Miles on Miles

An old term used in the daily newspapers of the
State, is being used by the United States Post
Office Department to describe the mileage of
the Post Office Service. The term was first used
by the Postmaster General of the United States
in 1849, and it has been in use ever since.

The number of miles that can be covered by
the Post Office Service is determined by the
number of persons employed in it, and the
number of vehicles used.

The number of miles that can be covered by
the Post Office Service is determined by the
number of persons employed in it, and the
number of vehicles used.
