

SURE TO BE A SUCCESS

ELKS RAISED \$30,000 FOR THE TACOMA CARNIVAL.

Queen Will Be Crowned Wednesday

Afternoon—Band of 40 Pieces Engaged for the Season.

TACOMA, Aug. 10.—The success of every feature of Tacoma's street fair and Elks' carnival is now positively assured. Seldom is it the venture of this kind that success can be assured beforehand in the positive manner in which the Tacoma Elks can talk, but they have raised the money \$30,000 in cash, and every dollar of it has been appropriated for the show. The Elks are not expecting to make a pot of money out of the venture, but they do expect to make a dollar, but they will give the people a whole lot for their money, and take pride in showing what Tacoma can do. That will be satisfaction enough for them.

Coronation day will be on Wednesday next. At 2 o'clock in the afternoon Miss Edith Rowe, the popular young woman recently elected queen of the carnival, will be crowned with appropriate ceremonies.

The carnival enclosure has been completed and nearly all of the buildings are ready for their occupants. The imposing main entrance, that is bound to prove the greatest feature of the show, it will not be ready to be turned over to the Elks until Monday night. The great G. A. R. band of 40 pieces leaves St. Paul tonight, and will arrive here Tuesday night. This band alone cost the Elks \$700 to bring out here. The midway shows will be here in time for the opening, and with the music and now going on in the interior of the grounds it is safe to say that every one of the commercial exhibits will be ready, and this will be a splendid feature of the fair. A hundred entries have been received for the baby show August 22, including three pairs of twins and one set of triplets.

A first-class hotel man has been engaged by the Elks to superintend the work of directing visitors to lodgings and quarters, where they may remain during the carnival, or for a night or two.

STATE MUST PAY WATER RENT.

Agreement With Flouring Mill for Use of Mill Creek Water.

SALEM, Or., Aug. 10.—The State Board of Capitol Building Commissioners has made an agreement with the Salem Flouring Mill Company by which the state will be permitted to continue using water from Mill Creek until the litigation now pending has been terminated or until some other source of water supply has been found. The state will pay \$200 per year for such water as is needed for the penitentiary, asylum and Capitol.

It will be remembered that the Salem Flouring Mill Company brought a suit to enjoin the state from using water from Mill Creek, and a permanent injunction was granted in favor of the company last winter. An appeal was taken to the Supreme Court, and in the meantime the state went on using water. Recently the flouring mill company notified the state officials that they must either obey the court's injunction or pay for the water, and the latter course was chosen. As the penitentiary and asylum depend for their water supply upon the pump drawing water from Mill Creek, the Capitol Building Commissioners could not do otherwise than make terms with the company. The agreement reached also contains a provision that the state shall continue to pay for the water until the litigation is terminated. The state shall continue to pay for the water until the litigation is terminated. The state shall continue to pay for the water until the litigation is terminated.

Federal Building Construction.

Major C. F. Cramer, superintendent of construction of the new federal building in this city, says that the great steel strike in the East will not delay work on the building. The steel work had been shipped from the mills before the difficulty began, and is now on the road. The steel was lost for several days, but was found sidetracked between Pittsburg and Joliet, and was started on its way again. The contractor says that the walls are going on steadily, but an increased force of men will be needed to complete the building within the contract time. A contract for the woodwork has been let to John Stout, a Salem manufacturer.

Extension of State Sewer.

Alonso Gesner, the engineer employed to prepare plans and specifications for the extension of the state sewer, laid his plans before the Board of Capitol Building Commissioners today. From these plans it is learned that the extension will be 642 feet long, beginning on Center street just north of the Capitol and extending westward. The sewer will be of brick laid in cement mortar, the brick to be furnished by the state. A cross-section of the sewer shows it to be egg-shaped, the point of the egg downward. The dimensions will be either 20x30 inches or 24x36 inches. The walls will be 4 1/2 inches thick. The contractors will furnish all labor and materials except brick, and all work must be done to the satisfaction of the engineer. Monthly payments will be made for work completed, upon proof that materials and labor have been paid for by the contractor. Fifteen per cent of the amount due will be retained until the work is finally completed. Work will be commenced during the next week, and must be completed as soon as possible, and not later than October 1, 1902. The appropriation for this work is \$17,500.

