THE OFFICIAL COUNT

Result of Election in Multnomah County.

LOCAL OPTION LOSES BY 1631

Manning's Majority is 3485 and Word's 2272-Nottingham's Plurality Cut Down to 108-The Vote on Each Candidate.

The official count of the vote of Mult-The official count of the vote of Multinomah County at the recent election was completed yesterday by County Clerk F. S. Fields and his deputies, and the result was sent to Secretary of State F. I. Dunbar. The canvass does not change the result from that announced in The Oregonian so far as the persons elected are concerned, though the total vote for the different candidates is slightly different

derent.

The plurality for Judge Moore for Justice of the Supreme Court is 7825, and that for J. W. Balley for Food and Dairy that for J. W. Balley for Congressman Commissioner is 2200. For Congressman Williamson has a plurality of 7435. In almost every case the Republican candidate has a clear majority of the votes

The official count reduces the majority against local option to 1831 and removes any hope that may have remained that it would be defeated. The direct primary the base majority of law is carried by the huge majority of 1663, more than four-fifths of the votes cast upon it being in its favor. The State Printer amendment to the constitution has the large majority of 7152, or more than three-fourths, but this does not imply that it has been carried. The general impression that it only requires a majority of the votes east upon the amendment to earry it is erroneous, for it requires a majority of all the votes cast at this election, so that a failure to vote upon the amendment has almost the same force election, so that a failure to vote upon the amendment has almost the same force as a vote against it. Irrespective of this fact, the general opinion among lawyers is that the amendment is unconstitutional and that a test in the Supreme Court will prove this to be the case.

Of the two offices which are won by the

Democrats, that of District Attorney is ascured by John Manning by a majority of 3456 and that of Sheriff by Tom Word by a plurality of 2372. For State Senator, the plurality of Nottingham over Court-ency is reduced to 198 in a total vote of over 18,000. Malarkey has the highest durality of the three successful Republ can candidates for State Senator in the Enghteenth District, namely, 5652. Dr. Coe's plurality to fill the vacant Senatorship ran higher, in consequence of the sheence of a Socialist candidate, and was 6302. The average plurality of the Re-publicans for Representative was 5730, A. L. Mills having the highest, 6494.

L. Mills having the highest, 6494.
On the county ticket, Finley for Coroner polled the highest vote, 15,229. Robinson for School Superintendent came next, with 12,845, and Fields for County Clerk was third, with five votes less than Robin-bon. As regards pluralities, Finley still leads with 10,100. Fields is second with 90%, and Robinson third with 9145. B. E. Longenecker has the distinction of being the only candidate elected without opposi-tion, receiving all the votes cast for Jus-tice of the Peace in the Mount Tabor dis-

The highest Republican vote was 15,229 for Finley; the highest Democratic vote, 10,180, for Manning for District Attorney: the highest Socialist, 534, for Rasmussen, for Food and Dairy Commissioner: the highest Prohibition vote, 1849, for Stone

for Congress.

The total vote for each candidate and the pluralities for the successful candi-

CARD OF TRANKS.

CRUSHED BY BEAM

Boyston H. Hatch Is Fatally Wounded.

STRUCK BY FALLING TIMBER

Workman at Weinhard Building is Warned, but Looks Up a Shaft Only to Receive His Death Blow.

Bayson H. Hatch, while engaged it isting heavy timbers from the first to the fifth floor of the new Weinhard building, at Fourth and Pine streets yesterday afternoon, met a tragic death by being struck on the right temple by a huge beam, 14 by 16 inches in width by 16 feet long, which fell from the fifth floor, crushing his face into a shapeless mass and rendering him unconscious, in which condition he died a few minutes later at the Good Samaritan Hospital. Hatch, who resided at 398 Eugene street,

had been engaged at the Weinhard build-ing holsting material for construction since the commencement of the building, and yesterday's accident was the first to happen since he had been engaged in the work. At the time of the accident Hatch was assisted on the first floor by Joseph Bunnett, and had just hoisted the heavy beam to the fifth floor by means of a steam holsting engine. At the fifth floor Niles Nelson and Joseph Jarvis, two other laborers, swung the beam in onto the Nies Neison and Joseph Jarvin, two other laborers, swung the beam in onto the floor and loaded it on a truck. As they wheeled the truck away, the wheel toward the shaft slipped through a crack in the temporary flooring, tilting the truck and precipitating the beam down the shaft, at the bottom of which Hatch and Bunnett were engaged in loading another them into the silter precentary to hold; beam into the sling preparatory to hoist-

Nelson and Jarvis shouted warnings of "Look out" simultaneously, and Bunnett jumped back from the shaft, which probjumped back from the shaft, which probably saved his life. Hatch stopped to look up and the big timber, which came down endways, atruck him squarely on the right temple, crushing his face into a shapeless mass.

