A Sour Stomach

Is Often the Real Cause of a Sour Temper.

That the condition of the digestive organs has a marked effect upon the character or disposition is a truism as old as the hills.

and it is a fact which none may dispute that a sunny disposition more often results from a healthy digestion than from any other cause.

Acid dyspepsia, commonly called sour stomach or heartburn, is caused by slow digestion of food; instead of being promptly digested and converted into blood, bone and muscle, it lies in the stomach for hours, fermenting and creating noxious gases which cause pressure on the lungs and heart, short breath and general discomfort and irritation.

Laxative medicines only irritate the already irritated stomach and bowels, and have no effect upon actual digestion of food.

The sensible course to follow is to make use of simple natural digestives like Stuart's Dyspepsia Tablets after meals until the stomach has a chance to recuperate.

The natural digestives which every healthy stomach contains are pepsins, lactase and hydrochloric acid, and he expects to see when any of them are lacking the trouble begins.

"From the time I was 27, when I graduated from school with broken health from overwork, until I was 34, I scarcely knew what it was to be free from stomach weakness.

"I had acidity and heartburn nearly every day, and sometimes was alarmed by irregularity and palpitation of the heart, but all this gradually disappeared after I began using Stuart's Dyspepsia Tablets, and I can eat my meals with relish and satisfaction which I had not known since I was a growing boy.

The success and popularity of Stuart's Dyspepsia Tablets is enormous, but it is deserved, and every druggist in the United States, Canada and Great Britain has a word for this meritorious preparation.
