Indications of Pending Inter-

England Auxiously Watching the Policy of the United States-Vatiena and Quiringl.

LONDON, Aug. E.—The policy of the United States toward China is watched here with more interest than is that of any other country, for Englishmen be-lieve somehow or other that in the trou-bles ahead, America will be the only power with interests parallel to theirs. The Spectator, discussing the frailty of he lies connecting the powers, says: "Continental statemen look askance at the new force, America, whose limits

they do not clearly discern, and which, for example, can send black troops to China, and they mutter words about the possible Angio-Saxon understanding, and would, if they could, gladly postpone all action so as to have more time for refecaction so as to have more time for reflec-tion and combination; only you see Pe-kin is in fiames, the Chinese Semiramis is on her way to Segan, and a Russian Genaral publicly reports that the Amur-new flows through Russian territory. Ja-pan has been helping Europe, but Eag-lish observers are uncertain what her statesmen intend."

"That the French Government is preparing for war there can be no longer any doubt." This first sentence in a long article in the Pall Mail Gazette of Wednesday, on "The Imminence of War With Prance," is the subject of serious speculation in most of the periodicals, The Speaker considers a French invasion a nightman, but fears that the persist-ent fomenting of National hatred is ominous and may precipitate a conflict. The spectator says it does not wish to encourage the scare, but it volces a caution that a strengous watch should be maintained over the National defenses.

According to present arrangements, the Queen will hold a council at Ou-borne August N. Henry Labouchere as-serts, at which the dissolution of Parlia-ment will be sanctioned with the customary formalities, and the general election ill be held early in October.

English correspondents at Paris, in exaining why France, though bestowing corations on the representatives of all other principal countries at the exposition, omitted so to honor those of Great Britain, say that the British com-missioner when requested to designate those worthy of decoration, replied that the laws of his country did not allow him or his official associates to accept deco-

The introduction of the young King of Spain to his subjects on the northwestern searcast, was attended by a degree of good feeling not before seen in Spain in generations. Even in the provinces where socialistic and dynastic discontent is always verging on insurrection, the people showed patriotic pleasure, and a desire to forget the past disasters and accept the new order of things.

It would be supposed that the question of superiority of the American method of riding horses had been sufficiently demonstrated by this time to convince even the conservative British horseman. The sporting papers, however, are still filled daily with letters on this subject. The hitter reluctance with which the friends of British jockies admit the advantage of the American system is a curious part of the confroversy. This has gone so far that a writer in the Sportsman today calls for a halt in the discussion, and advocates the American system, which, he says, "certainly suits our formers, owners and trainers," adding. "let us still be sportsmen, even if we

The Pope, in spite of his years, is still the soul of the Vatican, and rules his entourage with a rod of iron."

Forgetting the Chinese cryptogram and the unending war in South Africa and the reconstruction of that country, a strike on a little 100-mile Weish railroad stirs up more sections interest than anything else in Engiand this week, because it is closely related to the coal supply and the manufacturing vitality of the kingdom. The Taff-Vale Raifroad carries the product of \$6,000 coal miners into Cardiff. The fifth day of the strike sees small quantities of the best steam coal commanding 35 shillings. All the Cardiff factories are shut down, and the merchant feet is unable to leave the harbor because it has not been supplied with coal. Most of the mines who delivered washing at the Scharn flat the Saturday evening Catherine was murtiple of the mines of the supplied with coal at the pit mouths. England this week, because it is closely been supplied with coal Most of the mines are still piling up coal at the pit mouths. All will probably be idle in another week. All will probably be idle in another week. The cause of the dispute is that 2000 railway servants want a half-penny an hour more and are upheld in that demand by the Union of Railway Men of the United Singdom with 239,000 in the treasury and a strike income of 5000 a week. the probabilities are that American coal il be imported. The arrival in the arres on Thursday evening of the British steamer Queenswood with tentions of coal, and the sailing of the British steamer Armstor from Norfelk, Va., on Wednesday, with 4000 tons destined for Mantry Bay for the British Navy, afford a text on which hange abundant speculation. Charles Stewart Smith, a member of the New York Rapid Transit Commis-sion, who has gone to Scotland to visit Mr. and Mrs. Andrew Carnegio, has devoted considerable time to studying both the Paris and London underground elec-