Militia List Made by State Census.

Secretary of State Dumbar calls attention to one feature of the new census law that will be appreciated by County Assessors. That is the repeal of the old law requiring that assessors compile every two years a list of men liable for military duty. One Assessor has complied and forwarded such a list, but the work was unnecessary, for under the law passed by the last Legislature the military list will be made in connection with the state census to be taken in 1906.

Suit for an Accounting.

D. B. Steeves, Lydia Steeves and Charles C. Cragg today began a suit in the Circuit Court against Willis E. Brea, a corporation, and Eugene Willis, Lydia M. Willis, Percy Willis and Ida Willis for an accounting regarding the monetary affairs of the firm of Brea, Steeves and Willis. The plaintiff alleges that the capital stock of the company was \$25,000, of which the plaintiffs owned \$100,000. They allege that they have been denied their shares of the profits, and that the property of the firm was sold and they were not given any of the proceeds, and that they have had no voice in stockholders' meetings.

FIRE AT ARMSTRONG, B. C.

Large Part of Business Section Consumed—Loss \$30,000.

VANCOUVER, B. C., Aug. 10.—A large part of the business section of Armstrong, B. C., was burned today. The total loss is \$30,000 and the insurance \$22,000. The origin of the fire was incendiary. A half-witted man named Eagles having started the blaze with the aid of coal oil. Eagles confessed his guilt, was arrested, and is now in jail.

The stores burned were those of Wood, Cargill & Co., general merchandise, where the fire started; Hardy, Wright & Co., general store; Burns & Burns, druggists; Francis Implement store; three warehouses, several small shops, the Masonic Temple, Odd Fellows' Hall and three

WILL REPORT AT SEATTLE.

Enlisted Men of Signal Corps Assigned to Duty in Alaska.

WASHINGTON, Aug. 10.—The following named enlisted men of the Signal Corps, now at different stations throughout the country, have been ordered to assemble at Seattle for assignment to duty in Alaska under Lieutenant William Mitchell:

First-class Sergeant Max Pollner, San Francisco, Cal.; Sergeant Jacob Piotrowski and Corporal Glenn A. Trowbridge, Governors Island, New York; Corporal Robert Loggry and Robert G. Hart, both at Fort Huachuca, Ariz.; Joseph F. Helvenston, Richard Henry, Clara T. Shearer, second-class Privates James L. Brown, Conrad Marshall and John T. McAniff, Signal Corps post, Fort Meyer, Va.; Corporal Mace L. Williamson, Fort Sheridan, Illinois; Private Emil Gieske, Fort Ringgold, Texas; First-class Private Hampton Green, Columbus Barracks, Ohio; Second-class Private William C. Dougherty, Fort McDowell, California.

MURDER IS SUSPECTED.

Maine Man Found Shot to Death Near Port Angeles, Wash.

SEATTLE, Aug. 10.—A special from Port Angeles, Wash., says: G. Link, who registered at the City Hotel Sunday, from Victoria, was found dead today on the beach at the mouth of Sieber's Creek, eight miles east of Port Angeles, with bullet holes in the temple and over the heart. He had a revolver clenched in his right hand, one chamber of which was empty. Only one exploded shell caused suspicion of murder. He was known to have plenty of money, both in gold and bills, but only half a dollar was found on his person. He sent a package by express to C. R. Linde, of Chicago, Thursday. His home was at Augusta, Me. His watch, pocket-book and papers were not found. The coroner's jury returned a finding of killed by an unknown person.

MILES WILL VISIT THE WEST.

Inspection of Defenses, Especially New Coast Guns.

WASHINGTON, Aug. 10.—In about a month Lieutenant-General Miles, commanding the Army, will make a tour of the Western States to inspect the most important military posts. He expects to spend some time on the Pacific Coast, particularly at the defenses at the mouth of the Columbia River, and at Puget Sound. General Miles is deeply interested in the workings of the new sea coast artillery and will give special attention to the growth of aerial warfare, which are now equipped with as large forces as the barracks will accommodate.

