Greater Water System for City.

THE DALLES, Or., March 29.-At a neeting of the City Water Commission meeting of the City Water Commission last night, authority was granted Engineer W. A. Under the present system, water in the city reservoir reaches a low store in August and Sentember the a low stage in August and September, the supply becoming inadequate under the increased demand for irrigation throughout the city. Mr. Roberts is now figuring upon the feasibility of boring for artesian water, which has been readily obtained at a depth of 160 to 110 feet in various localities about town, and transmitting the same to the city reservoir by means of a pumping system. With a view of too great expense being incurred on these lines, a survey and plan for enlarging the pipes now in use from Mill Creek will, also be submitted.
