SOLDIERS LEAVE MAY

SEVENTH INFANTRY TO GO FROM VANCOUVER TO PRESIDIO.

Arrangements for the Start Are Being Rapidly Completed - Final Destination Is Philippines.

VANCOUVER BARRACKS, April 26. manding General notified Colonel yesterday that headquarters, band and the two companies of the Seventh stationed here were to hold themselves in readiness to start on May 6 for the camp of instruction at the Presidio, where they will remain until joined by the other two battalions from Alaska and the Philippines. The official order for the move has not been issued yet, but all arrangements for the start re being rapidly completed. The eventh received its first order to leave January 28 for the Philippines, which order was revoked this week. Two companies of the Seventh, F and L, have been stationed at Vancouver Barracks ince July 5, 1879. Headquarters and and arrived May 14, 1901. Second Lieutenant Rinsido R. Wood,

Seventeenth Infantry, has been ordered to Boise Barracks to report for duty pending the arrival of his company from the Philippines.

NO NEW Y. M. C. A. HOME NOW.

Aberdeen Association Will Fix Up Present Rooms in Fine Style.

ABERDEEN, Wash., April 25.-Messra, Burrows, Cleim and Parsons, the committee appointed at a recent meeting of would make their contributions later. It was recommended, however, not to puth the plan of a new building at the present time, owing to other projects now being considered by the people of Aberdeen, but to continue securing subscriptions from time to time until the needed \$5000 is related and to push the work on the new rooms in the Ninemire building, making them among the best equipped associa-tion rooms in the state. To do this propcriy will require about \$2500, including baths and bowling alleys. There is \$1500 now on hand, and the balance practically pledged. It is the intention of the Y. M. C. A. to put in a system of manual train-ing classes and practical studies as soon as possible, and in every way to make association a power for good in this community.

Child of Many Grandparents.

daughter born this week to Mr. and Mrs. E. L. MacLafferty, of this city, is the happy possessor of three great grand-fathers, two grandfathers and two grandmothers. The grandfather and father and mother of the father are living, and both the grandfathers, paternal and maternal, and father and mother of the mother are also living, and all of them reside in Che-halis County, having lived in this neigh-borhood for the past half century. Merborhood for the past half century. ritt Wood, of Satsop, is one of the great grandfathers, R. Redmond, of Melbourne, another, and A. C. MacLafferty, of this city, the third, the grandparents living in Melbourne and Aberdeen.

All of them are claiming the privilege of naming the wee one, and its father says if all the names thus far selected are tacked on to it, the baby will have a string as long as a Continental Princess.

NEW OREGON CORPORATIONS.

Articles Received by Secretary of State During Past Week.

SALEM, April 26 .- Articles of Incorpora tion were filed with the Secretary of itate during the past week as follows: Pacific Advertising Company, Portland, Or : \$20,000; Frank Griffith, Leon Bogy,

William T. Eccles; general advertisin business Spencer Company, Portland, Or.; \$5009; Colia P. Spencer, A. L. Parker, Allen H.

Withers; general merchandisc business, G. H. Dammeler Company, Portian

Eighteenth Illinois Infantry as drum-ma-jor, and was discharged in 1853, having served in the buttles of Fort Henry, Fort CROPS Donelson, Shiloh and at the fall of Cor inth, After his discharge he continued in service of the regiment as corporter until the close of the war. In 1869, Mr. Jeffers removed to Kansas, where he married again, and in 1878 came to The Dalles, where he had since resided. He was a prominent member of James Nesmith Post and for many years has been the Post, and for many years has been the fifer in all parades and exercises. His widow and four children, Mrs. Margaret Gray. Miss Martha Jeffers and a little son and daughter survive him.

Mrs. Ann Bowen, of Baker City.

