## RUM IS THEIR ISSUE

### Prohibitionists Name City and County Ticket.

## STRONG RESOLUTIONS PASSED

### Harmony Prevails at the Convention, the Slate Meets No Opposition, and All Ammunition Is Directed Against the Enemy.

Yesterday was Prohibition day, and citizens of Portland and Multnomah County who believe in the suppression of the rum traffic assembled in the A. O. U. W.

the Prohibition party, the only party whose platform presents a moral issue. A man of high character, as a candidate of a saloon-controlled party, does not mark the moral level of that party; neither will he control its policy. Its level is marked and its policy will be dictated by the most corrupt vote in the party necessary to its success.

The convention then adjourned, to resume its labors at 8:30 P. M.

**Slate Goes Through.**

The evening session found all of the delegates in their accustomed places, with no bolts or humble protests from down-trodden minorities. The nominating committee had prepared its recommendations, which were adopted and made the duly authorized and empowered candidates of the Prohibition party, in and for the City of Portland and County of Multnomah for the June election of 1902. Nominations for a number of city and county offices were not made, and the central committee, consisting of B. Lee Paget, F. L. Posson and J. E. Knox was authorized to fill all vacancies and to increase its membership to any number deemed advisable.

The ticket was not nominated as a whole, but each name was read off by the chairman and seconded by Dr. J. H. Amos, until the whole list was completed. When the nomination for Mayor was

## GREAT RUN OF SMELT IN THE SANDY. FISHING SCENE AT THE RIVER BANKS.

During the last few days the Sandy River has contained the greatest run of smelt that has been seen there in seven years. On Thursday morning people came in large numbers from Fairview, Troutdale and Portland, in carriages, lumber wagons and vehicles of every description, and bringing fishing tackle of various original kinds, from the bird-cage on a stick, with which one woman scooped up the smelt, to the regulation fish net.

A stranger passing the lower Troutdale bridge would have wondered if there were not a camping meet in progress, for all around the locality were hitched the teams and wagons of the people who had brought their lunches, prepared to spend the day in the enjoyment of the unusual sport.

There seemed to be no limit to the number, or, rather, the amount, of fish any one could catch, for the fish were there to be dipped up as long as the fishers had anything to carry them in. Those who had buggies had all they could stow away, and the farmers who came in big wagons had all the way from two to 10 gunny sacks full. There were tons of fish taken during the day, great quantities of which will be thrifflly pickled, salted and smoked, and a Troutdale butcher ruefully remarked that "gilded his business would be likely to suffer for quite a while."

This last run of fish has been exceptionally large, but it is stated that there have been seasons when no nets were necessary, and the farmers drove down to the river, backed the wagons into the water and scooped up the fish with ordinary shovels.

## MARCONI'S BOYCOTT

### His Stations Will Not Communicate With Others.

## AS A MATTER OF PROTECTION

### German Proposal for an International Convention to Regulate Wireless Telegraphy and Prevent a Monopoly.

NEW YORK, March 29.—Signor Marconi tonight issued a statement relative to the controversy between his wireless telegraph company and Dr. Slaby and Count

## RUSSIA WANTS THIBET.

### Compensation for the Loss of the Manchurian Provinces.

PEKIN, March 29.—The Russians are not pressing the proposition to give the Russo-Chinese Bank exclusive mining and other rights in Manchuria, so the powers are not likely to oppose the signing of the Manchurian treaty, as was practically agreed upon between Paul Lesser, the Russian Minister here, and Prince Ching, president of the Chinese Foreign Office. The signing of the treaty probably will be attached in a few days.

