

COLLISION IS FEARED

PARISIANS PLAN CLERICAL AND ANTI DEMONSTRATIONS.

Police Taking Extensive Precautionary Measures—Government's Policy With Regard to Schools.

PARIS, Aug. 2.—Several Nationalist Deputies in the Chamber of Deputies on the Premier today to ascertain the government's further attitude toward the religious schools. M. Combes informed them that applications for authorization by the closed schools could not suspend the action of the associations law, and that such schools would not be allowed to reopen until the Council of State had rendered decisions regarding their reopening. They might, however, reopen with lay staffs, and he was considering means to expedite the consideration of applications by the Council of State. The Premier said 12,000 of such applications were waiting.

KING VICTOR'S MISSION.

Will Suggest to Kaiser a Reduction in Armament.

BERLIN, Aug. 2.—The subject of the visit of the King of Italy to the German Emperor at the end of this month is to propose a reduction in Continental armaments. This was the purpose of his visit to the Emperor, from whom he received encouragement. He will come to the Emperor with Russia's full support.

NAVAL ALLIANCE.

London Paper Suggests It in Connection With International Bank.

LONDON, Aug. 2.—The Sunday Observer, a British English journal, gives much prominence this morning to a long editorial article advocating the extension of the postoffice savings banks into an international banking system, which would create an empire, somewhat upon the lines of the American National banks, with this extraordinary feature, namely, the establishment of branches of the postoffice savings banks in every country in America, with an Anglo-American naval alliance as an adjunct. Under this scheme, notes would be issued by the imperial concern to the American banks and with this international banking system as a basis, American war vessels would be leased or lent to protect British colonies or British vessels employed in America in defense of the western coast.

King Goes to London Wednesday.

COWES, Aug. 2.—King Edward spent most of the day on the deck of the Victoria and Albert. His Majesty appeared to be in good health and spirits. The beautiful weather, which prevailed all the day, led to the departure of the royal yacht to Cowes, preliminary to the royal yacht squadron regatta, which will take place next week. During the day King Edward was on the deck of an Albert and Victoria, where the yacht club officials visited His Majesty and displayed before him the special pieces of plate for the regatta offered by Emperor William and other members of the British fleet.

PEOPLE OF ACRE.

Little Known Region of South America in Dispute.

New York Tribune.

The region of Acre, in northern Bolivia, has been disputed territory between that country and Brazil for nearly a century. The little country has come into dispute recently because Bolivia leased a portion of the Acre region to an Anglo-American syndicate. Brazil objects to this arrangement, and has threatened to break off diplomatic relations unless the contract is rescinded.

WHITE MAN'S PARTY.

BIRMINGHAM, Ala., Aug. 2.—At a meeting of the State Republican executive committee today, at which it was decided to call a state convention in Birmingham, September 16, to nominate a full state ticket, a resolution was adopted which it is claimed will practically deprive the negroes of representation in the party. The resolution follows: "Resolved, That only those shall be recognized and permitted to participate in the state and county convention and be present at meetings who are duly qualified voters under the new constitution of Alabama."

Mr. Mackay Suffering.

NEW YORK, Aug. 2.—Mrs. J. W. Mackay is suffering severely from the strain of the past few weeks, according to a World dispatch from London. Two weeks she has been a consultation of doctors. She is suffering especially from heart trouble and sleeplessness. The doctors have ordered her to rest as long as possible. Possibly she may go to Manhattan for treatment. Her mother, Mrs. Hungerford, the letter's sister, Baroness Teffener, and Mrs. Mackay's daughter, Princess Comma, have left for France and Italy, but Clarence W. Mackay remains for the present, as a great deal of business must be done in connection with the settlement of the large estate of his father.

Valuable Time Saved.

Slight injuries often disable a man and cause several days' loss of time, and when blood poisons develop, sometimes result in the necessity of amputation. Chamberlain's Pain Expeller is an antiseptic liniment. When applied to cuts, bruises and burns it cleanses, soothes and quickly restores without maturation, and prevents any danger of blood poisoning. For sale by all druggists.

STARVED INFANTS

INHUMAN CONDUCT OF A CHICAGO WOMAN.

Police Arrest Her Pending an Examination Into the Case—Other Crime News.

CHICAGO, Aug. 2.—The police have arrested Mrs. Campbell, of 65 Grand avenue, on a charge of allowing an infant to die from infectious nourishment. It is alleged that within the last three years eight other infants have been buried from the woman's children. Campbell was found to attend the infant which has since died. He found it in such a condition that she refused to issue a death certificate, declaring that the child died of starvation. The assertion that eight children have died in the house is made by Viola Campbell, 14 years of age. Mrs. Campbell says that she is the mother of the girl, who claims that Mrs. Campbell had said on other occasions that she was not a relative of hers. A letter was received at the Campbell house three weeks ago, the girl says, which was written by John Reade, a criminal, and in which a letter Reade told the girl that he was her father and that she had been kidnapped from her home in Cincinnati 10 years ago. Campbell says that she had been told by the girl, her mother, that she had been kidnapped from her home in Cincinnati 10 years ago. Campbell says that she had been told by the girl, her mother, that she had been kidnapped from her home in Cincinnati 10 years ago.