BAKER CITY, April 20.-Mrs. Ann Bow en, a pioneer of Oregon, died in this city yesterday morning at 9 c'clock, aged 73 years 3 months and 12 days. She had been seriously iil for the past week, and while her condition was known to be se-rious, her death was very sudden, the

immediate cause being heart failure. Mrs. Bowen was the mother of 12 chil-dren, nine of whom are living-Mrs. E. B. Cranston, of Keating, Or.; Mrs. James W. Virtue, of Lejand, Or.; F. A. Bowen, of Spokane, and I. B. Bowen, editor of the Democrat; Edward C. Bowen, H. S. Bow-en, James Clifford Bowen, Miss Estella Bowen and Mrs. Thomas Anderson, ot Baker City. Mrs. Bowen was a devout member of

the Catholic Church, and was very active in the work of church building in this city. 1 -

GOLD ROYALTY REDUCED.

Yukon Mineral Will Pay About One-Half of Present Rate.

VANCOUVER, B. C., April 26 .- The Do inion Government has decided to reduce the royalty on gold mined in the Yukon district. The royalty is now 5 per cent. It mittee appointed at a recent meeting of the business men to avecratin the pub-lic feeling on the crection of a perma-nent home for the Y. M. C. A., reported today that they had secured subscriptions amounting to \$1000, and had received much encouragement from others who office at Vancouver. If it is carried out in accordance with suggestions that have come from the West, The plan suggested, and the one that will in all probability be adopted by the government, is that the 5 per cent will still be collected on gold mined in the North, and the rebate, on production at the Vancouver assay office, will be increased from the present figure to 2½ or 3 per cent. Such an arrange-ment would undoubtedly be of great advantage to the business of the Vancouver assay office, and there is at present sug-gested no good reason why this should

not be arranged by the government. Killed by Explosion of Dynamite. SEATTLE, Wash., April 26 .- Will Price and Bernard Sutter were killed by an explosion of dynamite at Issaquah this af-

ternoon. Sutter's body was blown all to pieces. There was not enough of him left upon which to hold an inquest. All that remained of the once robust miner were a few shreds of ficsh and clothing, which were picked off the surrounding trees and bushes. Price lived about an hour after the accident, but died without regaining consciousness. No one knows just how the explosion occurred. John Coutts, a boy, was standing about 50 feet away from the men, but had his back turned toward them. When the dynamite exploded he was thrown up against the embankment, but was not injured.

Plancer of Washington.

VANCOUVER. Wash., April 26.-Mrs. Mary Buckley, wife of Patrick Buckley, of this city, and a pioneer of Clark County, died at the family home here last night after a lingering illness, aged 74 years. Deceased was a native of Ircland, and came to America in 1849. She was married to Patrick Buckley in Massachusetts in 1856, and in 1558 the couple came to the Pacific Coast. locating shortly after their arrival at Van-couver, where they have since lived almost continuously. Funeral services will be held Monday at St. James' Cathedral.

Prominent Cottage Grove Man. COTTAGE GROVE, Or., April 26.-George W. Dean, a prominent citizen of G. H. Dammeler Company, Portland, Cr.; \$10,000; G. H. Dammeler, Henry this evening, aged 57 years. He was born with its great surplus earnings over exin Indiana, moved to Nebraska when a small boy, and from there to the Black Hills, Dakota, where he resided until he came to Orogon, in 1885, where he had since resided. His wife and three children survive him-a son and daughter in Da-kota, and Mrs. Leroy, at this place.

GREAT IMPORTANCE ATTACHED TO GRAIN PROSPECTS.

CONTROL STOCKS

Strong Speculative Forces Still Ac tive-Money Market Continues Ensy-Review of the Week.

NEW YORK, April 26.-Today's stock market was father quiet, and gave very little evidence of the activity of the large speculative forces which have kept up the silimation of the market during the week. Pennsylvania and New York Central were the only conspicuous stocks to show sustained strength with sympathetic in-fluence on the stocks of subsidiary or ald companies. The 12-point rise in New York, New Haven & Hartford was be-lieved to have some connection with the strength of the two principal trunk line

stocks. There were sharp advances in a number of industrials and specialities, which had no apparent connection, and were not explained by any new develop ment. The bank statement proved close ly in accord with yesterday's preliminary estimatce, and was accepted as favorable but the attempt to make realizing sales on the expectation that demand for stocks would be attracted by the statement found a yielding market, and prices were carried downward in many important

stocks to below last night's level. Yesterday's support for United States steel stocks was lacking, and those stocks were heavy throughout. The grangers seemed somewhat affected by the firmer tone of the grain markets. There was no secuel to yesterday's spurt in Southern Raliway, and that stock sagged until the close. The closing generally was active and easy. The session of the com-mittee having in hand the attempted set-tlement of the anthracite miners' demands was a repressive influence on spec ulation, but the tone of the market seemed chiefly due to the disposition of operators to take a whole holiday instead of a half day after the considerable ac livity and excliment of the week.

