ALDER STREET.-Permanent improve ment of high class is now going on on Alder street. The City Engineer gave no-tice some time ago to all owners of prop-erty on the street that those not already having newer connections must make them. Very little of the property on the street has permanent connections with the Alder-street sewer, yet few owners have heeded the notice. The City Engineer should at once take measures to force owners to make their connections as far, at least as the sidewalk. Again, there is a section of the street where there is no water main. Such main ought to be put in now. If these things are not attended to now, it will not be a half-year till one and another are cutting the street. Is there no way to get business of this description attended to in Port-land?

NEW FIRE HYDRANT.—The members of the Fire Department will test one of the new variety of hydrants over at the Standard Oil Company early this morn-ing. The hydrant was designed by Chief Campbell and the Phoenix Iron Works, and if they prove satisfactory to the Chief, he will order about 50 of them to be put in place in needed localities at once. The Main 314 without shutting down, as it has three separate valves in place of one single one, as heretofore. The test will be made by throwing water out on to the vacant lots east of the Southern Pacific Com-Morgan, 301 Macleay building.

BEAUTT IN DISTRESS.—Many naturally attractive faces are rendered plain—often repulsive—by blemishes that are suscepti-ble of treatment and cure. Among these may be meationed wrinkles, freckles, which can be and on the substitution of the substit moths, and even smallpox pittings, all of which can be and are removed by the La Fere treatment discovered in Paris, France. This system is known and prac ticed by only three dermatoligists in the United States, and on the Pacific Coast only by Madame Vaughn, whose parlors, 206, 300 and 210 Failing building, have become a veritable Mecca to victims of facial disfigurements.