The timber bounced nearly 20 feet after striking the floor and struck Bunnett, bruising his chest and right arm. An ambiliance of the struck bruising his chest and right arm.

bulance was summoned and Hatch was taken to the Good Samaritan Hospital, where he died a few minutes after his ar-

rival, never regaining consciousness.

Coroner J. P. Finley, after carefully investigating the case, decided that death was purely the result of an accident, for was purely the result of an accident, for which no blame could be attached, and consequently will hold no inquest. Bayson Hatch was born in Oregon City, April 7, 1854, and was a son of the late Peter H. Hatch, a well-known Oregon ploneer. He was a member of Albina Camp, Woodmen of the World, and left a wifew and daughter. Mrs. Freda Rhoeda widow and daughter, Mrs. Freda Rhoed-er. The funeral will take place from Finley's Chapel tomorrow afternoon.

CADETS WIN HONORS. Standing of Students at the Hill Milltary Academy.

The school standing of Hill Military Academy, just prepared by Dr. J. W. Hill, shows that the highest standing in scholarship for the year 1992-04 is: Academic department, Renton K. Brodie; preparatory, Willie Dunham, and primary, Richard Kruse, an of this city. This is the roll of honor for the first

NATIONAL GRANGE COMING. Agricultural Exhibit Wil Be Displayed During the Sessions.

and John H. Mitchell, The Dailes, Or

The National Grange, Patrons of Husbandry, will be held in Portland next November. That is settled, although some more money will have to be raised later. This matter being definitely settled, the committee of agricultural exhibit, composed of A. F. Miller, Portland; W. K. Nowall, Dilley, Washinston. W. K. Newell, Dilley, Washington County; William Craithenwaite, Clacka-mas County; C. B. Kegley, of Pullman, Wash.; W. T. Jackson, Vancouver, Wash. will meet next Tuesday, June 14, at 19 o'clock, and make plans for its preparation.

Sichel, however, says he will not resign from the Executive Board because he has been elected State Senator. Mrs. E. C. Bulman desires to express her deep appreciation and gratitude to friends, members of the G. A. R., A. & N. U., I. O. O. F. and W. R. C., of Vancou-ver, and the W. R. C., of Portland, for their kind expressions of sympathy and services rendered in her recent bereaveBros. will give a 1100 wagon to the county making the best display; John Deere Plow Company will give a plow; Mitchell, Lewis & Staver will also give a suitable

The various Pomoun Granges in the state are expected to appoint local committees for getting up the displays. Multinomah Pomona Grange meets at Fairview next Wednesday, when a committee on county exhibits will be appointed.

The committee on exhibit is anxious that a first-class display of Oregon produce shall be made for inspection of the delegates who will come from 28 states. B. C. Leedy, state master, who was instrumental in securing the meeting of that body for Portland, says arrangements will be made so the agricultural display may be inspected between 12 and 2 o'clock.

At the meeting of the exhibit commit the meeting of the displays will be decided on, and arrangements will be made to issue printed instructions for distribution among the counties. Every effort will be made to secure the best pos-sible agricultural exhibit.

REPORTS ON ELECTRIC ROAD.

Many Difficulties to Be Encountered in Changing Forest Grove Line.

A. H. Babcock, the electrical engineering expert of the Southern Pacific, who has been in the city for some time past estimating the cost of transforming the Southern Pacific West Side line from here to Forest Grove into an electric line, has completed his work. His report has been submitted to the officials of the road, and it is now being considered by them Some announcement relative to the pursuance or abandonment of the plan is looked for during this week.