Review of the Week.

With the period of growth of the Win-ter wheat crop, and the approach of the seeding period for corn and Spring wheat the stock market this week hag reflected the importance attached to the crop propect as outlining the hope of continue prosperity for the whole country. Th remarkable weather early in the week and the absence of moisture turned the prices of stocks downward, and there was to appreciable rallying tendency until the reaction in wheat and the reports of rain in the Southwest gave hope of relief from the threatening conditions. It is notoriou that the leading speculative interest in the stock market is also very active in the grain markets, and for this reason much manipulation was evident in both markets, and current rumors were much given to exaggeration. For example, reorts in circulation that the coming corr rop was geriously threatened are scarce ly warranted at a time when the seed is not even in the ground. The influence of last year's corn shortage is too obvious in the country's domestic and foreign traffic not to make the outcome of the coming crop one of paramount importsnce. During the current year the corn shortage has not materially affected the merchandise movement to the corn region, as the people there were in prosperous

condition from several good previou years. As usual, the shortage in corn le to large matketing of livestock, so that the railroad tariff was well maintained. But another corn crop failure could not but materially affect the earning power of ratiroads. After coming through the Win-ter in only moderate condition, the Winter wheat crop has undoubtedly suffered much deterioriation during the past week.

Strong Forces Still Active. Notwithstanding the strong influence of the grain situation, it is obvious that

strong speculative forces are still active

strong speculative forces are still active in the shock market, and they have been alert in shifting from one point to an-other and developing strong points. Con-fidence in the general railroad situation is fostered by the generally high level of carnings reported, and by such special ex-

French money market in the carrying out of syndicate projects, and the London market is indebted to Paris on a scale probably unprecedented. Speculative and convertible bonds have been very active, moving in sympathy with stocks. United States 2s advanced is per cent over the closing call of last

selves of the abundant resources of the

NEW YORK BANK STATEMENT. Reduction in Loans Reflects Con-

tinued Conservatism. NEW YORK, April 26.-The Financier

SAYS: "The official statement of the New York associated banks for last week showed an increase of \$3,325,500 in cash, of which \$781,600 consisted of specie and \$2,525,900 legal tenders. This increase of cash is only \$811,200 below that which was estimated from the traceable movements of money during the week, the estimated sum being \$4.135,500. In the previous week there was a difference between the estimated and the official gain of \$1,175,-900, the latter being \$880,100, while the former was \$2,034,000. This wide differ-ence, it was believed, indicated that the statement was made on rising averages. which belief, it now appears, was probably correct. Therefore, it would seem that the bank returns of last week re-flected conditions, as regards cash, more closely than usual. The cash movement closely than usual. The cash movement was well distributed throughout the week, money coming from near-by points in fair amounts each day, attracted by the opportunities for employment in the New York market, and it scemed to be evi-dent that the monetary tide had quite decidedly set toward this center, not only from neighboring citles, but from all parts of the country.

parts of the country. "The loans were decreased \$1,007,300, making \$13,529,300 since April 12, induring which period stock trans-were in large volume. The reclusive duction in loans last week appears to reflect continued conservatism on the part of our banks. The requirements of stock commission-houses have, however, been largely met with offerings from country banks, chiefly at the West, which have freely loaned the balances with their New York correspondents; also, the stock exchange borrowers have been able to obtain all the money needed else-where than from the local banks or

trust companies. "The deposits were increased last week \$1,772,800. The statement is therefore out of harmony, the gain in cash, less the of harmony, the gain in cash, less the loss in loans, calling for an increase in deposits of \$2,228,200. The required re-serve was augmented by \$443,100, which amount deducted from the gain in cash of \$3,325,500 leaves \$2,882,400, as the in-crease in surplus reserve. This item now stands at \$3,551,600, against \$15,759,775 at the corresponding date last year. "The cash changes by individual banks

