Cannon Boom Salute at St. Paul and Tens of Thousands Roar Greeting-Address to Legislators and to Crowd From Capitol Steps.

ST. PAUL, April 4.—President Roose-velt spent but three hours in this city this afternoon, before being whisked over to Minneapolis in Thomas Lowry's private electric car. for an equally strenuous period in that city. The President's spe-cial train was one minute ahead of the schedule, arriving on the Chicago, Mil-waukee & St. Paul at 2:26, after an uneventful run from Winona, where a large crowd had listened to him and cheered him for over five minutes. On the run up a few minutes were given to the people at Lake City, whose cheers brought out a hearty expression of thanks from the President.

As the train pulled through the St. Paul yards to the Union Depot, Battery A of the Minnesota National Guard, stationed on the other side of the river, beomed out the Presidential salute, in which the en-gines in the yards and the strong lungs of an immease crowd joined. A commit-tee headed by Governor Van Sant, Mayor Smith and Brigadier-General Kobbe, U. S. A., briefly welcomed the party, which was at once taken for a carriage drive through the down-town streets, which had been handsomely decorated handsomely decorated with flags in honor of the city's guest. The Grand Army veterans led the procession, and after the President came the original Roosevelt Campaign Club, while the remainder of the procession included the local com-panies of Minnesota National Goard, near-ly all of them Spanish War veterans, and the Twenty-first Infantry, U. S. A., Fort

At the Capitol, the House and Senate, in joint session, received the President with cheers, thrice repeated. Previous to his arrival Archbishop Ireland had delivered a brief and eloquent prayer for the prosperand as soon as the Legislators were sent-ed, after greeting the President. Speaker Babcock introduced him in a few well-

chosen sentences.

Multiply the Race.

Multiply the Race.

The President spoke on "Good Citizenship," following the general lines of his previous address to the Legislature. The Nation, he said, could be no better than the individuals who composed it, and, if we wished for a strong and progressive Nation, we must cultivate strength and individuality among our citizens.

He referred to his now famous letter on "Race Suicide," stating that while the let-

He restfirmed in strong terms the senti-ment he had therein expressed and bethe race. We were, he said, by the amal-gamation of foreign nationalities, the intermarriage of the sturdy foreign immi-grants who had sought our shores, evolv-ing a new race—the American. He referred to the great sums being

spent by the Western States in the educaapent by the western States in the educa-tion of Young America, and commended it, but added that this public school edu-cation must be supplemented by the edu-cation of the home. Home influences counted for much. No matter how much a father might seek to instill wise pre-cepts into the mind of his child, if he did not re-enforce these precepts with his own good example, he could not expect his children to become good citizens. Fur-thermore, we must not allow our chil-dren to be reared in the lap of luxury. Put fren to be reared in the lap of luxury. Put them out in the world to struggle for themselves and thus gain an education in the rough school of experience that will teach them to be strong, to be independ-ent and to be manly. Maintain a high ent and to be manly. Maintain a high standard of individuality and science and the Nation will never deteriorate.

From the Capitol the entire party was driven through a small part of the resi-dence section, lack of time limiting the drive, and at the corner of Selby avenue and Dale streets special cars were in waiting and the President's party was taken through the residence section that connects St. Paul and Minneapolis, to the Nicollet Hotel, Minneapolis, night's banquet is to be held. where to-

WASHINGTON April 4.- The Marine Hospital Service has received a report from Assistant Surgeon-General Grubba, who is stationed at the Gulf quarantine station, giving the result of the inspection of vessels arriving from ports liable to be infected with yellow-fever germs. From June to November, 1902 52 vessels were in-spected, and in three instances infected

mosquitoes were found.
Surgeon-General Grubbs draws the fol-lowing deductions from his investigations: First, that mosquitoes can come aboard vessel under favorable conditions when the vessel is not far from shore; second, that stegomyla can be carried from Mexican or West Indian ports to those of our Guif states; third, that mosquitoes can board a vessel lying at anchor half a mile ored a short distance from land may become infected with yellow fever, our old

ST. LOUIS, April 4.-After four month SI. DOUIS, April 4-After four months of controversy between the employes of the Wahash road and the officials of that system, during which at one time a strike was imminent and was only prevented by an injunction restraining the employes from vacating their position, which injunction was dissolved hast Wednesday, the differences were finally adjusted and the controversy effectually and satisfache controversy effectually and satisfac orily settled this evening. The officials f the brotherhoods representing the em-loyes declare the cetti ment is eminently htlafactory and is a sweeping victory for organized labor. The Wabash officials declare that all differences with the employes have been finally terminated in a satisfactory manner, and that their future relations in all probability will be most harm folious. Following are the main points embraced

