

SEEK YOUNG

New York Police Unable to Find Murderer.

HIS TRUNK LOCATED IN CHICAGO

Dead Woman's Clothing Found in It—Officers Receive Note Signed by Young Saying He Has Committed Suicide.

NEW YORK, Sept. 20.—The energies of the whole detective force of New York are now concentrated on the task of running down Hooper Young, grandson of the great Mormon Prophet, Brigham Young, and who is believed to be the murderer of Mrs. Annie Pultizer, whose body was found in the water in the Morris Canal near Jersey City. In this quest, the authorities have the cooperation of every city and town in the country, to all of which full descriptions of the fugitive have been telegraphed. After a thorough search for the past 24 hours it is considered hardly probable that he is still in the city; but all trains and ferries, and bridges and all vessels leaving the port since that Young may have committed suicide was suggested by a note received by mail late today addressed to Captain Titus of the New York Detective Bureau. On rough brown paper was written: "Search in vain. Have killed myself.—H. Young."

The postmark showed that the letter had been mailed at the general postoffice in the city about 10 o'clock. From a comparison of the handwriting with several letters written by Young, the police are disposed to believe the communication was written by him. The police of the precinct in which the murder occurred express the belief that Young is still in the precinct, and is being protected by an alleged secret society, which they may be expected to have broken up by the United States Secret Service.

A dispatch was received today from Chicago stating that the police there had opened the trunk which Young is believed to have found in it the dead woman's clothing, a memorandum book containing the name of William Hooper Young, and a pawn ticket showing that a pair of diamond earrings had been pawned at a pawnshop in Park Row, this city, on Wednesday last, by a man who gave the name of Steiner. Prior to the receipt of the dispatch, a central office detective had found a trunk in the same pawnshop and under the same name. The person who pledged them gave an address in Harlem, which proved to be fictitious. The earrings were shown tonight to the old soldier's face, at once identified them as his wife's.

Captain Titus tonight received a dispatch from Superintendent O'Neil, of Chicago, saying that he had shipped the trunk to New York and that it contained, in addition to the articles previously mentioned, some articles of male attire and a dirk knife smeared with blood.

John W. Young, father of the man suspected of the murder, and letters from Paris, has communicated with friends in this city, notifying them he will return to the city for the purpose of defending his son. Mr. Young has also called in instructions to his most intimate friend to employ counsel for his son.

William Hooper Young is believed to have sent a letter to one of his brothers confining the murder to Hooper Young and explaining his motive. In the apartment in West Fifty-eighth street, a portion of a draft of a letter was discovered, it was in Young's handwriting and was written with a pencil, and letters from speaks of members of his family with much bitterness and especially does he denounce his father, who has now come to his defense. He also makes vague reference to his most intimate friend and flight from the country.

**Robbery the Motive of the Crime.** Captain Titus, of the Detective Bureau, emphatically declared today that the motive of the murder was robbery. He says the diamond earrings which Mrs. Pultizer wore were valued at \$150, and evidently have been pawned. Captain Titus further says: "This man Young has lived in St. Paul, Minneapolis and Dubuque, and letters from all of these places were found in his room. On Tuesday he borrowed \$5 from a man whom he had told that he was in hard luck and did not have a cent."

Captain Titus then told of his visit to the apartments on West Fifty-eighth street. He said he found there three empty beer bottles. One of the bottles had a crystal of cocaine in it. Pultizer thought the woman had first been drugged by some narcotic in the beer and afterwards knocked in the head. The room showed no signs of a struggle, but blood was spotted everywhere.

**MORMONS ARE WORRIED.** Fear the Crime Will Be Charged to Their Church. NEW YORK, Sept. 20.—An interview was obtained today with three Mormon elders who are occupying part of the apartment used by William Hooper Young, for whom the police are looking in connection with the murder of Mrs. Anna Pultizer. They are Clarence Snow, Lawrence Taylor and J. L. Woods. They are all young men and gave evidence of having passed a restless night. Mr. Taylor, acting as spokesman, said: "The enemies of the Mormon Church accuse its members of practicing the blood atonement. There is nothing in it, and this crime could not have been committed through the blood atonement. This young man may have possessed. He was outside of our church and we wanted nothing to do with him."