"The cash changes by individual banks were comparatively small during the week. Nine Wall-street institutions week. showed a net gain of \$2,200,000. Two of the number indicated an increase of \$4,-100,000, and one" a decrease of \$1,400,000. The hank clearings for the week were nearly \$2,000,000,000, an increase of \$350,-710,010

The statement of the associated banks for the week ending today shows:

| Loans | \$893, 294, 100 | *\$1,097.3 |
|------------------|-----------------|------------|
| Deposits | 954, 545, 600 | 1,772,4 |

Takes Over Heinze's Copper Mines. NEW YORK, April 26.-It was announced today that all of the Heinze copper properties in Montana have been taken over by the United Copper Com-pany, and that a syndicate, including Haligarten & Co., bankers, of this city, had taken the proposition in hand. The statement was also made that provision has been made for a larger working capital, and additional properties would be acquired. The capital stock consists of \$50,000,000, \$5,000,000 of which 6 per cent preferred stock and the balance in common shares. The common stock will not be ready for issuance for some weeks, but arrangements have been made to trade in the shares when issued. The Heinze properties embraced in the new deal include the Montana

Ore Purchasing Company, Nipper Con-solidated Copper Company, the Cobra and Rock Island group, the Minnie Healey

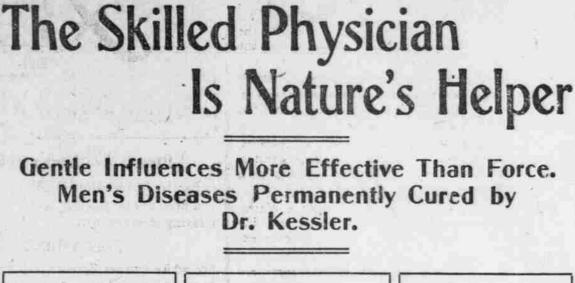

mine, the Belmont and a number of

but it is announced that a combine against the growers will not be formed. As one of the organizers expressed it:

"Whatever benefits may accrue through the combined efforts of the shippers will

be shared by the growers, for our one purpose is to find a market for the en-tirs grop at good prices."

others

If I take your case you may know that I can cure you. 121 122

The human body is a most wonderful piece of mechanism, it is all the while wearing out and all the while rebuilding. When disease attacks there is extra work to be done. The natural reconstructive forces are called reconstructive forces are called, inth more vigorous action, and effort is centered upon the af-fected part. Nature knows just what to do in every condition that may arise. She makes no mistakes. Her defeat never comes through error, but be-cause the assault is overwheim-ing. Yet, as long as life exists, the effort to establish health continues. continues. The skilled physician is nature's

helper. He must not attempt to be more than a helper. He must work with nature, and in direct accordance with na-ture's plans. His failing to do this can but bring on, if I may call it such, a three-cornered com-bat. His blows at the foe strike nature as well, and both strike back. His treatment not only fails but both strike back. His treatment not only fails, but it becomes the equivalent of an additional aliment, which nature must seek to correct. Nature abhors draatic measures. She is seldom in sympathy with

J. HENRI KRESLER, M.D., Manager. STRICTLY RELIABLE.

"Weakness"

Due to a Simple Cause.

These functional disorders com-

monly termed "weakness" are

readily curable when treated

upon scientific principles and

with a full understanding as to

their cause. In an experience

of 15 years, during which I have

treated thousands of cases, this

ailment has yielded to my treat-

ment promptly and completely.

The truth is that "weakness"

is not a nervous disorder, nor is

it due to any impoverished con-

dition or lack of vitality, ex-

cepting, of course, cases of gen-

eral debility, where the entire

system is broken down. Frac-

tically every patient who comes

to me to be treated for this dis-

order is strong and robust.

which is evidence of the cor-

rectness of the statement just

made, and proves conclusively

the folly of resorting to stimu-

lants, tonics and electro-medical

that I cannot cure. force. Physicians are comprehend-

\$700 deposited in the

bank for any case taken

ing this more fully than ever before, and as a result the advance ment in medical science is toward the adoption of mild and gentle influences.

