### Dallas Defeats Independence.

INDEPENDENCE, March 1. - Dallas College basket-ball team last night de-feated independence by a score of 13 to 1.

#### THE CALIFORNIA DERBY.

### Won by Sombrero, Corrigan Second, Waterscratch Third.

SAN FRANCISCO March 1 .-- Sombrero ridden by Winnie O'Connor, won the Cali-fornia Derby at Oakland today in a gallop from Corrigan, Waterscratch being a distant third. The event was decided un-der disagreeable conditions. Rain feli heavily all afternoon and the track was a sea of mud. About 2000 people were in attendance. A field of four went to the post, with Sombrero a 9-to-10 favorite and Corrigan a well-played second choice. Waterscratch had some supporters, while Jingler was quoted at 40 to 1. Corrigan set the pace followed by Waterscratch. Before the stretch was reached O'Connor moved up with Sombrero and had no dif-ficulty in taking command, winning by three lengths. Corrigan was 40 lengths in moved up with Sombrero and had no dif-ficulty in taking command, winning by three lengths. Corrigan was 40 lengths in front of Waterscratch. The event was worth \$3000. In addition to taking the Derby G. B. Morris won races with Dori-an and Duckoy. All were ridden by O'Con-por. The books laid 4 to 1 against Dorian. an and Duckoy, All were ridden by O'Con-nor. The books hild 4 to 1 against Dorian, but he outclassed his field and walked home. Owing to his bad showing last

Accordingly, Benton, a fourth-rate county, as respects population and wealth, but the one in which the college is located, supplies much the larger number of students; and, narrowing the question still more, Corvailis, within which the college building stands, furnishes nearly all for which the county is credited. Of the nine graduates, all except one from California are residents of Corvallis. Of the 25 seniors, 11 are from Benton and 10 of these from Corvailis. There are 42 juniors, 18 from Benton and 14 from Corvailis. Of the 16 other countles having students in this class, 8 of them have 2 each and the other 8 one each. The sophomore class numbers 70, 28 of them from Benton and 24, or more than one-third of the whole, from Corvallis. The freshmen number 172; 50 of them are from Benton, and 43 from Corvallis. Subfreshmen number 42, and 6 of them, which is more than any other county furnishes, are from Benton; 4 from Corvallis Special students num. ber 55, 22 of them from Benton, 21 from Corvallis. Summing all the classes, in the aggregate 436, Benton furnishes 143, Corvallis, 136

Other counties represented tail along as follows: Marion, 43; Polk, 22; Multnomah, 21; Linn, 20; Yamhill, 19; Lane, 18; Wash-ington, 15; Ciackamas, 13; Douglas and Wasco, 15 each; Union, 10; Malheur, 1; Lincoln, 6; Harney and Clatsop, 6 each; Gilliam, Crook and Umatilla, 4 each; Wailows and Coos, 3 each; Lake, 2, and Jack-son, 1. The special objects of the stu-dents may be judged by looking over the two most numerous classes. The 71 soph-omores are 'distributed as follows: Mechanical and electrical engineering, 22; pharmacy, 11; agriculture, 11; household science, 27. In the freshman class, numbering 172, the engineers are in the lead again, numbering 52; pharmacy, 26;

household science, 48; agriculture, 38, The name Agricultural College is miseading and causes some critically disposed persons to grumble because all the male students are not farmers, and the females intending to be farmers' wives; but the so that students from a distance may be college, when directed to its true purpose, is something more than a school of agri-

culture; it is, in fact, a modified polytech-nic school, and will show in its annual catalogue such ratios of employment as correspond to the wants of society. That is, if mechanical and electrical engineering pay young men better than farming, they will take that kind of college course irrespective of the criticisms of outsiders. the wishes of college faculties or the resolutions of regret.

Formerly the Oregon Agricultural Col-lege was apeing, though very impotently, a classical institution, and therefore afforded but poor opportunities for young people desiring to be proficient in agriculture, mechanics or related employments; but it is proper to say that the college has got out of the old rut, and is giving gen-eral satisfaction, except as to the disproportionate representation of the counties therein. How that disproportion can be remedied or whether it is practicable to do so, is yet to be determined. But we have often heard that "where there is a will there is a way," and there should be a will to remedy admitted defects.

The appropriations have been regularly made, but the Legislators from the coun-Lins To little or no direct b

put on an equal footing with the residents of Corvallis. It may be said that such an appropriation would be special legislation, or

constitutional, objections which are often urged by those who are not beneficiaries, but if the school is to be supported at all by state aid, then an appropriation which would give all the inhabitants of the state an equal opportunity to its benefits, cannot be far from right. T. W. DAVENPORT.

### Cities in Russia. Boston Herald.

It is estimated that the population of the Russian Empire is now about 130,-000,000, while that of our own country is only about 78,000,000. In Russia the people are scattered over 8,660,355 square miles, while in the United States our population is contained in 3.602,960 square square miles. The greater density of the pop-ulation of the United States, in compar-ison with Russia, is also brought out by the number of cities with over 59,000 inhabitants in the two countries. Ac-cording to the figures of the last cen-sus, there were 54 cities in the Russian

Empire that had a population of over 50,000, while in the United States there

States, running from Lowell to Port-land, while there are 35 cities in Russia deaf and dumb. that come into this class. Thus, al-though our population is quite a little smaller than that of Russia, we have Prairie Fire in Oklahoma. GUTHRIE, O.
