Columbus, Ohio, May 10, 1908.

Six years ago I had a severe attack of Inflammatory Rheumatism. I was laid up

in bed for six months, and the doctors I had

did me no good. They changed medicine every week, but nothing they prescribed

seemed to help me. Finally I left off their

treatment and began the use of S. S. S. My knee and elbow joints were swollen terribly,

and at one time my joints were so swollen

and painful that I could not close them when

opened. I was so bad that I could not move

knee or foot. In fact, I had one of the sever-

est cases of Rheumatism I ever heard of. I

was getting discouraged, you may be sure,

when I began S. S. S., but as I saw it was

doing me good I continued it, and to-day I

am a sound and well man, and have never

had a return of the disease. It relieved tho

and cured me of this severe case of Inflam-

matory Rheumatism after everything elso

had failed. I have recommended it to others

with good results, and I know that it is a

S AN FRANCISCO, Nov. 11.—(Special correspondence.)—Since the announcement has been made that the finan-

chal committee of the Lewis and Clark

Exposition has \$1,000,000 in available funds

interest in the Portland Fair has been

given a sudden impetus. While the work

of collecting the exhibits for the St. Louis

fair goes on, a second movement is al-

ready on foot to have the entire Califor-

nia display moved to Portland in 1905. This

proposal has met with the hearty indorse-

ment of those most intimately concerned.

In addition to the St. Louis display Cali-

fornia, because of its proximity to Ore-

gon, will make a special exhibition of

those products for which she is famed.

It is planned to make the most complete

exhibition of fruits and wines that has

ever been attempted here. While no direct

work has been begun to this end the idea.

has been readily seized upon by the large

ommercial bodies which generally con-

trol the collection of California products

for exhibition purposes. It has been pointed out that a display on an elabo-

rate scale at the Portland Fair will, al-

will at its close be transported to San Francisco and here set up as a perma-

Somewhat of a mystery confronts the

officers of Marin County, just across the bay from San Francisco. Hidden in the brush was found the body of a man, or rather the skeleton, and near him a re-volver, indicating suicide. The authorities

have not been able to establish the iden-tity of the man, but believe he is from

Oregon, and have asked for information from Northern Sheriffs. The suicide was

advanced in years. Wrapped in a Port-

land Evening Telegram of February 23, 1900, and a city newspaper of September

3, 1833, were a fishing reel, line and hooks.

A newspaper clipping was found on his person referring to a land transaction,

and it is hoped through this to clear up

# THE DREAD OF WINTER

The coming of winter, with its icy winds, damp, foggy weather, and sudden changes in temperature, will set the old rheumatic joints to aching and the muscles to throbbing and twitching with such pains as only Rheumatism can inflict. Chronic sufferers need no better weather signals to warn them of approaching storms than their aching bones and muscles. They know from experience how the damp, easterly winds and night air increase their misery and rob them of restful sleep. Rheumatism is always worse in winter. Cold and dampness are exciting causes; they affect the circulation, stop perspiration, and the poisonous acids in the blood, no longer able to escape through the pores, settle upon the nerves and tender linings of the joints and muscles, causing inflammation and swelling and such terrible piercing pains that no wonder the

patient often crippled and deformed for life. Rheumatism begins and develops in the blood; it is not a disease that comes in a night or that can be rubbed away in a day, but is a constitutional, wellgrounded blood disorder that all the liniments and plasters ever invented cannot remove. Yet some people will go on dallying with external remedies for years, leaving the real cause of the disease untouched, the blood growing weaker and thinner and the joints and muscles more useless with each attack. This formidable disease and Dread of Winter is due to a general sluggish condition of the system and the presence of uric and other acid poisons in the blood. It is an internal disorder, that can only be cured by internal remedies. The aches and pains are only symptoms which you may scatter or relieve for a time by liniments or

nerves are shattered, the health undermined, and the

to another, and from joint to joint, and frequently strike the delicate machinery of the heart or some other vital spot. Rheumatism is never permanently cured till the blood has been purified and the sluggish system aroused to better action; and this is exactly what S. S. S. does. It thoroughly cleanses the blood and renovates the system by neutralizing the acids

and expelling from the system all acrid matter. S.S.S. warms, enriches and invigorates the blood, improves the circulation and builds up and nourishes the weak, diseased nerves. S.S.S. acts also as a tonic, and as the general health improves, rheumatic pains are felt less often and gradually cease altogether. It is the thin, acid blood that is so easily chilled by the cold and affected by every ill-wind and change in the weather. Rheumatism and

bad blood are inseparable, you do not have one without the other, and the surest and quickest way to get rid of Rheumatism is to restore the blood to a normal, healthy state. S. S. S. is composed of both purifying and tonic properties, just what is required in every case of Rheumatism. It contains no Potash, Alkali or other mineral ingredient, but is