Mr. Babcock made careful examina Mr. Babcock made careful examina-tions of the line between this city and Forest Grove and has made his esti-mates accordingly. Whether or not the change in the system will be made, of course, depends upon the cost of trans-formation and the relative cost of oper-stion of an electric and steam line. While pathing definite has been stylen out by nothing definite has been given out by the officials, it has been intimated that the estimates made are rather unfavor-able. So many difficulties would have to be overcome and the cost of change and operation would be such that, it is said, the scheme is considered hardly prac-ticable. However, owing to the demand ticable. However, owing to the demand for increased service over this line, and the apparent intention of another com-pany to build an electric line into this district, the proposed change may be

Leave for St. Louis.

Judging from the sales being made by local ticket agents, Portiand and Oregon will be well represented at the St. Louis Fair by visitors from here. During the first days of sale of special-rate tickets more than 400 persons bought round-trip tickets to St. Louis and return. The number sold during the last sales-days has not been correctly estimated as yet, but it is believed it will equal if not ex-ceed that of the previous dates.

Owing to the approach of harvest time, there will probably not be a large travel from here during July and early August. but during the latter part of August and through September the sales of tickets are expected to be large.

Inspected Elgin Branch. LA GRANDE, Or., June 11 .- (Special.)-

LA GRANDE, Or., June II.—(Special.)—
W. C. Brown, vice-president of the New
York Central and vice-president of the
Lake Shore & Michigan Southern; H. A.
Parker, vice-president of the Chicago,
Rock Island & Pacific, and James A.
Drake, a New York banker, were in the
city yesterday in Mr. Brown's private
car, and went out to the end of the Eigin
branch. It is reported that they are looking over the possibilities of an extension
of the railroad through Wallowa County
and to Lewiston, and it is expected that
hefore long some steps will be taken in
this direction. this direction.

BASEBALL GAME TODAY.

City Hall and Courthouse Nines Will Play.

The City Hall and Courthouse will play a game of baseball this afternoon at the Hawthorne Park baseball grounds, on East Eighth street and Hawthorne avenue, for the benefit of Deputy City Engler Jack McLeod. tickets have been sold, and

large crowd is expected.

The Mayor will pitch the first ball over the base. Accompanying the Mayor, the Council and Executive Board will be in attendance, and also all of the county offi-

Sammy Vigneux will umpire the game and one of the Councilmen will act as offi-cial scorer. The game will be called at 2:30 o'clock. Milk which contains only 50,000 bacteria The line-up is as follows:

BIJOU THEATER SOLD. Fred T. Merrill and Edgar J. Daly Assume Management.

Dr. Zan, the City Physician, will be in

During the past week the Orpheun Amusement Company disposed of their interest in the Bijou Theater. Sixth street, near Washington, to Fred T. Mer-rill and Edgar J. Daly, both of this city, who will take active management with in a day or two. The high-grade vaude-ville acts, such as have been appearing at this popular little house, will be continued. Mr. Merrill will be the manager and advertiser, Mr. Daly will be the act-ing manager and secretary. Mr. Merril

last night said: "Taking the control of this theater at this time is a preliminary move for the building of our big theater later in the season. We propose to erect a theater of this class with a seating capacity of 1209 or 1400, so that we can afford to play the highest-priced vaudeville and Eurosean acts obtainable, giving but one per ance in the afternoon and two in

AS HELPLESS AS A CHILD.

Fortune Gone to Church--Mrs. Abraham's Mind Has Become a Blank.

Mrs. James Abraham, whose fortune was absorbed in the erection of Centenary Church, the old Portland Hospital and expensive litigation, lies constantly on a bed in a little cottage facing East Seventh street, near the corner of East Pine street, in a perfectly helplens condition. Her, nurse, Mrs. Georgia, Barton sit 19 o'clock, and make plans for its preparation.

As the sessions of the National Grange will be held in the Armory, the agricultural display will be made there by counties. There will be competitive counties. There will be competitive counties have begun preparing their exhibit. Mrs. Mary Waldo is in charge of the work in Marion county. Most all the implement houses in Portain have given the committee assurances that they will contribute prizes for the best displays by counties. Studebaker sometimes, in spite of these precautions.

