and his administration has been of such a character as to increase the sentiment against him. He was renominated through the instrumentality of Senator Dubois. It is admitted that his renomination would have been impossible had not the Senator thrown his support to him. Since then, as a result of the penitentiary investigation, the warden, C. E. Arney, a special friend of the Senator's, has been dismissed by the vote of the Governor, after he (Hunt) had voted for a resolution declaring Arney innocent of any wrongdoing. This has embittered the Dubois wing of the party against him, although the enmity has not taken the form of open revolt on the part of the leaders. It is, however, influencing many of the Dubois Democrats in all parts of the

Such are the conditions that weight down the Democratic ticket. It is without special strength at any point to overcome this defection. The only thing upon which the supporters of Hunt have to rely is the claim that the labor union, vote will be for him, irrespective of party, but the closest observers fail to find that

the claim is well founded. No Defection Among Republicans. The Republicans, with a strong ticket, headed by John T. Morrison, for Governor, and Burton L. French, for Rep-

resentative in Congress, have been making an aggressive campaign, The Democratic candidates are Frank W. Hunt and J. H. Hutchinson. The Republican meetings have been well attended everywhere, and the people have shown much enthusiasm. There is no defection in the Republican ranks. While there has been

an effort on the part of the Democrats to stir up bad Teeling among the Republicans over the ascendancy of the

younger element of the party, it has not been successful. It may possibly influence a few votes on the Legislative tickets in some countles, but even the Democrats acknowledge the number will be emall.

In the southeastern part of the state, the Republicans say they will make a clean sweep. The Democrats do not admit it, but it is known that their advices are to the effect that they have little chance in that part of the state, In Ada

County, in which the capital is located, the Republican managers are confident they will increase the party majority of 350 two years ago to 600 this year, and the Democrats concede the majority will be large. In the mountain countles, the Democrats will be successful in mont cases, but in Blaine, which went for the Fusion ticket in 1909 by 600, the Democrats will not get more than 250 this year. It is in the North that the Democrats claim their greatest majorities. Conservative Republicans have not built high hopes on that section, but evidence is accumulating that the Democratic majorities will be, cut down, and in some instances reversed. Latah and Nez-Perce Counties

were both very close in the last election. Hunt carried the former by 153, and lost the latter by 19. The local Republican managers there are banking on large majorities this year, and it seems quite certain that the ticket will carry both countles. In the other three north-

ern counties, the Democratic lead will be cut down, and the Republicans are talking of carrying Shoshone, a former Democratic stronghold. Kootenal County will go Democratic by a reduced majority, them. Alec White has declined an offer and Idaho County will follow suit. of 60 cents per hundred for 400 sacks of potntoes. They report finding a large colony of beavers in the mountains of the Upper Deschutes, near the bast of Mount Scott. There are sev-eral hundred beavers in the colony and they constitute, most probably, the only colony of these much-prized furry-conted creatures on the Coast. They have dammed up the river in many places and formed large lakes, some of which cover an area of several hundred acres.

This beaver colony should be protected, is they occupy a territory in close proxas they imity to Crater Lake National Park, and make a valuable addition to this great natural wonder. Port of New York Officials Get Away With \$400,000

NEW YORK, Nov. 1 .- In its first issue today, a new shipping periodical says, according to the World, that investiga-tion led to the discovery before the repeal

of the revenue stamp tax of a \$400,000 fraud at the port of New York. The fraud was perpetrated through the use of canceled and washed stamps. The tax is no longer in force except on tea.

The evidence was gathered by a corps of Government Inspectors working in the Custom-House. The blame is thrown up-on the clerks and employees of Custom-House brokers. Individual brokers dis-covered the scheme, so far as their own offices were concerned, it is said, but not knowing that it was a part of a general plan, contented themselves with discharging the offending clerks. According to story, an investigation may be insti-

THEORIES ABOUT FOOD.

Also a Few Facts on the Same Sub-Ject.

We hear much nowadays about health foods and hygienic living, about vegetarianism and many other fads along the same line. Restaurants may be found in the large

cities where no ment, pastry or coffee is served, and the food crank is in his glory, and arguments and theories galore advanced to prove that meat was never in-tended for human stomachs, and almost make us believe that our sturdy ancestors who lived four score years in robust health on roast beef, pork and mutton must have been grossly ignorant of the laws of health.

Our forefathers had other things to do than formulate theories about the food they ate. A warm welcome was extended to any kind from bacon to acorns.

A healthy appetite and common sense are excellent guides to follow in the mat-ters of diet, and a mixed diet of grains, fruits and meats is undoubtedly the best. As compared with grains and vege-tables, meat furnishes the most nutriment in a highly concentrated form, and is digested and assimilated more quickly than vegetables and grains.

That large class of people who come under the head of nervous dyspeptics should eat plenty of meat and insure its proper digestion by the daily use of a safe, harmless digestive medicine like safe, Stuart's Dyspepsia Tablets, composed of the natural digestive principles, pepsin, diastase, fruit acids and salts, which actually perform the work of digestion. Cheap cathartic medicines, masquerading under the name of dyspepsia cures are useless for indigestion, as they have ab-solutely no effect upon the actual digestion of food.

Dyspepsia, in all its many forms, is simply a failure of the stomach to digest food, and the sensible way to solve the riddle and cure the dyspepsia is to make dally use at meal time of a preparation like Stuart's Dyspepsia Tablets, which is indorsed by the medical profession, and known to contain active digestive prin-
