And if we don't move with the world it's apt to slip from under us and leave us without a foothold. To move with it means to keep up with the times and if you are a little in advance of them so much the better. In business great eco-nomics are being accomplished through system, and perfected systems are made pussible by improved labor-saving devices for operating them. To move with the business world you must keep posted on these systems and devices. In this connection the Globe-Wernicke Vertical Files and Filing Systems should be carefully investigated as they represent the highest degree of perfection in this line. Much interesting and valuable informa-tion can be gained by examining the de-vices at the J. K. Gill Co.'s office sup-ply department, corner Third and Alder streets.