Pine street, in a perfectly helpless condition, Her nurse, Mrs. Georgia Barton, who has cared for her for many months, and my finprovement has of story. It was really very good milk, for only \$800 germs could be accounted for. But the next afternoon another sample of the same milk went through the process. This time there were \$0,000 microbes to the centimeter is good milk," said Dr. Mathon of the other counties have been following this diet now for this way as seen as it reached the laboratory of the seen so great all the others in my family several months and my improvement has of story. It was really very good milk, for only \$800 germs could be eacounted for. But the next afternoon another sample of the west shreen been so great all the others in my several months and my improvement has of story. It was really very good milk,

divorce on the ground of infidelity, and she would get the straps loose. Finally bandages were used to better put poses. Up to the death of her husband, Mrs. Abraham, while physically weak, was a woman of good intelligence, but the storm of litigation over the fortune was too much for her mind, and it gave way. The % years of her life are a complete blank.

COPS ON THE STREET-CARS.

Conductors to Be Authorized to Arrest Violators of Anti-Spitting Law.

Street-car conductors are to be given authority, as special officers, to arrest any passenger seen expectorating on the floor of the car and hand him over to the first regular policeman. After a conference with City Health Officer Bieradorf yesterday morning, Mayor Williams agreed to appoint a number of conductors as special policement to enforce the anti-sail coeffipolicemen to enforce the anti-spit ordinance.

The City Board of Health and the State Board of Health have both called particular attention to this measure and to its frequent violation, and through the efforts of the health officials orders were recently given to the police to arrest every offend er. Thus far two have been arrested. Manager Swigert has agreed to conductorpolicemen for the City & Suburban line and no opposition is expected from the two companies.

SUES J. S. REED FOR 10,000.

O. O. Jennings Charges Him With Alienating Wife's Affections.

alienating the affections of Helen C. Jennings from her husband, O. O. Jennings, J. S. Seed, a well-known contractor, is defendant in a suit for \$10,000 damages filed against him by Jennings in the State Circuit Court vesterday.

Jennings is an engineer in the em-ploy of the Southern Pacific Railroad Company, and in his complaint he charges that Seed has been unlawfully intimate with his wife, and that they have met each other on frequent occasions in the Selling-Hirsch building. Presentation of diplomas by Rt. Rev. B.

Jennings has also sued his wife for a Wistar Morris, bishop of Oregon.

names Seed as corespondent.

The Jennings were married about 12 years ago and have one child. The occupation of Mr. Jennings has caused him to be absent at regular intervals from the city. His suspicion was aroused while he was away, and he employed detectives to watch his wife, with the result that these two actions

COMMENCEMENT AT B. S. A.

Baccalaureate Sermon Tonight--Milltary Drills and Parades.

Commencement exercises will be held et the Bishop Scott Academy Monday and Tuesday. The baccalaureate sermon will be preached this evening at St. Mark's Church. The commencement exercises proper will be in St. Timothy's Chapel Tuesday morning at 10 o'clock, but the school being military, makes much of its drilling and parades, which will oc-Multnomah Field.

This will consist of D Company drill at 9:15; guard mount, 10:1; battalion drill, 10:30; competitive drill, 10:45, and dress parade, at 11:39. The cadets are mostly interested themselves in the competitive drill and in their white ducks and high helmets will have a soldierly bearing. The judges of the competition will be Major C. E. McDonell, Major F. S. Baker and Lieutemant B. L. Kaltz, of the Ore-

gon National Guard.

The commencement exercises on Tueaday will consist of a number of addresses and declamations, finishing with the pre-sentation of medals. The programme follows:

Principal's report.
Salutatory and essay, "Athletics," by Cadet
Captain Sydney G. Morrison.
Essay, "Natural Factors in American Civillisation," by Cadet Lieutenant Eugene W.

Validictory and essay, "Friendship," by Cadet Lieutenant Carl C. Nissier.
Presentation of medals and prizes by Rt.
Rev. F. W. Keater, bishop of Olympia.

Microbes in City's Milk Supply How Tests Are Made to Ascertain if It Is Pure Enough to Be Certified

PIFTY thousand microbes to every 15 drops of milk.

