"Love is an awful thing," he remarked as he was placed in a cell.

ABOUT EYE GLASSES

It is one thing to treat diseases of the eye and another to correct errors of refraction. Each is a distinct profession in itself, requiring unlimited research. We confine ourselves to the refraction of eyes and apply no medicine whatever. In making examinations, we use the most modern instruments, and our system of testing goes away with the strong magnifying glasses which have done so much harm when wrongly prescribed by incompetent persons. We make a specialty of fitting neat spectacles and eye-glasses, and improve the looks, and our prices are very reasonable. We CHARGE NOTHING FOR TESTING, and invite you to call and see us.
