

COMMERCIAL AND FINANCIAL NEWS

The local market situation yesterday was devoid of special interest. The stock of produce cleaned up better than expected, considering the heavy receipts at the close of the week, and prices on the whole were well maintained. In groceries, the expected decline in sugar and hold city is still pending, and buyers are holding out accordingly. The offerings of potatoes are moving freely with considerable firmness in prices. The offerings of potatoes were much larger than usual for Saturday, and prices are not very firm at \$1 per cent for the average run of offerings. The first week of October has been marked by an excellent trade with the country, and the demand for seasonal goods is much greater than on a corresponding date a year ago.

The hop trade, which has been rather slow in gaining headway, showed a little more life during the week, and the first large sale of the season was reported Thursday, a lot of 175 bales changing hands at 30 cents per pound, which is about the top market at present. A number of smaller lots were also sold and there has been more inquiry about prices during the past two days than at any previous period this season. Among the grain markets, wheat continues to drag, but there is some activity in oats, and barley is steady. The Government is quite a factor in the oats market on the Coast this season, and dealers west of the Rocky Mountains have a decided advantage over the East. Last year oats could be bought in the East and delivered at tide water on the Pacific for about the same figure that was paid Coast growers. This year, the cereal is nearly as high in the East as it is on the Pacific Coast, and there will be no shipping advantage to the continent. Pork and veal are easy, and poultry is decidedly weak, the opening of the game season affecting the market for chickens quite materially.

WHEAT.—The market made a pause in its downward career yesterday. The East recovered an eighth of a cent, which is almost a startling gain in these days of inactivity and dullness. Portland exporters got rid of half a dozen of the ships in the harbor during the week, and are not showing any great desire to replace them until the wheat market shows more signs of life than are apparent at the present time. Walls Walla is nominal at about 32½ and 33 cents and there is but little selling. Valley is moving in a small way with the mills purchasing about all that is offered at a premium over export quotations, which are about 32 cents. The market is unchanged, with shipowners holding off in the belief that there will be an improvement later. The inability of exporters to sell cargoes, prevents them taking any more ships for near-by business, and the engagements for more distant loading are not very plentiful. Rates may be quoted nominal at 35 shillings for steamers, and \$6 for sailers. Any advance in the foreign market would be pretty certain to be followed by an advance in freights. The strike situation is easier in San Francisco and ships are moving more freely. The Commercial News of the 3d inst., reports as follows: The speculative movement in the local market is far from heavy. A pronounced reaction in freights has been a necessary result of the strike situation, but since then the price has eased off. Trading in spot goods continues light and the prices unchanged. The export movement during the month has been fairly satisfactory. Twenty grain vessels were cleared, as compared with five in August and six in July. The total amount shipped during the month was 45,125 tons, compared with 31,888 tons in August. The total amount shipped this season is still about 170,000 tons below the amount shipped at the same time last year.