Twelve per cent increase for conductors, brakemen and baggagemen in the passenger service, and 15 per cent for conductors and brakemen in the freight ervice, over the rates which existed Jansary 1, 1942, west of the Mississippi River. For the firemen, increases were granted on the Canadian lines, in accordance with the Canada Southern division of the Michigan Central. On the lines in the United States material increases and im-provement in the working conditions were granted the firemen. East of the Missisippi River the rates will be brought up to this same standard, when competing lines in the same territory grant similar increases. The various yardmen receive

a substantial increase, varying in differ plying to all classes of train service. This was the main bone of contention, and was granted in its entirety. Ever since the injunction was dissolved

STRIKE AT NAVY-YARD.

Work on the Connecticut Stopped

and Walking Delegate Expelled. NEW YORK, April 4 .- A struggle between union and nonunion workmen is delaying work on the new battleship Con-necticut at the navy-yard in Brooklyn, and it was reported that a number of the nonunion men through intimidation did not go to work today. The men said to have been intimidated are engaged in the construction of a crane, without which work on the warship cannot proceed, and 300 or 400 men are thus kept out of em-

ployment.
Under orders of Rear-Admiral Rodgers,
Commandant of the navy-yard, C. S. Mas.
sey, a walking delegate of the Housesmiths' Union, was yestgrday escorted to
the gate of the yard by a detachment of naval police and marines and warned not to return under penalty of arrest by the Federal authorities. Massey gained entrance to the yard for

the purpose of inducing the derrick men on the Connecticut to stop work. Com-manniant Rodgers, after an interview with Naval Constructor Capps, decided to adopt drastic measures, and his interview with Massey was sharp and to the point.
When the delegate attempted to reply
the Commandant summoned Sergeant McDougall, his orderly, and ordered him to call the naval police and to see to it that Massey was escorted beyond the gate.

ENGINEERS MAY JOIN STRIKE.

Refuse to Sail With Non-Union Piremen Despite Their Contract. CHICAGO, April 4.—The strike of steamboat firemen, which has delayed grainiaden vessels from leaving port for several days, took on a new shape today, when the engineers of several steamers refused to take their boats with nonunion firemen provided by the owners for the trip to Buffalo. The action may result in drawing the engineers' union into a sym-pathetic strike, although demands of its members have been met by vessel-owners, and contracts have been signed for the season's work. Owners of steamers whose engineers refuse to live up to their contracts threaten to bring the men before the steamboat inspectors, in order to force them to serve or have their Government licenses taken away.

DISAGREE ON WORK HOURS. Anthracite Miners and Operators Quarrel Over Commission's Award.

Anthractic Miners and Operators Quarrel Over Commission's Award.

PHILADELPHIA, April 1—A disagreement between mine operators and miners today regarding the strike commission's ruling on the number of hours to constitute a day's work resulted in the closing of numerous collieries throughout the anthracite coal region. The greatest dissatisfaction was expressed in the lower region, and in Pottaville, Shamokin, Mahanay City and neighboring towns a majority of the mines were idle a portion of the day. At some of the collieries the men laid down their tools after they had worked eight hours and at others they remained in the mines nine hours, but refused to work ten hours when requested to do so by the superintendents.

The operators assert that they will pay the men only for the actual time worked and the miners declare this to be a violation of the agreement.

Meetings of the local unions were beid, and in a majority of cases the miners decided to return to work Monday and submit the question to joint conciliation committees of operators and mineworkers, as suggested by the commission. Officials of the union are not permitted to interfere in the controversies.

Rodgers Explains His Action WASHINGTON, April 4.—Acting Secre-tary Darling received today a report from Rear-Admiral Rodgers, commandant at the New York navy-yard, upon the eject ment from that yard yesterday of a walk-ing delegate, one C. S. Massey, represent-ing the Houseomithe Union, of New York. Admiral Rodgers' statement is a temperate review of the conditions which led up to this action.

Seven or eight workingmen, he say were approached by Massey. They yield ed to his demands and quit work. These men were employed by a contractor to install a big derrick, which will handle the material for the battleship Connecti-cut, and the extent of the Admirai's ac-tivity was simply to prevent interference of the navy-yard.

As the case now stands, in view of Ad-sirul Rodgers' statement, the department oes not feel called upon for any action.

