Subtreasury here. In addition, payments are now being made on
account of the redemption of the old dovernment 2s, involving some \$20,000,000.

With these factors taken into considerano general uneasiness is felt as to

A general and material rise was effect-A general and material rise was effect-ed, in which the best class of railroad stocks figured. London bought heavier, the relief to its money statistics show-ing docreased dividend payments by its railroads, causing a demand for dividend-paying stocks here. No change in local money raiss occurred during the rise, but later call rates bouched Ph. In anticipamier call rates usuched 19, in anneapa-tion of an unfavorable bank statement. Sugar vibrated on trade and dividend prospects, and the coalers were affocted by value reports. Bespecting the rise in the railroads, more definite facts were

the railroads, more definite stata were cited, including improvements in the crops and weekly earnings.

Prices in the bond market conformed closely to the developments in stocks. Interest was most marked in middle-grade sues. United States refunding 2s, who sued, advanced 3, new and old in 1447 the bid price. The 5s declined 14 pe

#### DUE TO GOLD EXPORTS. Explanation of the Week's Change

in the Bank Statement. NEW YORK, Aug. 18.-The Financie

Practically every change in the show ing of the New York banks can be trace to gold exports. The loss in cash aggregated \$5,341,800, of which amount \$8,100 was specie and \$23,900 legal tender cannot be said that the shinkage of \$1,768,900 in the surplus reserve corr sponds with other changes in the state ment. The contraction should have been considerably larger, when the heavy de crosse in cash, together with the de cresse of \$1,001,000 in deposits, which les sened reserve requirements to the exten of \$750,000, is taken into consideration. As increase in loans under normal condition is generally accompanied by an increase in deposits. The discrepancy in the two stems is attributed to operations incident to the British exchequer loan. In other words, the gold withdrawn from the banks for export has been entered on the books as loans. Therefore, the specie contraction prevented an increase in de-

posits, which would have resulted had the loans been made by means of checks and not by actual withdrawals of cash. It is evident from the decrease in deposits that the statement would have actu-ally revealed a contraction in loans had it not been for the gold withdrawals for export. It was reported Saturday that deposits of cash in connection with sub-scriptions to the new stocks of the Con-solidated Gas Company were heavy durdng the latter part of the week, and will be reflected in next Saturday's staten Considerable cash will be distributed this week on account of the refunding of the extended I per cent Government bonds. which will go a long way toward replace ing the gold lost by export.

ENGLAND'S GOLD RESERVE. It May Be Reduced by Demands for

Egypt and Argentina. LONDON, Aug. 18.—The Statist, in an Heavy Export of Gold.

WALL STREET AXIOM EXPLODED

To be and an inflow of 1500,000 from the United Kingdom is expected. Thus the bank will secure over 14,000,000, and may succeed by reliable to reserve the page of the secure over 15,000,000, and may succeed by reliable to reliable to the secure over 16,000,000, and may succeed by reliable to reliable to the secure over 16,000,000, and may succeed by reliable to reliable to the secure over 16,000,000, and may succeed by reliable to reliable to the secure over 16,000,000, and may succeed by reliable to the secure over 16,000,000, and may succeed by reliable to the secure over 16,000,000 from the se bank will secure over \$4,00,000, and may succeed in raising the reserve at the end of the week to \$23,000,000. The outflow of cash from London to the country usually reached \$4,000,000. During the last four months of the year we may be called on to furnish several millions of gold for Bgypt and Argenting, and there is little prospect of more gold from New York. With a reserve of \$22,000,000 we may have to meet a demand of \$6,000,000 or \$7,000. to meet a demand of \$5,000,000 or \$7,000,-

years. William McCawley won the driv-ing contest, scoring 197 yards. The play today closed the annual tournament at

EXTENSION OF CONTRACTS.

More Time Will Be Given Only When It Benefits the Government.

WASHINGTON, Aug. 18 .- Mr. Trace well, the Controller of the Treasury, in a case involving payments on a contract for purchasing and placing riprap stone in jettles at Fort Jefferson Inlet, N. Y., in jettles at Fort Jefferson linet, N. 1.
lays down the principle that a Government contract may be extended as to
time—that is, modified so as to relieve the
contractor of penalties or damage—only
when the modification is for the interests
of the Government, being based upon a of the Government, being based upon a new and valuable consideration.

"It naturally follows," says the Con-troller, "that if an extension of time be granted solely for the benefit of the con-tractor, without any new consideration to the Government, the extension would not 000 Hence, later, it may be necessary tractor, without any new consideration to take further measures for attracting the Government, the extension would not gold, or for diverting Egyptian and South relieve the contractor from any of the

#### NEWPORT AND NYE BROOK. Summer Throng Increasing at the Yaquina Bay Resorts.

NEWPORT, Or., Aug. 16 .- Considerable interest has been taken the past week in the removing of the large rock from the entrance to Yaquina Bay, and crowds of people line up on the beach and anxiously await the signal for the setting off of the many tons of powder that are used for this purpose. Some who are quite-anx-ious to get a good "snap shot" of the water immediately after the explosion climb over the rocks on the jetty, and in this way get several hundred feet nearer than otherwise, and some very good pictures have been taken from this

noint. One of the most pleasant and success ful events of the season was the n launch Trilby, with two barges, carrying nearly 100 people, made a trip last Wednesday evening which was one of the most pleasant of events. The barges were decorated with Chinese lanterns, good music was in attendance, and many of the young people soon arranged things for a dance and a general good time. An-other excursion will be given in the near

future. The firemen's excursion from Albany brought over about 250 people last Sun-day, and 30 people arrived on Saturday. More than the usual number have arrived daily during the week, and there are more people here now than at any time this season, and they are still com-ing. The number of people from out of the state are particularly noticeable this eason, which goes to show that Newport is growing in popularity, without as well as within the state. The time is coming when Newport will be still more popular

as a Summer resort. The dancing parties given in the operahouse have been well attended, and some excellent music was given there the past week. The parties will be given twice a week as long as the attendance continues satisfactory. Captain Clark, of the life-saving sta-

tion, brought his crew to Newport last Monday afternoon and drilled in the bay with the lifeboat. The drill was very interesting, and Captain Clark's kindness in coming here was appreciated. Another in coming need was appeared. Another intill will be given at an early date. Nearly every day for the past week some work has been done on the big rock in the channel, till now more than nine

feet of rock has been removed. En-gineer Polhemus has made careful sur-veys of the spot where the explosions took place, and the result shows a depth of 15 to 18 feet where previously there had only about nine feet Sea Lion Charley and Postmaster An

derson had a very narrow escape last Sunday morning while out over the bar, where they went to fish. Several whales were noticed in the distance, but they were not at all alarmed till one whale raised up under their boat and lifted it several feet out of the water. Fortunately the boat was not overturned, and its occupants were not injured, but they do not care to again undergo the experience.
The following-named people registered

the past week at the various hotels:

enjoy a brief season of rest and recreation.

T. Farrell mingled with Seaview acquaintances last Sunday.