CONSIDINE'S TRIAL SET.

Slayer of Chief Meredith Will Be Tried September 30.

SEATTLE, Aug. 10.—John and Tom Conidine, charged with the murder of Police Meredith, were arraigned this morning before Judge Emory, of the Superior Court, and both having pleaded not guilty, the trial was set for September 16. The prosecution rests upon the testimony of ex-congressman James Hamilton Lewis, the Conidines' chief counsel, Lewis wishes to go East, but Prosecuting Attorney Fulton says that it is impossible for him to hold his witness within the boundaries of the state much longer.

Walla Walla Wheat Harvest.

WALLA WALLA, Aug. 10.—Occasionally a farmer comes in from the harvest field and, before returning, answers a question about the crop. The universal reply is, "Better than I expected." Pressed for details Brewster Ferrel, who is harvesting over 600 acres of club, said, "It is going from 50 to 55 bushels per acre." Tom Gilkinson cut 100 acres, which gave an average of 57 bushels per acre. Frank Smith had a 100-acre field of wheat that gave 61 bushels per acre. Tom Cooper cut 200 acres that gave him an average of 58 bushels per acre. Such reports are common and none of them are disputed. Most of this land has produced a crop of about the same amount for other years for over 40 years. None of the land ever receives any other fertilizer than summer fallow. Not one of the farmers ever hauls a load of manure on his wheat fields. He gives his fields an absolute rest every other year, plows deep, harrows often and kills the weeds as they appear. All success in the Fall experience having proved that a spring crop is never as good as a Fall crop.

Concert at Vancouver.

VANCOUVER, Wash., Aug. 10.—A very enjoyable concert was given at the opera house yesterday evening, under the auspices of the Ladies' Society of the Methodist church. Prominent on the programme, which consisted of vocal and instrumental music by local talent, were the vocal solo, "Ave Maria," by Miss Taylor. Several fine violin selections, including "Hungarian Air," by Naches, and "Cavatina," by Foster, performed by Mr. Reginald Hadden, of Fort Vancouver. Vocal duets by Miss Taylor and Miss Eva Taylor; recitations by Miss Linnie Nordstrom and Master Charles Stanton, and a variety of other selections. The original rag-time by Mr. Fred H. Gilbert. The programme was highly appreciated by the large audience.

Oregon City Notes.

OREGON CITY, Or., Aug. 10.—The various volunteer fire companies in the city are discussing a plan of holding a firemen's tournament at an early date. Some of the companies are already making plans to state affairs, while others favor making the affair purely a local event. The County Board of Commissioners has authorized the vessel according to medical and surgical treatment of the county prisoners and paupers for the period of one year at the lump sum of \$15. This contract includes the medicines used. Another bid was \$13.25. A yellow yucca plant growing in the yard of Mrs. K. L. Newton, on J. Q. Ryan street, is 7 feet high and 10 inches in diameter. It is now in full bloom, and is the largest plant yet reported in Oregon.

Engineer Was to Blame.

SEATTLE, Aug. 10.—All blame for the collapse of the new bridge over the Columbia transport Seward, Captain J. C. Downing, resulting in her having to be towed from Nome to this port by the Warren, attached to Dr. W. Dickhoff, chief engineer of the vessel, according to a decision promulgated today by Captain Bryant and Engineer Cherry, constituting the local board of inspectors of United States marine hulls and boilers. Suspension for 60 days is the punishment prescribed by the board.

Nordstrom Declared Sane.

SEATTLE, Aug. 10.—At the instance of Prosecuting Attorney Fulton, two medical experts examined into the mental condition of Charles W. Nordstrom, the King County murderer, who is sentenced to hang August 22. In a report filed today they declared Nordstrom sane. Nordstrom's friends and counsel are disappointed at the finding, and on Monday morning will ask Judge Emory, of the Superior Court, to name another committee of experts to conduct an examination.

FRUITMEN AT NEWBERG.

