

TRUST TRES FORCE

To Make Cannery Company Buy Its Cans

AND TO USE CHINESE HELP

Threatened by Tie-up of Its Factory Building, It Backs Down—Chinese May Be Cleared of River.

ASTORIA, Or., April 11.—(Special)—A new phase of the labor problem has developed here that may have far-reaching effect on the salmon-canning operations in the Columbia river valley. It was caused through the refusal of the American Can Company to supply the Tallant-Grant Packing Company with cans for this season's pack, for the alleged reason that the latter would not agree to purchase all its cans from the company, and also because the Tallant-Grant Company has contracted to employ white labor in place of Chinese in its cannery.

As soon as the labor organizations of the city heard of the action against the packing company steps were taken to organize its employees into a union of cannery-workers to be affiliated with the Federation of Labor and to include every white person engaged in the packing of fish. The union was started last night with 26 members, all employees of the Tallant-Grant Company, but the organizers claim its membership will soon be extended to the other cannery workers. What the result will be is unknown, but if the plans proposed are carried into effect, every cannery on the river will be compelled eventually to employ its Chinese help with white labor.

It is also said that if the can company persists in its refusal to supply cans to the only cannery on the Columbia river that has union employees, the fight will be taken to Portland and steps taken to cut out all the carpenters and other tradesmen employed on the construction of the can company's new plant. The union organization has the backing of all the labor unions in the city, and it looks as though a big fight was on unless some one backs down. President W. E. Tidwell, of the Tallant-Grant Packing Company, when asked about the difficulty today said:

"It is true that the American Can Company has refused to furnish us cans, but I do not anticipate any great inconvenience in that regard, unless there should be an exceptionally large run of fish. My company is prepared to begin operations at the opening of the season, and our can-making department will begin running on next Monday. Some time ago I placed an order with the American Can Company for a number of cans to be delivered during the fishing season. The order was accepted, and nothing further was said about the matter, until a few weeks ago I was accused of trying to secure some of the people employed by the can company. I immediately satisfied the company's managers that the report was not true, as we had engaged all the help required, and did not desire to interfere with any other institution, although we do employ much the same class of help as does the can company and pay them much better wages."

"Later I received a letter from the American Can Company, stating that it could not fill our orders. At first I did not understand the cause, but afterwards realized that the company was trying to force us to buy all our cans from it, and also that the white-labor question cut quite a figure. There is a large amount of Chinese contract labor available at present, owing to the closing down of some of the Alaska plants, and certain white men have been left without work on their hands. A proposition was made to us to use a portion of this labor at a great saving in expense, but this offer we refused for we believe in the help we have secured all the help we require. The Tallant-Grant Company feels that it should be given an equal chance with the other canneries, especially in case of a large run of salmon. In case of a large run of salmon, we can get all our other plants on the river can when they better wages."

"Later I received a letter from the American Can Company, stating that it could not fill our orders. In case of a large run of salmon, we can get all our other plants on the river can when they better wages."

Can Company Reconsidered. ASTORIA, Or., April 11.—(Special)—This evening the manager of the American Can Company notified the Tallant-Grant Packing Company that he would furnish the company with cans as requested. This action may settle the whole trouble.

CHINESE RAIDED BY ROBBERS. Mormon Basin Celestials Not Victims of Mob Violence.

BAKER CITY, Or., April 11.—(Special)—United States District Attorney J. H. Hall, of Portland, has been here several days making inquiry about an alleged outrage perpetrated on the part of Chinese men engaged in mining near Mormon Basin last summer. It will be remembered that a lot of toughs made a raid on the Chinese miners over there, and robbed them of all their gold dust and money. Three of the Chinamen were badly injured and several houses burned. It was not a mob, but a bunch of a lot of thieves and robbers, who, the better to intimidate their victims, burned their homes and assaulted the inmates.

The Chinese government, it is understood, has made a claim against Uncle Sam for \$100,000 damages, and it is for the purpose of looking up the facts in the case that Mr. Hall has been sent here. So far as can be learned, Mr. Hall does not seem to have found that it is a case wherein the Chinese government can claim indemnity for its subjects, because the outrage was perpetrated by a band of robbers, and not a mob of citizens, as was the case in the Rock Springs, Wyo., raid a few years ago.

TON OF SALMON FOUND. Caught Out of Season and All Packed in Ice.

OREGON CITY, Or., April 11.—(Special)—Water Bailiffs Smith and Jones and Deputy Warden Webster were looking for poachers near the mouth of the Clackamas yesterday evening, when they ran into a boat and a lot of salmon packed in ice as their crew had been for many a long day. More than 2000 pounds were taken from the pack and shipped to Portland, where they were packed in cold storage. After leaving this big find of salmon, the men proceeded up the river to look for a location for a fishway. On their way they broke their oars and were forced to beach ashore, and almost under their eyes they discovered a fine steelhead, which they appropriated.

It has long been known that salmoning out of season was being indulged in in the Clackamas, but that it was being carried on on such a large scale was not dreamed of, and strenuous steps will be taken to stop it.

DROVE STAKES IN SNOW. Rush for Coal and Oil Lands in West Coast Country.

WASHINGTON, April 11.—(Special)—A. E. Smith, of Victoria, March 11, 1903, reports that a large area of coal and petroleum lands has been recently discovered in southern Kootenai, within 25 miles of a branch of the Canadian Pacific Railway. Mr. Smith adds: "Two hundred and twenty applications for claims have been made, and it is stated that 20 miles of territory have been staked out, the stakes being driven in the deep snow. The country is well wooded. The matter has been kept quiet by the