If you have Rheumatism in any form, write us fully about it, and our physicians will advise you without cost, and we will mail to your address our special book on Rheumatism, containing helpful information to everyone suffering from this painful complaint.

fect co-operation with the Board of Edu-CHALLENGES RIVAL INVENTOR.

Denies It Is Not Original. PORTLAND, Nov. 14 -- (To the Editor.) The Oregonian of November 6 speaks of the possibility of Z. T. Clark, of Portland, receiving \$100,000 for his patent process for hardening and toughening steel and iron. In the notice Mr. Clark is permitted indirectly to reflect upon my honor and make unfounded statements respecting a steel-tempering process which I disvered. These statements, in a measure. affect my reputation and the commer-cial value of my process, and I, there-

fore, wish to be heard in defense Recently in Portland I demonstrated to many mechanics, scientists and capital-ists the value of my process. Doubtless, referring to this demonstration, Mr. Clark is quoted as saying in effect that the procfor hardening iron shown in Portland some time ago is simply his process; that in some way the men concerned obtained his solution and used it as their own. "No one else," said Mr. Clark, "can possibly combine the chemicals so as to produce the hardening solution. I have no fear of that, although it may have been tried.

In answer to these assertions I wish to say that Mr. Clark has no means of knowing the ingredients entering into the composition of my tempering solution, nor the proportions thereof, as they have not been made public. He therefore cannot state with any degree of certainty that I used his process. Nevertheless, he does so state, and in the sentence following says that "No one else can possibly com bine the chemicals so as to produce the The truth is that I hardening solution." am familiar with Mr. Clark's process, my knowledge of it having been obtained om a copy of his patent, secured for the purpose of determining to a certainty whether or not my process infringed upon his. I thereby ascertained that the processes are wholly dissimilar. Further, my knowledge of tempering materials af-

his process will do.
Mr. Clark claims that his alleged dis-

covery will harden and toughen both steel the Interborough Council possesses all attributes of a trades union, although the teachers insist that there is a wide and iron. With my process I do not pro-fess to treat iron for any purpose. It is effective only through the medium of the difference in their organization. Nearly 13,000 employes of the Board of Education are members of the Council, which will be the governing body for all the old associations. The latter therefore A celightful card party was given Sunday by Captain and Mrs. David Du B. Miss Viola Friend on Thursday. Rev. A. Gaillard to about 49 of the officers and R. Lambert, of Spokane, officiated. betterment of teachers and a more per- Mr. Clark's work, nor particularly of a comparison of the two processess in question, only to show that my process of tempering steel-not Iron-is not his proess of "hardening and toughening steel and fron." Should be sell his "discovery," either on its merits or otherwise, it is wholly the business of himself and the Discoverer of Process to Harden Steel purchasers, but I object to his representations that my discovery is similar to his, I object to his attempt to boom his process on the demonstrated merits of mine. Since, as Mr. Clark states alternately with a contradiction of the same, I cannot secure the real secret of his method, and since it is unreasonable to suppose that I could steal or buy a sufficient amount of the solution manufactured by him to make a lengthy series of demon-

> that my solution is different from his. I am satisfied with the results of my process, and I should be happy to know that Mr. Clark is in a similar frame of mind as regards the results of his. In the latter event he would perhaps refrain from an attempt to connect my steel-tempering discovery with his case-hardening process As an evidence of my good faith in what I say, I hereby challenge Mr. Clark, as I have frequently done heretofore, to make a public joint demonstration of our processes as applied to steel, the demonstration to occur at Portland at any time convenient to Mr. Clark, and to allow competent experts upon whom the public

can rely to render a decision as to the

merits of the processes, and as to wheth-er the process I use is similar to his or

strations, as I have done, it is evident

#### an imitation thereof. Further details can be arranged if Mr. Clark is disposed to accept this proposition. B. J. CASTERLINE.