MID-SUMMER MEETING OF THE HORTICULTURAL SOCIETY.

Great Stress Laid Upon the Necessity for Scientific Education and Close Organization.

NEWBERG, Or., Aug. 10.—For the third time the Oregon State Horticultural Society is holding its annual mid-summer meeting at Newberg, which, fact as its president, Dr. Cardwell, said last evening, attests the society's appreciation of the efficient service rendered by horticulturists, and the pleasure and profit derived from the meetings held here. Several horticulturists from other parts of the state are attending, and other speakers are H. E. Smith, of Hood River; Dr. James Withycombe and Professors Lake, Cordley and Kniely, of Corvallis; Horticultural Commissioner W. K. Newell, Ellroy E. Hoffer, and Dr. R. R. Cardwell, of Portland. The first session of the meeting was held last evening in Crater's Hall, the attendance being large and favorable to an interesting meeting. On behalf of the citizens of Newberg Professor J. C. Hodson extended the visitors a hearty word of welcome, at the same time giving the audience something to think about. He welcomed the visitors as men who are thinking, knowing and doing, and who, in a meeting of this nature, always give to their hearers more than they take away. This is primarily an age of diffusion of ideas. Man lives not to himself alone, but as he receives he also gives. Ideas and methods are put into practice, and these conferences of fruitgrowers conduce to the necessary interchange of ideas. The great demand now is for the highest quality of fruit. Competition is drawing the lines closer all the while, the man who is not keeping step with new conditions is left behind. These meetings help bring to the fruitgrower four requisites for his success—faith, enthusiasm, judgment and knowledge.

The president of the society, Dr. J. R. Cardwell, of Portland, responded, expressing gratification at the hearty welcome received at the hands of Newberg people. He paid a tribute to the evidence of substantial material progress in the fruit and country since the holding of the last meeting here, also speaking in the highest terms of Newberg fruit, which brings the best prices for the produce of the state. He referred to the attention which Oregon fruit is receiving at the Buffalo Exposition, and earnestly pleaded with fruitgrowers to help make use of every opportunity for advertising our horticultural resources, by forwarding from time to time samples of Oregon fruit to Commissioner Doxey, who is doing so much for the growth of our industry. Dr. Cardwell reviewed comprehensively the vicissitudes of the early and experimental stages in Oregon horticulture, and traced the growth of our industry to the organization of the State Horticultural Society. The new problems of competition and overproduction were especially spoken of as now being before Oregon fruitgrowers as the great problems to be solved.

Hon. E. L. Smith, of Hood River, familiarly known as "Hood River Smith," president of the society, responded, in depth, talked inspiringly upon the subject of "Qualification and Organization." His thoughts were pungently expressed, and his address heartily received. He deplored the changed conditions of horticulture, and dwelt strongly upon the need of live, highly educated fruitgrowers and agriculturists, who can keep pace with new conditions. Horticulture has become a scientific pursuit. Mr. Smith spoke aggressively of the necessity of "the scientific education of the sons and daughters of the citizenry of the soil." Too many of the farmer boys, in his estimation, are making of themselves mediocre professional men, when they might have been happy and successful as fellow men better in some rural calling. He pleaded for an awakening on the subject of agricultural training, and hoped to see the day when our agricultural schools are devoted to agriculture only, will be controlled by intelligent farmers and horticulturists, when every officer from president down will be permitted to select his idea that "agriculture, the noblest of all callings, and that upon its broad base rests every useful science known to man." As to organization, the speaker stated that it was now more a matter of fact and not of choice. This is the day in which corporations and not individuals are the fruitgrowers of the world, and the fruitgrowers of the world must organize themselves into co-operative fruit unions, which help to educate their members in better methods in every department of their business, and consequently promote intelligence and bring them to more unite and harmonious relations.