THE TARGET.

CUPID REACHES A MAN'S HEART THROUGH THE STOMACH.

There is no disputing the fact that man's heart is often reached through the stomach. Happy the housewife who can please her husband's appetite with well cooked food for the table. Many a man is groupely and the stomach of the stom well cooked food for the table. Many a man is grouchy, ugly, nervous, suffering from distress after eating, heart palpi-tation, and all through the overworked stomach. No chain is stronger than its weakest link. No man is stronger than his stomach. If the proper elements in the food are not taken up by the blood in the stomach and carried to the vital organs of the body, one's health breaks organs of the body, one's health breaks down and one leaves the gates open for the entrance of disease germs. The germs of typhoid fever, grip, malaria, germs of typhoid fever, grip, malaria, pneumonia and consumption cannot pass through the stomach into the intestines, where alone they are capable of going unless the stomach has first been weakened by disease, indigestion, dyspepsia or errors in diet. Keep the stomach healthy, the bowels regulated and the blood pure and rich and your body is a stronghold against which the germs of disease cannot make a successful attack. If your blood is impure and you are sometimes pale or have the other signs of bad blood, such as pimples, boils and eruptions, you should at once take warning.

NATURE THE PHYSICIAN.

Nature is the real physician in such cases, for Dr. R. V. Pierce, chief consulting physician to the Invalids' Hotel and Surgical Institute, at Buffalo, N. Y., years ago discovered that certain herbs and roots made into an extract, without the use of alcohol, was the very best means of putting the stomach, blood and vital organs into proper condition. His Dr. Pierce's Golden Medical Discovery helps the assimilation of the food in the stomach, assist the blood in taking up the proper. assists the blood in taking up the proper elements from the food, helps the liver into activity, thereby throwing out the poisons in the blood and vitalizing the poisons in the blood and vitalian helps whole system. This assimilation helps whole system. in the oxidation of the red blood corpuscles, the poisons in the system are eliminated, the heart gets the right kind of blood and the person feels invigorated and stronger in consequence. As a tissue builder it is far preferable to cod liver oil or any alcoholic compounds or tonics, because it gives the blood and the tissues the food elements they require and maintains a person's nutrition by enabling him to eat, retain, digest and assimilate nutritious food. THE CHAIN OF LIFE.

Each of the chief organs of the body is a link in the chain of life. A chain is no stronger than its weakest link, the body no stronger than its weakest link, the life. V. Pierce, Buffalo, N. Y. gan. If there is weakness of heart or lungs, liver or kidneys, there is a weak link in the chain of life which may map at any time. Often this so-called "weakness" is caused by lack of nutri-tion, the result of disease of the stomach. Diseases of the stomach and its allied organs are cured by the use of Dr. Pierce's Golden Medical Discovery When the diseased stomach is cured, diseases of other organs which seem re-mote from the stomach, but which have their origin in a diseased condition of ch and other organs of diges

tion and nutrition, are cured also. THE PARMER PAILS

The farm is a wholesome place to live; the farmer's life is a healthy life; but no external advantages can overcome the effects of a diseased stomach. When the stomach and its allied organs of digestion and nutrition are diseased, the food eaten is

Catholics in the British Empire, especially in Ireland and Canada, the King come to Rome without trying to see the Pope, as otherwise it would appear to be an intentional offense. Anticipating the King's visit there is now an element at the Vatican advocating a deviation from the ceremonial established at the time of Emperor William's first visit, by allowing the King to start from the British embassy, where he will be met by Monsignor Stoner, the canon of St. John's Lateran and the highest English prelate here, who will accompany him to the Vatican. How-ever, it is probable that the King will not go to the Vatican if he comes to Rome for one day only, as it seems likely, according to the latest information on the subject.

DENIED BY CHAMBERLAIN. Story of Proposed Concessions Ireland Declared False.

LONDON, April 4.—Colonial Secretary Chamberlain was asked today if there was any truth in the statement made by the Dublin correspondent of the Daily Chronicle yesterday to the effect that the government intends to dissolve Parila-ment at the end of the present session; that the leading plank of the Conservative platform would be an enormous ex-tension of local government in Ireland; that the Irish police would be placed under the control of a legislative council; that Mr. Chamberlain warmly supported these projects of the government, and that neither Gerald Baifour, president of the Board of Trade, nor Mr. Brodrick, the War Secretary, would be included in the next Cabinet. Mr. Chamberlain replied: "The statements are sheolutely false, both as they regard myself and as they regard the government generally."
