and steel products carried by that road. The falling off in the coal trade, both anthracits and bluuminous, was also offered as a factor in Pennsylvania's weakness. But the principal cause of the selling of this stock was believed to be the large expansion in the capital of the system which is in progress. The extreme weakness of foreign exchange is

attributed, in part, to foreign subscriptions to the new railroad bond issues and heavy offer-ings of bills against cotton exports, which have forced the exchange rate down to the gold import point, in spite of measures by forcien bankers to protect their gold supply. The gold movement is expected to reach considerable pro-portions, and relief from the interior demand upon New York for currency is thus felt to be

The recent notable absorption in the bond arket has been halted, but prices have not yet yielded materially. United States 2s dered & and the old 5s and old 5s % per cent ow the closing bid of last week.

## NEW YORK BANK STATEMENT.

### Another Large Decrease in Loan Item Striking Feature.

NEW YORK, Nov. 14 .- The Financier this veek says:

The striking feature of the official statement The striking resture of the official statement of the New York associated banks last week was the decrease of \$10,240,500 in loans, fol-lowing a reduction of \$11,413,000 in the pre-vious week, making the total decrease for the formight \$21,653,500. The reduction last week was probably due to liquidation of speculative meaning on the Sirck Exchange, and also to was probably due to liquidation of speculative accounts on the Stock Exchange, and also to some contraction of loan accounts because of the comparatively low condition of bank re-perves, notwithstanding the drain of money to the South and West for crop purposes. It may be noted that the total loans are now only \$75,\$72,500 above the minimum of the your, which was recorded on January 10. The house lost 55 5013 2010 and ach desine th The banks lost \$2,913,200 net cash during the

The banks lost \$2,913.200 net cash during the week, which amount is \$1,312,900 below the sum which was estimaled upon the basis of the traceable movements of money. This com-paratively slight discrepancy, however, may casily be accounted for by the operations of the average system. The deposits were de-creased \$14,628,000, an amount \$1,475,000 great-er than the sum of the loss of cash and with the reduction in loans; hence, the statement fails to balance. The required reserve was The Perdection in ionics, neared, the statement fails to balance. The required reserve was diminished \$3,657,400 through the decreased de-posits, and deducting from this amount the loss of mash leaves \$744,200 as the increase in surplus reserve, which now is \$6,188,435; calcu-lated upon the basis of deposits, less those of \$36,021,700, the surplus is \$15,208,850.

The loans are in excess of the deposits by \$36,430,900, against \$32,050,800 in the previous \$30,400,000, sgains: \$22,000,000 in the previous week, indicating that the banks are employing to the fullect extent their available loan re-sources, including capital. It may also be in-teresting to note that the cash holdings of the terming to note that the test deposits, are the banks, and likewise their deposits, are the minimum of the year, the former being \$2,913, 200 and the latter \$14,622,600 smaller than the amounts previously recorded. Circulation shows the slight increase of \$105,850 during the week. The statement was undoubtedly the week. made on rising averages for cash,

The statement of averages of the clearing nours banks of this city for the week shows:

tor Co, is now in Portland. We have proved to the world that we can cure any cancer before it poisons deep glands. A lump in a woman's breast is cancer. Any lump anywhere is almost always cancer. No doctor can draw the line so fine as to tell where a rumor ceases to be a tumor and becomes cancer. Lumps or open sores on the face, lip or any portion of the body for six months is cancer. Cancer may give bui little pain until cure is hopeless. This magnificent Tourist Hotel is Scattle's most prominent architectural feature-being situated upon the high-est point of land in the down-town district-300 feet above sea level. It is, however, casy of access by private tranway, by regular hotel conveyance, by street car or by carriage. The scenery from the Washington is the most auperb to be found on the Pa-elfic coast. The appointments and fur-nishings of the Washington are en-tirely modern and high-class; the cuis-ine and service most satisfactory. The rates are exceedingly reasonable for a fashionable tourist hotel. We have 30 years' practice and have permanently cured more cancers than any doctor living. Why experiment with the swindling X-Ray until your case is hopeless? The X-Ray has many names, such as Chemical X-Ray, Roentgen Ray or any new name to attract attention. The X-Ray or knife never cures cancer. We were here one and one-half years ago and treated and cured a number of persons, some of whom you can see by coming to our office. Others that were treated with the X-Ray and others with the knife