For thirty years I have treated private diseases. I have given my thought to this class of aliments, My endeavor has been to acquire scientific knowledge concerning them. I realized the general lack of such knowledge, and the impos-sibility of successful treatment without it. I am confident that I have ascertained nature's require ments in these diseases. My original, safe and strikingly distinctive treatment meet these requirements. The remarkable cures effected prove that they meet them

perfectly. The thousands of cases I have treated without a single failure or undestrable result afford a mag-nificent example of what may be accomplished through helping nature and forcibly argue the scientific cor-rectness of the present trend toward less harsh and drastic measures in the treatment of disease.

Varicocele.

Many men afflicted with varicocele are endangering their genoral health, their manly power, and even life Itself, by allowing the disorder to remain un-foured. Varicocele results from partial phat have a part in controlling local crutation of the blood. The mus-routed of nervous commanication and control, become intective, weaken and riter. The blood vessels expand from the pressure within, the circulation is the parts becomes aluggish, and fre-quenty stagnant pools form in little norsh stagnant pools form in little possibility exists that clots may form by these stagnant pools and them pass out to the general circulation bould one find lodgment in a valve of heart the result might be the stant death, or should it be cartied to be the parts become particular would follow.

low. I guarantee to cure varicoccie in one week by a method that involves no cutting, no ligature, no caustic. No oilser physician employs a like meth-od, and so thorough is my work that there need not be the alightest fear of a relapse into the old condition. Those who have been long afflicted with var-ioccele will never realize the injury it has caused until they feel the vim, energy and buoyancy of spirits that a complete cure will bring.

Stricture.

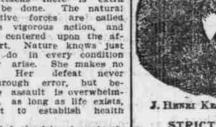

Specific Blood Poison.

This most hideous of all venereal dis-tases can no longer be clased as in-curable. The idea that the limit of medical aid is to keep the disease do-mant by persistently dosing the sys-tem with mineral poisons, is as incor-rect as many of the profession cling. Such (reatment not infrequently re-surts in the virus being driven deeper into the system, where it attacks and destroys even the very hones of the sufferer. I positively drive the very last taint of policon from the system in skrift days. The cure is thorough and permanent, and every eyrplon of the disease vanishes forever. I em-ploy no dangerous drugs or mineral policoms, but the harmless blood-cleans-ing remedies herotofore unknown in the treatment of this disease. I re-gard my success in overcoming this frightful keprosy as the crowning thus frightful keprosy as the crowning thus frightful keprosy as the crowning the sumph of my professional career.

Contracted Disorders.

To but partially cure a contracted dis-ease, is almost as dangerous as to al-low it to go untreated. Unless every particle of infection and inflammation is removed, the probability exists that the disease will gradually work its way into the general system. Still greater is the danger of the prostate sized becoming coronically inflamed.

NORTHWEST DEAD.

Well-Known Grand Army Man. THE DALLES, April 26 .-- W. J. Jeffers an old resident, and well-known Grand Army man, died in this city Thursday night, after a lingering illness from can cer. He was born May 1, 1833, in Castle-bier, County Mayo, Ireland, and with his widowed mother came to New York in 1844. For some years, he resided on Gov-ernor's Island, with an uncle, who was then band master of the Second United States Artillery, enlisting in the Sixtieth Infantry at the age of 15 as a drummer-box J 1500 with two companies of the boy. In 1850, with two companies of the Sixth Infantry he was detailed to escort a scientific expedition from the Smithsonian Institution through the Red River country, being stationed later at Fort Snelling and taking part in several in-dian campaigns. In 1836, he was married to Miss M. J. Comstock, of Chicago, who

Murderer Sentenced.

WHATCOM, Wash., April 25.-The jury in the case of Thomas H. Robertson, on trial at Friday Harbor. San Juan County, for the murder of John Hand, Febru ary 17, 1902, last night returned a verdict of murder in the second degree. The defendant accepted it, and was this morn-ing contended to 10 years in the penitentiary.

Firemen's Toursament Off.

