The Great Rush Still Continues

FURNITURE IS MOVING FASTER THAN TIME

Last Sunday we announced that our entire force was kept busy day and night filling orders for furniture sold to eager purchasers during our Closing - Out Sale. The past week has been a repetition of former weeks since the sale started, as every purchaser sends two or three friends to take advantage of the bargains offered. DON'T WASTE ANY TIME. COME NOW, while the different lines are unbroken. If necessary we will hold your purchases until you wish them delivered. We have already sold a number of people the goods not to be delivered until Christmas. They are people who appreciate bargains and won't let such an opportunity slip. Call now and we can save you money on every purchase.

GRADUATES OF WILLAMETTE UNIVERSITY INCLUDE NOBLEMEN AND SCHOLARSHIPISTS

THEORY ABOUT FOOD

After a Few Leaves on the Same Plant,

-By the Author of the "Science of Nutrition"

We have much evidence about health and disease that is not common knowledge. Certain substances are in all foods and have a constant effect in whatever quantity they are taken. It is well known that the body requires air, water and food, but the quality of food is by no means equal. Plant food is the best food for man and all animals. It is produced by plants and has a pure and simple chemical composition. The body is the absorbing organ and its functions are self-evident. Fruits and vegetables are rich in minerals and have a physiological action. The body requires the right kind of food and its composition is the result of the diet.
