## CITY NEWS IN BRIEF

WAITING FOR THE RAIN .- Farmers adjacent to Portland would like to be plowing this fine weather, but they think the ground is hardly wet enough. In Washington County, a good deal of Fall grain will be sown if the weather conditions are just right. In California farmers tear up the ground while it is still dry and hard and the close of dark hide and hard, and the clouds of dust hide both plowman and team, but in Oregon the farmers think they must have the soil well wet down before they begin Fall operations. There appears to have been more rain right in Portland than upon the fields a few miles away, where the soil is only wet down three to four

WANTS TO FIND PATRICK DALY,-City Auditor Devlin has received an inquiry from John Daly, & Gramercy Park, New York City, relative to Patrick Daly, who was thought to have located near Portand in the year 1842. Since 1877 Patrick Daly has not been heard of, says the writer, but is understood to have pos-sessed real property in the vicinity of Portland. The eagerness of the writer for information and the hint about real estate seem to indicate that a lost heir has scented an inheritance from afar, Mr. Deviln knows many Dalys, but does not know a pioneer by the name of Patrick Daly.

#### WHERE TO DINE.

By all means go to the Portland restaurant, 305 Washington, near Fifth. Coffee, meats, dairy products, etc., are the best. The general public rarely sees the instances this "ignorance is bliss." But there are exceptions. An inspection of the extensive kitchens connected with Wat-The Oregonian was a revelation. Few realise their magnitude, completeness and perfect equipment. No hotel or restau-rant in the Pacific Northwest has more rfect cooking facilities than Watson's, of Portland. Everything is provided for on a large scale. Baking, roasting, boiling, broiling, toasting, every branch of cookery has its proper place. Its re-frigerating facilities are ample, the yentilation of each department is absolutely perfect, and the most scrupulous cleanli-ness is maintained everywhere. Only the very choicest meats, poultry, game, but-ter and cream are served, and they reach the table in perfect condition. One cannot go through the kitchen without becoming hungry. Everything is as neat and clean and appelizing in the kitchen as on the table. Every article has its place—even the butter-patties are subject to the touch of no hand, but are kept on their plates in their own refrigerator ready for serving. The odor of the kitchens is like that of an old Eastern farmhouse kitchen at Thanksgiving time. It is all the result of neatness and care. And it means appetizing, enjoyable

THE SUPREMACY OF

## KIMBALL PIANOS

Is in part the result of many inventions which are protected by United States letters patent. More than 50 valuable improvements are thus secured, notably among them being the brass pin-block covering in the plano and the arched iron brace and steel truss, permitting of a continuous bridge. Now comes an important device in the plano action whereby the old wooden hammer and damper flanges are replaced with the Kimball patent combined flanges of brass, which prevents loosening or wabbling of hammers and dampers, and is not affected by changes of atmosphere. Plano-tuners and regulators, in commenting on this great Kimball achievement, SAY IT THIS WAY:

"Replaces the old wooden flanges to hammers and dampers."

"Replaces the old wooden flanges to hammers and dampers." "Makes it impossible for hammers and dampers to get loose." "Surely the greatest improvement of the age in plane actions." "Entirely prevents wabbling of hammers, caused by loose centers: sluggishness, caused by extreme dampness, or loosening of flanges, sed by extreme dryness."

'Will save much expense attached to other actions the world over." These opinions more firmly establish the title of sovereignty already towed upon the KIMBALL by World's Columbian Congress and masmusicians of the present age.

## Music! Good Music! Slathers of It!

Commenting on a recent concert, the Pittsburg Times says:

"It is well known how beautifully the Pianola will render the most difficult piano music, even under the hands of an unskilled and uncultivated person; but Mr. Parkyn's performances showed that there are practically no limitations to the magnificent effects to be produced by the Pianola. In fact, it lends itself immediately and sensibly to the sentiment and skill of the most accomplished and exacting musician." acting musician.