In connection with the "blood atonement" note found in the apartment, Taylor insisted that it had nothing to do with the Mormon Church. Elder Taylor said that when he and his companions came from Utah John W. Young told them they might have the use of his apartment during their stay in this city. On July 1 Mr. Young and his daughter sailed for Europe. A few days later William Hooper Young came to the house and demanded to have the use of one room. As he appeared to have his father's consent he was permitted to occupy a room. A letter which one of the elders received from Mr. Young, written in Europe, confirmed the young man's right to have the use of a room.

**HIS FRIENDS' VIEW OF CRIME.** Salt Lake People Say Young Was Always Considered Weak Minded. SALT LAKE CITY, Sept. 20.—Friends and relatives of William Hooper Young, grandson of Brigham Young, who is suspected of the murder of Mrs. Anna Pultizer in New York, say that the young man has always been considered weak minded, and on several occasions has shown signs of dementia. He has always been considered the black sheep of the family, and lately, it is stated, has been addicted to the use of morphine. Young left Salt Lake in 1883, but has been back here several times. The theory of moral degeneracy is not ideas entertained by Salt Lake acquaintances.

**Rejected Suitor Shoots Girl.** ST. JOSEPH, Mo., Sept. 20.—At Fairport, a small town near here, Marion Lucas, a young farmer, shot and prob-

ably fatally wounded Maude Chisham, aged 16. They had just returned from a drive when Lucas, drawing a revolver, fired four shots at the girl. It is generally believed that Lucas shot Miss Chisham because she refused to marry him.

New Way for Handling Criminals.

Seattle Don't Know Young.

SEATTLE, Sept. 20.—Up to date no evidence has been secured by the local police that Hooper Young ever lived in Seattle.

EARLY MORNING BLAZE.

Lodging-House and Livery Stable Are Nearly Destroyed.

Fire at 3:15 this morning nearly destroyed the lodging-house and livery stable of W. Wolfstein, at 227 Front street. The loss is about \$1000. All of the occupants easily made their escape, but it was with difficulty 30 head of horses in the stable were driven out. The alarm was turned in by Special Officer Orin Smith from box 113.

MILES AT ASTORIA.

He Will Visit Fort Stevens, Then Come to Portland.

ASTORIA, Sept. 20.—General Miles arrived here tonight. It appears he could not get his private car attached at the point arranged and preferred coming by the steamer Bailey Getzert. The General was received by Major Humphreys, Captain Goodale, Lieutenants Porter and Brewer from the city. The Mayor and many others were ready to tender the General an informal reception, but he felt more like resting. When he was asked by an Associated Press reporter about the old soldier's face, the General replied immediately: "I will know nothing about it until I see it." When asked about General Jake Smith only a faint smile covered the old soldier's face. Again he would say nothing except that he would visit Fort Stevens and then go to Portland and down the Coast to San Diego, Cal., then back to San Francisco and would leave this country September 25. It is 22 years since the General was stationed here as Commander of the Department of the Columbia.

SHAW SPEAKS AT CHICAGO.

Secretary Disappoints Audience in Ignoring Henderson Incident.

CHICAGO, Sept. 20.—As an opponent of the tariff revision and an advocate of reciprocity, Secretary of the Treasury Leslie M. Shaw spoke to a great crowd in Mason Park tonight. The Secretary, though he disappointed many in that he did not in any manner refer to the Henderson incident, evoked applause in his treatment of the issues which were so closely knit to the resignation of the Speaker of the House. "I most heartily believe in reciprocity. I declare it a step toward free trade, but the natural handicap of protection."

Fairbanks Opens Campaign.

ANDERSON, Ind., Sept. 20.—The Republican campaign opened in this city tonight with Senator Charles W. Fairbanks as the speaker of the occasion. The Senator was greeted by an enthusiastic gathering and his speech was frequently interrupted by applause. The Senator also opened the campaign at Newcastle this afternoon, speaking to a large and enthusiastic assembly.

BARD STILL IMPROVES.

Chances Are Fair for His Complete Recovery.

LOS ANGELES, Cal., Sept. 20.—Senator Bard is stronger and in better spirits than at any previous time during his illness. It is hoped the crisis of the disease has passed, and that his convalescence will now begin. The physician in charge wishes to make it known, however, that his condition gave more cause for hope than has been entertained at any other time since Saturday last. Dr. Taggart said: "If Senator Bard improves as much during the next 24 hours as he progressed during the 24 hours last past, he will be practically out of danger."

Major Powell Critically Ill.