In conclusion, "we need an extension board to capture new markets. We must revolutionize many of our former methods, cultivate the highest standards of excellence, through qualification and organization." The gavel used by Dr. Cardwell has an interesting history. It is made from the planks of a cherry tree brought across the plains in 1847 by Helena Lovell, and which, planted near Milwaukie, bore the first cultivated cherries west of the Rocky Mountains. At least so claims the veteran horticulturist, Dr. Cardwell, who presented the gavel to the Oregon Horticultural Society, and who has owned the tree for 40 years. The tree is a Royal Anne, and Dr. Cardwell says he learned that the first cherry which the tree bore brought \$1 a pound.

TACOMA ELK CARIVAL.

Great Preparations for Entertainment of Visitors.

TACOMA, Aug. 10.—Next Wednesday the Tacoma Elks' Carnival will throw open its gates to the public for 10 days of fun and profit. The magnificent main entrance on Twelfth street will be a sight to behold. Its imposing outlines command admiration and draw expressions of astonishment from strangers. Work is being done rapidly, and the completion. The German village, now in the opening day, and hundreds of merchants are now employed in the work of arranging their stands in the commercial department of the carnival. Work on the Woman's building is all but complete. Nothing will be wanting for the success of the carnival when coronation day shall have arrived.

Pocket-Hunters Rewarded.

GRANT'S PASS, Aug. 10.—Davis and Chambers lately made a rich pocket strike in the Althouse district. They struck a trace on the same rich gulch and found a pocket of Gold. Frank Panning about, the prospectors got on the track of the treasure and located it up on the mountain side. It was not, certainly, a very large pocket, but the nuggets were well paid for their work. The nuggets and coarse gold were baggies, being very bright and pure.

Information Wanted.

Tillamook Headlight. We can stand a good many things, but when people in the East want to know if we are civilized in Tillamook County we will like exposing their ignorance. Out of several questions sent us to answer this week, this is one: "Are the people law-abiding citizens, or are there, as in some mining districts, lawless people who commit many acts of violence not known in older settled places?" The fact is that the county jail in Tillamook has been almost tenantless the past three years is sufficient reason to ask our correspondent in Chaplin County, Connecticut, if they have such a record as that there.

Building at Mount Angel.

MOUNT ANGEL, Aug. 10.—Work on the new Benedictine monastery is being

Neglected colds always lead to something serious.

They run into chronic bronchitis, pneumonia, asthma, or consumption. Don't wait. Take Ayer's Cherry Peppermint and stop your cough.

J. C. AYER CO., Lowell, Mass.

that 40 per cent of the water should run down Yellow Hawk and the rest down Mill Creek. Nature has frequently taken a severe hand in the distribution of the water, and during late summer weeks of man, sent most of it down Yellow Hawk, or so reduced the amount that flowed in it as to make it necessary to clean out the different channels. Last winter most of the water went down Yellow Hawk, doing damage to gardens, orchards and fields. The channels were fixed up and now less than 40 per cent flows between its banks. A much negotiation between the different interests on the two creeks, including the City Council and the County Commissioners, an engineer was employed who recommended that a weir be built at the parting of the waters, and estimated the cost at \$1500. The City Council agreed to pay \$750 of the cost, the County Commission \$750, the Electric Light Company, \$75, the remaining \$75 to be paid by the Dement Mining Company, and the owners of irrigated lands on the two creeks. The plan for which they are now tried out a great source of trouble, annoyance and expense will be removed.

Milton Paragraphs.

MILTON, Aug. 10.—The wheat yield of this vicinity is an surprise. The grain is nearly all No. 1 in quality, and the average of bushels per acre will be very close to 37. Harvest has been plentiful, and there are no idle men on the streets, which fact may be partially accounted for by the absence of saimons. Milton has been a dry year for many years, and will probably remain so, as the sentiment is strongly against the liquor traffic. There are two drug stores, but the wink doesn't go in either.

The people of Milton are divided in their opinion as to the probable effect upon their city of the building of the proposed electric road to Walla Walla. The majority think such a road would be detrimental to the business interests of the town, but a close call, but the average citizen. Some are of the opinion that the road would bring the business people of Walla Walla to Milton to live, while others think that Walla Walla is yet too small to need suburbs. O. R. Ballou, the promoter of the line, is a wealthy fruit raiser of the Walla Walla Valley, and is prominent in every matter pertaining to the welfare of Milton.