This is the microbe limit laid down by the County Medical Society for "certi-

fied" milk, the pure-as-possible fluid soon to be placed on the market by registered dairies after they have been examined by a veterinarian and a physician, and the milk tested for butter fat as well as for the number of microbes.

is pure milk indeed. Average milk such as you take off the front porch every orning contains upwards of 100,000 "bugs." But the doctors wanted "pure" milk for their patients and children, so

they set the limit low. It's a rather delicate job to count all those microbes. In 15 drops, the bulk of 50,000 of them could be placed on a pin point without crowding anybody. Even the United States census would balk at the job of taking down their names,

Dr. Ray Matson, as chemist and micro scopist of the State Board of Health is the man to count the bacteria in the milk from dairies who want to sell "certified" milk. He is a young man who studies "bugs," as he calls them, for enjoyment. They are his pets, and he cares for them as an old maid cares for her cat. "Now, here's a fine bunch of bugs," says Dr. Matson, as he points out a thin glaz-

ing over a dirty-looking liquid in a cotton stoppered test tube. "I raised them from the start and they're doing fine. What are they? Oh, tuberculosis. There's enough germs in that test tube to give every person in the world tuberculosis if his system was in the condition to receive them."
But though there are microbes al

around, typhoid fever, Asiatic, cholera, diphtheria and so forth, none of these germs can get into the milk. Only the germs which were in the milk when it reached the laboratory are counted. The poor little bugs in the test tubes have no chance at all to escape and get into the milk which the owners want to be "certifled" or to get into any one's system. Sterilized cotton and a rubber cap pre-

chide such a possibility.

But as to the counting of 15,000 microbes in 15 drops of milk. Samples of milk were transferred to media, as they are called, gelatine being used in this instance. Then the gelatine and the microbes are warmed up in the furnace, and put through a pro-cess to make the germs show up as much as possible. Then they are examined un-der the microscope, still on the cake of gelatine. A glass marked off in centimeters is placed on the glass case which contains the gelatine. Under the microscope, tiny specks may be seen. These specks are "colonies" of germs: Dr. Mat-son, knowing about how many germs form a "colony" at this stage of the game, counts the specks in several of the centimeter squares, strikes an average, and multiplies by the number of squares. One sample of milk was examined to

convince himself that each speck before his eye contained as many microbes as there were people in Portland-or New York or London in the case of the larger

'No one can tell by looking at them The only way to find that out is to take sample colonies and transplant them upon some substance which a certain class of germ likes. Some like blood-serum, some gelatine and others potato. But for the majority gelatine is the same as bread to human beings—they'll eat it, though they may like something else a little better. By watching the effect they will have upon these various media and then by microscopical examination it can be determined whether or not they are harmful." The dairles which are to sell "certified" milk will be mighty different from the or-dinary farm where the cows, themselves unwashed and uncombed, are milked in an unsanitary, foul barn. If an ordinary farmer who sells milk visited one of the "certified" dairles he would believe him-self anywhere but in a place where cows

were milked. were milked.

The cows must be spotlessly clean. The men who milk then must wear white uniforms. Everything about the place must be clean with a capital "C." The milk must be cooled in a place apart from the barn. Even the health of the milkers en-ters into the question. But for all these precautions there will

still be plenty of microbes in "certified" milk; the precautions have merely off a few hundred thousand. J.

Guest-Why do you call this Echo Hollow? Host-Because you have ter holler ter hear the echo.-Chicago Daily News.

TURN OVER TIME When Nature Hints About the Food.

When there's no relish to any food and all that one eats doesn't seem to do any good then is the time to make a turn over in the diet, for that's Nature's of dropping a hint that the food isn't the kind required. "For a number of years I followed

railroad work, much of it being office work of a trying nature. Meal times were our busiest and eating too much and too guickly of food such as is com monly served in hotels and restaurants, these together with the sedentary habits were not long in giving me dyspepsia and stomach trouble which reduced my weight

from 205 to 160 pounds.
"There was little relish in any food and one of it seemed to do me any good. It seemed the more I ate the poorer I got and was always hungry before and meal, no matter how much I had eaten.
"Then I commenced a fair trial of
Grape-Nuts and was surprised how a mall saucer of it would carry me along. strong and with satisfied appetite, until the next meal, with no sensations of hunger, weakness or distress as before "I have been following this diet now for everal months and my improvement has