WASHINGTON, Sept. 20.—Information has been received here that Major J. W. Powell, director of the Bureau of Ethnology of the Smithsonian Institution, is critically ill at his summer home in Haven, Me.

TWO AGAINST BALLIET.

San Francisco Man Charges Him With Stealing Stock Shares.

SAN FRANCISCO, Sept. 20.—J. C. Higgins, who at one time had deskroom in the office of Letson Balliet, a promoter, filed a suit today to recover 788 shares of stock in the Alder Creek Gold Mining Company. He claims that Balliet stole the shares from him in July and August, 1890, while he was at Baker City, Or. Balliet abstracted the stock from his desk and has ever since refused to account to him for it.

The Next Congress.

Two very different estimates of the character of the next Congress in the House of Representatives portions of it are furnished simultaneously. The one gives that body to the Democrats, and bases its opinion upon personal investigation and the views of experienced political observers. The other, on the other hand, states that the Republicans are to carry it, and reaches its conclusion from similar premises. Of course, these views are those expressed by representatives of the two political parties respectively. Neither of them may be so open to the charge of bluffing as some observers may suspect. It strikes us as fair to anticipate some Democratic gains in the elections this year; indeed, we understand the Republicans to concede as much. The coming into possession of particulars as regards them may have raised hopes in Democratic quarters. On the other hand, the Washington correspondent of the Transcript, "Lincoln," presents the substantial grounds on which the Republicans rely for the saving of the House to them. They rest, first, on the preponderance which they attained two years ago, and which must be overturned before the parties can start equal. Of the added members under the new apportionment, the Republicans expect to obtain more than half. The new districting is likely to prove perhaps a more important aid to them than anything, if this correspondent is rightly informed. For instance, he

Women as Well as Men Are Made Miserable by Kidney Trouble.

Kidney trouble preys upon the mind, discourages and lessens ability; beauty, vigor and cheerfulness soon disappear when the kidneys are out of order or diseased.

Kidney trouble has become so prevalent that it is not uncommon for a child to be born afflicted with weak kidneys. If the child urinates too often, if he urine scalds the flesh or if, when the child reaches an age when it should be able to control the passage, it is not unafflicted with bed-wetting, these are the signs of the difficulty is kidney trouble, and the first step should be towards the treatment of these important organs. This unpleasant trouble is due to a diseased condition of the kidneys and bladder and not to a habit as most people suppose.

Women as well as men are made miserable with kidney bladder trouble, and both need the same great remedy. The mild and immediate effect of Swamp-Root is soon realized. It is sold by druggists, in fifty-cent and one dollar sizes. You may have a sample bottle by mail free, also pamphlet telling all about it, including many of the thousands of testimonial letters received from sufferers cured. In writing Dr. Kilmer & Co., Binghamton, N. Y., be sure and mention this paper.

Don't make any mistake, but remember the name, Swamp-Root. Dr. Kilmer's Swamp-Root, and the address, Binghamton, N. Y., on every bottle.

states that in Illinois, where the Democrats have now 22 members, the Republicans think they have no fixed things that the Democrats will have but three out of the 24 to be chosen.

Laughter as a Stomach Cure.

London Family Doctor. Worry is but one of the many forms of fear, so that worry tends to the production of indigestion. Indigestion tends to perpetuate itself, each element augmenting the other. FILIPINOS AS SOLDIERS

where except in Mindanao, where it is entirely military. Outside of Manila the government is entirely elective, but in Manila it is appointed.

"I think the so-called treachery of the Filipinos has been greatly exaggerated from the start. It is entirely a question of policy with a Filipino whether he tells the truth, not a question of morals. When he sees that honesty is the best policy, he tells the truth, but now they have become convinced that that is the best policy. The great trouble has been the inability of both Americans and Filipinos to understand one another's way of looking at things. The intolerance of the Americans and their insisting that the Filipinos should understand them instead of their trying to understand the Filipinos, is the main source of trouble. The Filipinos can be led much further than they can be driven. A little consideration goes a long way with them."

Still Under Spanish Law. "One great trouble with our Government is that it is still governing the Philippines according to Spanish law, and is enforcing a great many old Spanish laws which were never enforced by the Spaniards and were never intended to be enforced by them. These laws were apparently passed only to give the Spanish officials an opportunity to make money by not enforcing them; they were passed to enrich the officials, not for the benefit of the people. They are now enforced by honest officials, and this works a hardship on the people. For instance, some of the customs duties are so high that it is evident that they were never meant to be collected, for the goods could not have been imported at such rates. The only object of imposing such duties must have been to give the officials a chance to levy blackmail for not enforcing them. It is not fair to judge the Filipinos by American standards, for the people have reached a much higher degree of civilization than we could expect after three centuries of Spanish rule."