La Grande-Cove Trolley Line.

LA GRANDE, Aug. 10.—A company was formed yesterday with 15 of the best business men of the county as incorporators, for the purpose of doing preliminary work on an electric road connecting La Grande with the town of Cove, 16 miles away on the eastern side of the Grand Ronde Valley, at the base of Mount Adams.

All the objections that might militate against the project of the project have been thoroughly canvassed, and there seems to be no sufficient reason why the road will not succeed from the first. The road will be very profitable to the country between here and Cove as well as level as a floor, and the power necessary to operate the rolling stock can be secured from the water power of the county, or at least five cubic feet. The flow is rapid, the fall being between 400 and 500 feet to the mile. By utilizing about two miles of the stream above the transverse dam, the project can be secured to operate all the rolling stock the road would need in any reasonable length of time. By the same power electric lights and street cars can be supplied. The contract for supplies has not yet been awarded.

Northwest Postoffice.

WASHINGTON, Aug. 10.—On August 10 the postoffice at Grande, Wheeler County, will be discontinued, mail going to Mitchell. A postoffice has been established at Regina, Idaho County, Idaho, with Richard L. Higgins postmaster. A postoffice has been established at Holdman, Umatilla County, Or., to be supplied by special service from Prineville, and Eliza J. Smith has been appointed postmaster.

Big Gold Brick Mislaid.

SEATTLE, Aug. 10.—A telegram received today by Captain James Carroll from the Apollo Mining Company, of San Francisco, states that a gold brick valued at \$20,000, which was shipped from Unga, Alaska, via the steamer Newport, about July 20, has not arrived in that city. The contract should have reached San Francisco several days ago.

Robbed Adopted Mother and Left.

GOLD HILL, Aug. 10.—Rosa Taylor, a 15-year-old girl, ran away yesterday from her adopted mother, taking with her a quantity of wearing apparel, including a \$40 silk dress pattern belonging to her benefactor, and appropriated a railway ticket which had been sent here for the use of her brother. Steps were taken to locate her.

WARM WEATHER BREAKFASTS GRAPE-NUTS

Require no cooking. EASY FOR THE COOK. As the warm days approach it is well to give some thought to an easy way to prepare breakfast. A food that is already cooked and simply needs to be treated with a little cold milk or cold cream, is ideal on that point, and such a food can be found in Grape-Nuts, at 15 cents per package. It is sold by all grocers, and is so highly concentrated that not more than three or four teaspoonfuls are required for the food very economical and does not over-tax the stomach with a great volume.

SLAUGHTER OF MEN'S SUITS

To close out balance of stock on hand prior to the arrival of our Fall stock, we have placed the entire SUMMER STOCK on our bargain tables. Prices cut almost in two, so anyone can afford to purchase a suit now.

Every \$15, \$18 MEN'S SUMMER SUIT in the house has been bunched in one lot and marked down to \$9.85

Every \$20 MEN'S SUMMER SUIT in the house marked down to \$13.50

As fiction is never admitted into our ads, the public will appreciate the great slaughter now taking place. All sizes in stock today.

RELIABLE CLOTHING Ben Seising S. E. cor. Fourth and Morrison Sts.

pushed rapidly, and in all probability the building will be ready for occupancy within eight or ten months. The latest enterprise of the Benedictine Fathers in this country is the proposed building of a new college, plans for which are now being drawn by Joseph Jacobberger, of Portland. The proposed institution will be of gray stone, and will add to the monastery now being finished. It will provide for nearly 200 students.

Items From Centralia.

CENTRALIA, Wash., Aug. 10.—Yesterday was a great relief from the recent heat which this locality has been experiencing. The temperature is now much cooler with good indications of rain. Several formidable forest fires have been in progress around here for the past week, but all are now under control. Some of the large fires were for a time threatened, but little or no damage was done. During the first of the week the fire department was called to the Saker Valley Mill, south of town, to fight off the too near approach of the forest fire. The Centralia Lumber Company's plant also had a close call, but the fire was checked without damage.