## CUBAN POSTAL SERVICE.

### First Steps Toward the Withdrawal of the United States.

WASHINGTON, March 29.—Action looking to the relinquishment of the United States postal regime over the Island of Cuba was taken today, when appointments were made to fill the two most important posts in the Cuban postal service. Charles Hernandez was appointed Assistant Director-General of Posts in Cuba, and on the withdrawal of the United States from that island will assume full charge of the Cuban postal service. At the same time, Jose Alvarez was appointed Postmaster of Havana. The changes will become effective April 1. The Assistant Director-Generalship of Posts is thus created to enable the coming head of the service to become thoroughly familiar and equipped with the duties of his new post before the time comes to take complete charge. The same object applies to the appointment of the Postmaster of the Cuban capital. Both changes are promotions, and both men are Cubans. Hernandez is at present Postmaster at Havana, while Alvarez is Postmaster at Cienfuegos.

## WIRELESS SYSTEM IN THE WEST.

### General Hale's Instruments to Be Used on the Coast.

DENVER, March 29.—The News today says: "Within the next 60 days citizens of the Pacific Coast will be sending wireless telegraph messages via instruments built in Denver, under the personal supervision of General Irving Hale, consulting electrical engineer of the Pacific & Continental Wireless Telephone & Telegraph Company. The messages will pass between the first two commercial stations established by the company. The instruments to be used are the most powerful ever constructed west of Pittsburgh, containing improvements over those now in use on the Atlantic Coast. They have been tested and worked to entire satisfaction.

## Japanese Diet Closed.

TOKIO, March 16.—The Diet closed today. The budget was passed, besides important national laws, such as the election law, the increase of taxation law, post, telegraph and customs tariff and the Formosa enactments. Among the bills held over are the code revision and religious bills—both of considerable importance. Now that the Diet is closed, it is expected that the House tax question will be taken up by the imperial government and arbitration decided upon.

## Germany Will Profit by Burghers' Rifle Experiences.

BERLIN, March 29.—It is already apparent that the Boers' experience with modern rifles will have a permanent influence upon German military tactics. Emperor Wilhelm, and high military authorities have been closely studying the authentic accounts of Boer battles, which describe whole companies rising and rushing forward to new firing positions, as has hitherto been customary. The Emperor has instituted the practice of only eight or 10 men rising at once and advancing, and has decided also that all topographical features of the field must be fully utilized for the protection of the attackers. As illustrating the importance which the authorities here attach to the military lessons of the Boer War, it may be mentioned that several officers will be sent to appointments to the general staff.

## Germany's Disappointments in Manchuria.

KINGSTON, Jamaica, March 29.—The Colonial Secretary, Joseph Chamberlain, replying to a memorial from the elected members of the Legislature, says that, with all good will toward the people of Jamaica and their representatives, he cannot consent to the new constitution until the existing conditions have been given a fair and adequate trial and by common consent have been found wanting. General disappointment is expressed over Chamberlain's reply.

## Gold on a Battlefield.

BUZACCO, Portugal, March 29.—The historic battlefield here, where the Duke of Wellington (September 27, 1810) repulsed the French Army, commanded by Marshal Massena, has been turned into golf links for the benefit of visitors. The first match took place yesterday.

## LESSON OF BOER WAR

### Germany Will Profit by Burghers' Rifle Experiences.

## VENEZUELA DISPUTE YET OPEN

### Ambassador White Is Yet Undecided Whether to Resign or Serve Out His Full Term.

Semi-official statements made here represent the German Government as fully satisfied with the result of the interviews at Vienna between Count von Bulow and Signor Prinetti, the Italian Minister of Foreign Affairs. In all questions between Germany and Italy were fully discussed. While the negotiations were not finished, it is now regarded here as assured that, through the interview, the renewal of the disbandment will soon be concluded.

## RUSSIA WANTS THIBET.

### Compensation for the Loss of the Manchurian Provinces.

PEKIN, March 29.—The Russians are not pressing the proposition to give the Russo-Chinese Bank exclusive mining and other rights in Manchuria, so the powers are not likely to oppose the signing of the Manchurian treaty, as was practically agreed upon between Paul Lesser, the Russian Minister here, and Prince Ching, president of the Chinese Foreign Office. The signing of the treaty probably will be attached in a few days.