Mrs. Stone says that she not only enjoyed her residence in the Philippines, but will be glad to return there. She was the

AMERICAN OFFICER FINDS THEM GOOD MATERIAL. Even Guerrillas Are Suppressed, and Only Petty Thieves Remain—Treachery Exaggerated.

That there is good material in the Filipinos, both for soldiering and for civil pursuits, is the opinion of First Lieutenant Carl L. Stone, of the Filipino Scout Corps, after four years' experience in the islands. He has just returned on leave, and is at the Portland on his way to his home at Minneapolis, where he will spend his vacation. He is accompanied by his mother, who has been in the islands for three years, and enjoyed life there.

"I was First Lieutenant of the Nineteenth Ilocano Company of Scouts," said Mr. Stone to an Oregonian man yesterday, as he sat in comfort in a white man's hotel, evidently enjoying the contrast with the quarters he occupied while campaigning in the Philippines. "There are about 100,000 native scouts who are engaged in regular garrison duty. I went to the islands with the expedition that left San Francisco in June, 1898, being then in the Thirtieth Minnesota Regiment of volunteers. I afterward joined the Thirty-sixth United States Volunteers, which was organized in the islands among the state volunteers, and was then transferred to the scouts. My lieutenant is the highest grade that can be reached in the scouts under the present law, but I expect that higher grades will be established. There are about 100,000 native scouts, and this will be a good thing, for the corps can be made the nucleus of a colonial force."

"As soldiers, under white officers, the Filipinos are all right. They are just as good soldiers as anybody wants, except that they have never been on the firing line. The only experience of that kind they have had is of their own kind, and that is the only reason why they will make good soldiers, for they have confidence in a white American officer, and will go anywhere he has a mind to take them."

"There are not even any guerrillas in the islands now, for most of the people we have to deal with now are mere petty thieves, carrying the arms left in the hands of the insurgents. They do not bother much with any but their own people. The system of terrorism of the natives is being done away with by the scouts and other native forces, as they have confidence in their own people. The only armed resistance is in Mindanao, but the Moros are purely savages, and their resistance to the white man is for the motive of savages, though the religious element enters into their attitude, as they are Mohammedans. The mere fact that a Christian is in their country is a source of antagonism. The government has pursued a policy of conciliation, and has tried everything to keep from fighting with them. There has been some fighting, and there will probably be more. I will not speak of the Moros, but most of the people ever there are beginning to see that they have something better under our government than if they had their own way."

Treachery Exaggerated. "When Aguinaldo was released, he went to his home in Cavite Province, where his family is. He has since returned to Manila, but has not made any trouble that any one knows of. There has been some talk of what he and the other insurgent leaders would do when they got back from Guam, but I do not know of any reason for it; it is just surmise. "Civil government is in operation every-

DISEASE DETECTED BY SYMPTOMS

SPECIAL NOTICE—Regular office hours have been resumed, viz.: 9 A. M. to 5 P. M. Evenings, Tuesdays and Fridays. Sundays, 10 A. M. to 12 M.

The Diagnosis Made Easy by the Famous Symptom Questions; the Cure Made Certain by the Wonderful Medication Which Reaches Every Part Subject to Catarrh.

Dr. Copeland's treatment that has lifted the darkness and blight of the word "incurable" from hundreds of thousands of cases of Catarrh of the Head, Throat, Ear Tubes, Bronchial Tubes and Lungs, works its curative action for two reasons: (1) It reaches every diseased spot from the orifice of the nose to the deepest part of the lungs and the innermost recesses of the middle ear. (2) Instead of irritating, inflaming and feeding the focus of the disease, it soothes, quiets, heals and cures.

Dr. Copeland's treatment that has lifted the darkness and blight of the word "incurable" from hundreds of thousands of cases of Catarrh of the Head, Throat, Ear Tubes, Bronchial Tubes and Lungs, works its curative action for two reasons: (1) It reaches every diseased spot from the orifice of the nose to the deepest part of the lungs and the innermost recesses of the middle ear. (2) Instead of irritating, inflaming and feeding the focus of the disease, it soothes, quiets, heals and cures.