The work of improving and enlarging the Centralia Opera House is being rapidly pushed to completion and the building will soon be ready for use. When completed it will be one of the largest and best equipped opera houses outside of Seattle, Portland or Tacoma. The Centralia School Board last night made a special levy of 5 mills on School District No. 9, to raise the required money to pay for erecting the additional school buildings and to purchase needed supplies. The contract for supplies has not yet been awarded.

Will Ask for Postal Routes.

HILLSBORO, Aug. 10.—Congressman T. H. Tongue states that Washington and Tillamook Counties will each in the near future forward petitions to Washington asking for the establishment of postal routes. Hillsboro will ask for two leading out from the county seat, and Tillamook, the county seat of Tillamook County, will ask for two routes leading into the most populous sections. Mr. Tongue states that of the 25 routes established in the state, 20 are located in this Congressional district.

Will Buy Light and Water Bonds.

HILLSBORO, Aug. 10.—J. W. Shute, the local banker, will buy the \$25,000 city bonds to be floated for the purpose of paying for the newly purchased water plant. A bond attorney for Wells-Fargo will pass on the charter next week, and as soon as he approves the ordinance for floating the bonds, the money will be ready. The city will receive the system about September 1. Mayor Bailey will have to attach his signature some 500 times in signing the bonds and coupons.

Science Healer Found Guilty.

SPOKANE, Aug. 10.—After a trial lasting over two days, Mrs. J. G. Davis, Christian Science healer, was found guilty today of failure to report a case of scarlet fever, as required by law, and was given a minimum fine of \$100. Police Judge Kennan ruled that she was trying to heal the sick like any other physician and was subject to all penalties, and that ignorance that it was scarlet fever was no excuse. Christian Scientists declare they will carry the case to the highest court in the state rather than accept the decision.

Idaho Notes.

The town of Harrison experienced the heaviest wind storm in its history Friday. The storm came up suddenly and blew a hurricane, damaging buildings and breaking log booms. Leonard, the water-works man, lost a lot of pipe which he had on a raft preparing to lay in the lake; the Light plant, a bond attorney for Wells-Fargo will pass on the charter next week, and as soon as he approves the ordinance for floating the bonds, the money will be ready. The city will receive the system about September 1. Mayor Bailey will have to attach his signature some 500 times in signing the bonds and coupons.

There are now 20 six-horse teams engaged in hauling ore from the Peacock mine to the railway at Council. It is the intention of the company to put on 30 more as rapidly as they can be secured. The 30 teams bring in about 40 tons of ore daily. It takes from four to five days to make the round trip, and each team hauls from five to seven tons. The purpose of the company is to get a large accumulation of ore at the railway prior to the starting of the Welser smelter. This will insure it against a shut-down in the event that his road runs hauling more difficult. The smelter will start in the Fall.

YOUNG MEN MEN MADE STRONG

Consult This Old Doctor—Thirty Years Curing Men. who are suffering from the effects of youthful errors among others showing some of the following symptoms: Nervous and Physical Debility, Varicocele, Losses, Exhausted Vitality, Confusion of Ideas, Dull and Loss of Brilliance of the Eye, Aversion to Society, Despondency, Impiles on the Face, Lony of Energy and Frequency of Urinating. Method Treatment. You may be in ALWAYS GUARANTEED OUR "NEW METHOD TREATMENT" cure is Many a bright and naturally gifted young man, endowed with genius, has permitted his case to run on and on, until remorse racked his intellect, and finally claimed its victim. Remember that "PROCRUSTINATION IS THE THIEF OF TIME." The asylum awaits you.

MIDDLE-AGED MEN married or single, who are prematurely old as a result of excesses or youthful follies, and who are troubled by too frequent evacuations of the bladder, often accompanied by a slight smarting or burning sensation, deposits of gritty sediment in the urine, and sometimes small particles of albumen, the color first of a thin or milky hue and again changing to a dark and torpid appearance, causing nervous debility and loss of vitality. Remember, this is the second stage of LOST VITALITY. In all such cases a perfect cure that remains cured is guaranteed. Consultation at office or by mail free and invited.