INJURES BEE INDUSTRY.

Complaint Against Extensive Spraying of Fruit Trees.

SALEM, Aug. 2.—(Special.)—A. J. Pruitt, who has a large apary near his place, complains that the extensive spraying of fruit trees during the blossoming season is proving a serious injury to the bee industry. He says that the bees, in gathering honey from the blossoms, also collect the poisonous ingredients of the spray solutions and take this poison to the hives, where it kills the bees. In three years Mr. Pruitt reports that he has been able with 12 swarms of bees to raise but one swarm.

A Tragic Chapter.

PHOENIX, Ariz., Aug. 2.—A chapter of tragic incidents is reported from Graham County, in Eastern Arizona. Theodore Kochs, a Mexican, shot and killed Peter Rochs, a German, who was a member of the Home of the Boys' and Girls' Aid Society. The crime is thought to have been due to trouble between sheep and cattle owners.

Another Range Murder.

FLORENCE, Colo., Aug. 2.—Samuel Bandall, a cattle raiser, was riding on the prairie south of Granada, Colo., near the Kansas line, when he was murdered. His horse was killed and he was left for dead. The crime is thought to have been due to trouble between sheep and cattle owners.

THE DEPENDENT CHILD.

A Paper Prepared by Mrs. C. R. Templeton.

I have been requested to give a few words about the work of the Boys' and Girls' Aid Society of Oregon, and the subject given is "The Dependent Child." This is perhaps somewhat ambiguously expressed. The question might be raised, "Which is the dependent child and which is the independent child?" The very object of the question at once indicates the answer. No child whatever is or can be independent. All children are for a shorter or longer period of time absolutely dependent upon their parents.

DE WINDT'S BIG TRIP

(Continued from First Page.)

Visions of Great Railroad.

"One of the reasons why Siberia is enormously rich in gold deposits, and in other mineral resources. There are immense agricultural possibilities south of Irkutsk. Some day Siberia will startle the world with her riches. To enable her to tap this portion of her heritage, a railroad is necessary, and I am convinced that the line of the railroad is so wealthy that the cost of construction will be paid in a few years' time. I also want to demonstrate the possibility of an entering a comfortable mode of life in Paris, and emerging from it, little the worse for the long trip, in New York City. Even under these conditions, the trip will be a long and tiresome one, and many persons subject to excessive attacks of seasickness while in a boat of any sort would cheerfully endure the long trip in the cars, and with pleasant light and the comforts of civilization, in preference to the unpeppable miseries of crossing the Atlantic Ocean in dirty weather. The question of passenger traffic is of secondary importance, however. Think of the boundless international advantages which would accrue to the world in general from the completion of such a railway. It would open new markets, to a widely extended territory. The Pacific coast would profit by it—Portland as well as her sister cities.

De Windt's First Trip.

"Oh, that was in 1896, but I made New York City my starting point on that occasion. In the Spring of 1896 I started from New York, traveling through Winnipeg and over to St. Michael, in Alaska, via Juneau and Klondike. The latter place was then a small fishing village known as Drun-Dluck, but it occupies what is now Dawson City. The railroad was opened up at that time, and I returned about the end of August, but here our expedition was brought to a standstill. The wild natives of the Yukon village of Gwich'edien seized our stores and acted generally in a suspicious manner. When we protested they told us that we must live with them until the opening of navigation in the following July. We were literally starved, and I believe that I escaped the hostile natives this trip."

Symptoms of Ear Troubles.

Deafness and ear troubles result from catarrh passing along the Eustachian tube that leads from the throat to the ear.

NOW IS THE TIME

TO TREAT AND CURE CATARRH

SPECIAL NOTICE—Office Hours From 9 A. M. to 1 P. M. Evenings, Tuesday and Friday From 6:30 to 8:30. Sunday From 9 A. M. to 12 M.

DISEASE DESCRIBED BY SYMPTOMS

The Proper Course for Sufferers. Great numbers of people suffer from the malign poison of catarrh, as from other chronic maladies, without any correct or timely idea of the nature of their affliction. The following symptoms have been carefully arranged to enable many sufferers to understand just what it is that ails them. Many diseases, known under various specific names, are really of catarrhal origin and nature. Every part of the mucous membrane, the nose, the throat, eyes, ears, head, lungs, stomach, liver, bowels, bladder, and bladder, are subject to disease and blight by catarrh. The proper course for sufferers is this. Read these symptoms carefully over, mark those that apply to your case, and bring this with you to Dr. Copeland and Montgomery.

If you live away from the city, send them by mail, and ask for mail treatment. In either instance, and whether by mail or office treatment, the patient may be assured of a relief and cure possible to medical science.

CATARRH OF HEAD AND THROAT

The head and throat become diseased from neglected colds, causing Catarrh, which the condition of the blood predisposes to this condition.
