

On Tuesday afternoon from 3 to 5 o'clock Mrs. W. S. Ladd gave an informal reception to the members of the Woman's North Pacific Board of Missions, which held its annual meeting during the week. Other guests were the delegates to board meeting from this and neighboring states, and a number of visiting home and foreign missionaries who are here on furlough. The missionaries present were: Dr. Maud Allen, from India; Miss Hutch, from Laos; Mrs. Wanner, from China, and Miss Clark, of the Neah Bay Indian Mission. Snowy branches of cherry blossoms, used in great profusion, lent an airy charm to the spacious rooms, with their rich and artistic furnishings. In the dining-room the table decorations were very charming, consisting of exquisite bridesmaid roses. Mrs. Charles Ladd and Miss Henrietta Ladd poured tea and coffee. Mrs. J. Wesley Ladd and Miss May Felling served the salad, and Mrs. Moesman and Mrs. Loring served ice cream. Mrs. Ladd was assisted in receiving by her daughter, Mrs. Helen Ladd Corbett. The afternoon was delightful in every way, but perhaps the chief pleasure it afforded to the many present were the opportunity of meeting the missionary veterans from the front.

One of the most delightful events of the week was a reception given on Tuesday afternoon by Mrs. R. B. Wilson and the Misses Wilson, at their home on Hoyt street. The spacious rooms of their most charming and attractive home were very beautifully and profusely decorated with cherry blossoms, besides quantities of jonquils and daffodils. A quartet of stringed instruments made sweet music above the hum of many voices, and in the dining-room, where the floral decorations were very lovely, tea and coffee were poured by Mrs. W. J. Brown, Mrs. H. L. Mather, Mrs. John Park, and Miss May Felling. The great windows of the dining-room opened directly into a bewildering mass of delicate bloom in the trees of the old garden, making a delightful picture, both indoors and out.

Mrs. Wilson and her daughters were assisted in receiving by Mrs. Gilsan and Miss Conch, while Mrs. E. T. Stevens, Mrs. S. B. Lintburn, Mrs. Holt C. Wilson, Mrs. E. H. Brooke, the Misses Flanders and Miss Lewis, in beautiful gowns, were most gracious in their greetings, and added much to the pleasure of the charming afternoon.

A very pretty wedding took place on Wednesday evening, at 8 o'clock, at the home of Mr. and Mrs. P. L. Willis, on Thurman street, the occasion being the marriage of their daughter, Miss Floy Willis, to Dr. George H. Nottage. The house was very charmingly decorated in green and white, and during the ceremony the bride's party stood under a beautiful bower of Oregon grape and snowy narcissus. The bride wore an exquisite gown of white embroidered grenadine over liberty silk, and carried a bouquet of bride roses. The bridesmaid, Miss Angela Le Grand, wore an exceedingly pretty gown of white organdy, and carried pink roses. The groom was attended by Dr. J. Arch Stewart. After the ceremony, which was performed by Rev. P. S. Knight, of Salem, and which was witnessed only by immediate relatives and friends, a number of congratulatory telegrams were read. Dr. and Mrs. Nottage will be at home at 88 Salmon street after May 1.

"VERY MUCH DELIGHTED."
What a New York Lady Says.
Quite recently a New York lady of refinement and culture, while stopping at the Portland Hotel, availed herself of the opportunity to test the Hamman Baths in the Oregonian building, room 300. She was immediately impressed with the luxurious appointments of these baths, and after taking three treatments, remarked: "I am very much delighted with the effects; why, I had no idea that such a palace for Turkish and Russian baths, devoted exclusively to ladies, would be found this side of the Rockies. I am sure the Portland ladies must appreciate their privileges." Of course they do, the patronage is steadily increasing, and we would advise every lady who is interested in call and inspect the conveniences and comforts provided for them. Hours, 9 A. M. to 9 P. M. Special appointments may be made by telephone North 1888. Remember these baths are wonderful promoters of health, cheerfulness and lengthened life.

NEW ERA IN DENTAL SCIENCE.

Interesting Chat on Progressive Dentistry and the Latest Methods Adopted by Dr. B. E. Wright.

DR. B. E. WRIGHT.

If you want dental work done, and want the best, come and see us. We have all of the latest and most scientific methods known to the profession. We are making a specialty of porcelain work, all-porcelain crowns and bridge work. This is the latest and grandest invention in modern dentistry. Bridge work has been used in a crude form for many years, with many improvements from time to time, but it is only within the past few months that this most important branch in dentistry has been perfected. By our new methods we are now able to produce bridge work without the use of gold, which has always been objectionable to the most refined and cultured people on account of the glare of the yellow metal. For those who object to the appearance of large gold fillings on account of the great contrast between gold and the tooth structure, we are now able to place porcelain fillings, or, more properly speaking, porcelain inlays, so that it is very difficult to detect from the natural tooth structure. This is another wonderful stride in modern dentistry. You have probably heard your dentist say that some day he hoped that there would be some permanent filling material discovered besides gold, on account of the appearance of the yellow metal. We have at last found that material in the porcelain; but, remember, it requires skill to produce satisfactory results.

Another thing which we wish to call special attention to is our new method of doing continuous gum work. You may not understand what continuous gum work is, as it has not been done in Portland to any extent, but if you will ask any respectable dentist about it he will be able to tell you that it is the ideal artificial denture, or set of teeth, though he is not able to produce it, as he does not possess the necessary equipment or skill to do it with; but we have, and will be pleased to have you call and see us, so that we may explain to you the advantages it has over all other materials which are used in the construction of artificial teeth.