WALLA WALLA, Wash., April 26.-Waitsburg today stated that it would be mpossible to raise the necessary mone the Eastern Washington and Oregon Firemen's Association tournament to be held there, and it will not be held this year. This is believed to mark the death of the organization.

Smallpox Near Elma.

ELMA, Wash., April M.-Smallpox is making its appearance in this vicinity. Three families have it near Satsop, about three miles from here. The health offi-cers have just been notified and a quarantine will probably be declared.

Sewer Bond Issue Voted Down.

ASHLAND, April 26.-A proposition to issue \$20,000 bonds for the construction of a sewer system for Ashland was voted down at a special election today. There were \$10 votes cast, 106 for and 205 against the issuance of bonds

Ranchman on the Warpath.

Meade.

WICHITA, Kas., April a. the City of ham, a ranchman, wont to the City of Kansas, last Wed-Mcade, in Southwest Kansas, last Wed-nesday, and became disorderly. He fired four shots at the Marshal, and hit r young man named Ed Kragh, who will probably die. The Marshal grappled with Latham, and took his gun from him, and aimed a bullet at his heart. His life was saved by a book in his breast pocket. He was lodged in jail. The next day Jesse Lunham, a brother of the prisoner, came to town with a revolver, and defied the authorities. A public meeting was held, and R. W. Griggs ordered Lanham to sur-render, but instead he fired his revolver recklessly, and the first bullet grazed the check of Mrs. C. B. Campbell, who sat in the hotel parlor near by. He was finally disarmed, and is in jail with his brother.

Foreign Financial News.

NEW YORK, April 26.-The Commercial Advertiser's London financial cablegram

says: "Stocks were quiet today, but the tone was still satisfactory. Investment shares hardened and American issues were inclined to hesitate and walt the appear-ance of the New York bank statement. Prices improved somewhat toward the close, with Atchison the sole feature. Copper stocks were firm. Gold to the amount of £22,000 in bars has been bought, and £5000 has been received from Australls."

Imports and Exports.

NEW YORK, April 26 .- The imports of dry goods and merchandise at the port of New York for the week are valued at \$10,012,540. Exports of specie from this port to all countries for this week ag-gregate \$435,668 silver and \$20,717 gold. to Miss M. J. Comstock, of Chicago, who died in 1961. That year he enlisted in the \$17,499 gold and \$12,533 silver. Room 4, Ground Floor

traordinary expenditures out of earnings for betterments. The details of the great internations steamship merger are accepted as evidence

of progress toward the strengthening and construction of transportation facilities, both domestic and International, of the country. The working out of the com-munity of interest in the anthracite car riers is also in evidence, and some of the

week's buying of the Roadings has ad-mittedly been in the interest of the trunk line systems in furtherance of the policy of division of traffic among them. Lake Shore's report of the acquisition of a large block of Lehigh Valley is evidence of the on the other hand, there was a rumor

of the legal obstacles which may be in-terposed for merger projects in the de-cision of the Supreme Court to allow the State of Washington to file suit against the parties to the Northern Securities Company. The force is seen of the comment by one of the principals that the construction of ownership in the Northwest is assured, whatever may be the decision of the Supreme Court on the present plan of holding the properties. But the fact remains that important finan-

cial results depend upon the success of the present plan of holding of these com-panies, and the question of its validity must remain a weight on the securities market until it is settled. The activity and strength of stocks of minor railroads in a strong strategic position and available for advantageous absorption by the larger railway systems, as well as the transfer of control of Louisville & Nashville, are evidences of the continued steady tendency toward consolidation in the railroad world.

Money Market Still Easy.