The London electric railroad is certainly a great improvement over anything Lon-don has ever had. But, after all, it is not rapid transit in the sense we under-stand it in the United States. The middle of August finds London in the apogee of the season, while the exo-dus of returning tourists is limited only to the carrying capacity of the outgoing steamers. C. &. Gellig, who is an expert at calculating American travel in Europe, said to a representative of the As-sociated Press: "It is nonsense to talk about 150,000

It is not often that any American real-dent in England secures a place in Van-ity Fair's portrait gallery, and far less frequently does the subject of these pleasant caricatures resent them. Not so with "Little Johnnie" Rieff, however, who is the subject of this week's cartoon. Reiff who cares more about kittens and

## STREET BATTLES IN PEKIN

ALLIED PONCE INSUFFICIENT TO POLICE THE VAST CITY.

Report of the Capture of the Empress and Court 80 Miles Southwest of the Capital.

LONDON, Aug. E.-Street fighting breaks out intermittently in Pekin ac-cording to dispatches from Shanghai, the ailies not having sufficient forces to po-lice the vast city. As small parties of the ailied troops penetrate into new dis-tricts they have to engage half-armed

mobs.

A Shanghai dispatch repeats the report that Japanese troops pursued the Dowager Empress and the court and overtook them 80 miles southwest of Pekin. The Emperor, it is added, threw himself on the protection of his captors. The prisoners have not yet reached Fekin.

there is an immediate change in conditions.

There is a disposition in Administration circles to believe that General Charfee's recommendation was based on military considerations alone and that he did not take political considerations into account when making it, though there is reason to think that his dispatch was sent after consultation with Minister Conger. Withdrawal of American troops will be considered permissible when the restoration of order and obtaining those guarantees for the protection of American life and property contempisted by Secretary Hay's note of July 3, can proceed without their presence.

The withdrawal of the troops will be required if, through the declaration of war against China by one or more of the powers, a condition should arise which would temporarily at least interfere with the accomplishment of the objects which the United States had in view in co-operating with other nations.

#### GERMAN WAR PREPARATIONS. Powerful Army May Be Transported to the Orient.

NEW YORK, Aug. 25.—A dispatch to the Tribune from London says: The report telegraphed from Washing-ton that Germany is preparing to make San Francisco a base of supplies with a view to sending a very powerful army to China, has attracted considerable attention. Your correspondent has made da-quiries on the subject in shipping circles, and finds that German orders for stores and provisions are sufficiently extensive to lend probability to this rumor.

It certainly would not surprise the dip-iomatic authorities here if the German force should eventually reach a total of 40,000 or 50,000. Some importance may possibly be attached to the meeting which the Prince of Wales had with the German Emperor yesterday.

The Prince, in company with the Duke of Cambridge, who, it will be remem-bered, preceded Lord Woiseley as Com-mander-in-Chief of the British Army, drove from Homburg to Castle Friederichsdorp to meet the Emperor and Empress Frederick. Subsequently the Emperor accompanied the Prince and Duke back to Homburg, and had a long private conversation with them at their hotel. It is commonly understood that the British heir apparent does not interfere in polit-ical matters, and in a general way this is true, but in their foreign policies there is a good deal of private communication between the English and German courts, between the English and German courts, and it is extremely likely that the Kaiser and his uncle discussed the outlines of a Chinese policy, which may be pursued by their respective empires. On more than one previous occasion the

Prince has been employed as a kind of dignified and superior Foreign Office mea-senger, able to say to the German Em-peror what could not conveniently be con-veyed through ordinary diplomatic channels. In the present crisis, Lord Salis-bury may have induced the illustrious tourist to take advantage of his visit to Homburg to point out to his imperial reinomburg to point out to his imperial rel-ative that unnecessarily aggressive or violent action in China would be ex-tremely distasteful to Great Britain. The German Emperor has views about the al-leged "yellow danger" which have never been shared by the English Premier.

A Great Methodist Temple.

CHICAGO, Aug. 25.-A temple that will rival any other in the world is to be built in Chicago, if plans now under consideration by the various Methodist church officials in this city are matured

Dr. Cobern, who is pastor of Tringy Church, in the Colorado city, was interviewed in Denver, but would say nothing beyond asserting that the matter had not reached a point where he could talk. Presiding Elder Jackson "I will not say that Dr. Cobern has been

The plan will be to effect the consolida-tion of several big Methodist Churches