The money market has attracted little attention, as the easy terms offered pre-sent no check to the speculation. There was undoubtedly heavy liquidation during the early part of the week in the stock market. But the large financial projects in view offer no ground for a supposition of any important reduction in the volume of credits. In fact, there has been a large expansion of our foreign obligations, as shown by the supply of bankers' exchange bills in the market, against sterling loans. In spite of this, the course of exchange has been upward, and gold exports are considered probable again. The present extraordinary accumulation in banking reserves in France is a subject of wonder in the financial world. The conjecture that a large loan to Russia was in contemplation has been overthrown by the authoritative statement that the Russian loan floated in Germany was with the specification that no further Russian loan would be offered within a year. The French accumulation is now believed to be due simply to a prevalent spirit of distrust by investors, due to heavy losses in Russian and other in dustrials. It is expected that a satis-factory outcome of tomorrow's election in

France may lead to some outflow of French capital into the channels of invest-ment. Some tentalive steps were taken toward securing the admission of American securities to the Paris Bourse, or toward the removal of obstacles to the admission of foreign securities there, to which importance is attached. Meantime American capitalists are availing themGrow Dollars

Fruit-Shippers Plan to Combine. SAN FRANCISCO, April 26.-The deciduous fruit-shippers of this state are formulating a plan of reorganization with the idea of eliminating needless competition in the East during the approach ing green fruft season, controlling the various Eastern markets and exploiting new markets in this country and abroad. De-tails of the proposed organization, which Piles. will embrace shippers controlling at least \$5 per cent of the green deciduous fruits of California, have not yet been perfected.

No matter how severe or of how long standing. I will permanently cure every case of piles that comes to me for treatment. Though I have hereity-fore made little mention of this troublesome affliction. I am constantly curing cases that other physicians have been unable to relieve. My treatment is mild, gentle and certain, and my practice in this disease constantly grows as a result of recommendations from those whom I have cured.

My diplomas from the most celebrated medical colleges and hospitals in the world, together with my license from the State of Oregon, are hanging in my office where my patients may see and examine them.

Every patient who comes to me for treatment receives my personal attention. Though all my assistants are graduates of the best medical colleges, they act only under my supervision and assist me in minor work.

All necessary electrical examinations are absolutely free to patients. My equipment for electrical work is the finest and most complete ever produced, and equally perfect results are not possible with an inferior apparatus.

All remedies are prepared from standardized drugs in my own private laboratory. A Andrew Mart M. or

combinations, etc., which can only excite the functions tem porarily, to the positive detriment of the real ailment. The prostate giand, being the vital center of the sexual system, and very sensitive to abnormal influences, becomes chronically swollen and inflamed as a result of early dissipation. Improperly treated contracted dis-cases, strain, injury or other cause, and the condition is manifested by disordered sexual functions. Therefore the "weakness" is only a symptom of-prostatic trouble, and is not the condition demanding treatment. My method of curing "weakness" is to restore the tender and swollen prostate to its nor-

mal state. I employ local measures only, and the results 1 ob tain are prompt, complete and permanent. Like results can be had from no other treatment, because no other can be in accordance with scientific require ments.

areater is the danger of the prostate giand becoming caronically inflamed, which always brings partial or com-pleté lons of sexual power. Perhaps twenty-five per cent of the cases of ao-called "weaknews" are a diroct result of some improperly treated contracted disease. During the past 30 years 1 have treated over 6500 cases of con-tracted disorders and have effected an abnolutely thorough and safe cure in each instance. There have been no relapses or undestrable developments whatever, and my patients have been cured in less time than other and less thorough forms of treatment require in producing even doubtful results.

Reflex Ailments.

Often the condition appearing to be the chief disorder is only a reflex all-ment resulting from some other dis-ease. Weakness sometimes comes from varioscele or stricture; skin and bone diseases result from blood poinou, taint and physical and mental decline follow long-standing functional disor-der. My long experience in treating men enables me to determine the exact conditions that exist and to treat ac-cordingly, thus removing every dam-aging cause and the effects.

Inability to come to my office for consultation and treatment need not deprive you of my services. My knowledge of men's diseases enables me to treat most cases with absolute success at a distance. Write describing your symptoms in full, and I will advise you free of charge, and tell you whether I can cure you without your calling in person.

My dispensary occupies the entire building, and is thoroughly equipped with everything modern and scientific for the cure of disease.

My symptom blank should be in the possession of every man. It is interesting and instructive as a study, and is helpful in making a home diagnosis. Sent free upon request. Consultation and advice free at office or by mail.

TERMS reasonable in all cases. Especially low to those getting small wages and of limited means.

DR. J. H. KESSLER, of the St. Louis Medical Dispensary, 2302 YAMHILL STREET, Corner Second.
