NEW YORK BANK STATEMENT.

Loss of Cash Nearly Equal to Decrease of

Previous Week.

NEW YORK, Sept. 10.-The Financier says:

One striking feature of the bank statement

last week was the remarkably close agreement

and the difference between the two amount

may easily be accounted for in great part by the fact that \$1,500,000 was withdrawn from the banks on Friday for transfer to San Fran-

pisco, which sum was not included in the

The deposits were increased \$4,625,400 and

the resulting augmented reserve requirement was \$1,156,550, which sum added to the loss of cash made \$9,965,150 as the decrease in the surplus reserve to \$38,438,250, a less, it may be noted, of \$18,937,150 for the fortnight. Computed upon the bards of deposits less

those of \$22,859,200 public funds, the surplus is \$44,275,200. The statement showed a good proof, the sum of the increase in loans less the loss in cash being only \$719,400 more than

the increase in deposits. Loans were expanded \$12,245,600, making a gain of \$31,429,000 in the fortnight. This would seem to reflect corpora-tion borrowing and also large rediscounting

by the New York banks for their English cor-

Comparison shows that six banks gained \$10,000,000 net in loans and eight banks lost

London Wool Market.

LONDON. Sept. 10.—The tone of the wool market is quiet and steady. Yorkshire has been rather more active, finer grades being in stronger demand. Bank clearings of the leading citie

Northwest yesterday were as follows:

FIRST LARGE EXPORT ORDER

Indicates Strong Position of Foreign Market-London Brewers Will Take All the Hops That America Can Spare.

Hops have an advancing tendency and 22 ots is quoted as the top of the market. Herman Klaber, of Tacoma, yesterday bought 1000 bales of Oregon hops at 26@27 cents for ment to London. The largest lot was one 400 bales that he secured from George se, of Salem, for which he paid 25% cents. This export demand from brewers at the very opening of the meason is the most only proves that crops are short in England and on the Continent, but also indicates a in possession of the browing interests.

With regard to the Oregon hop cros, the buils and bears are at it vigorously on the all-important question of estimates. The exsted, but there is still a wide margin between their figures. Few buyers are hold enough to predict a yield of over \$0,000 bales, while the majority of the trade place their figures at Well-informed growers consider this estimate at least 5000 bales too high, placing the crop of the state somewhere between 75.000 and 80,000 bales. In a short time now definite returns will be at hand. A letter received from a Tacoma dealer westerday said the crop of Western Washington would be lighter than expected. It placed the output of the whole state at 20,000 bales, as against

At a meeting of brewers, dealers and grow ers held in London last week, the conclusion was reached that the English crop this year will not exceed 200,000 cwt. This bears out the estimate made by W. H. and H. Le May. who, in their annual report dated London,

August 27, said: which we faued our annual circular on the world's hop crop last year, we are able to form what we believe will turn out to be a correct estimate of this year's crop. We have again, as has been our custom for

the last HI years, made a most exhaustive examination of the hop gardens of England, and are forced to the conclusion that in sequence of the most severe and persistent attack of aphia blight ever experienced, the crop cannot exceed 500,000 cwts, even with favorable weather from now to the finish of picking. The districts which have suffered cost are Worcestershire, Herefordshire, Hamp shire and Farniam. In estimating the total yield, we find a few thousand acres that will not produce any hops; the addition to these of those that will not grow more than 3 cwt. per acre, will make at least 11,600 acres that will not produce an average of more than 2 cwt. per acre. Then we find 10,000 acres that will not produce more than an average of \$\epsilon\$ cwt. to the acre, and another 10,000 acres that will not average more than 5 cwt. to the acre. This leaves 18,000 acres (which include all the best grounds throughout the whole hop area of Ehgland) which may average 10 cwt. to the acre. This will give a total of \$02,000 cwts. or fiff.000 old duty. And even this estimate may be reduced if the climatic conditions from now are not such as to properly develop the cones. hese of those that will not grow more than re not such as to properly develop the cones, ome of which are certainty very small.

It is our opinion that the general quality of
the English growth will be very good. The

plant came into burr early, and although many of the cones are not more than half the usual size, they have had more than an or-dinary time for developing lupulin, which the brilliant weather and high temperature of the past two months has put into the cones to a more than ordinary degree; in fact, it is several years since the English hops have been of such sound and excellent brewing qualities as can be found today in the best grounds. Of course there are some few grounds where the blight has not been suc-ossively combatted that will fall short of

With regard to the foreign competition with which the English grower has been threat-ened all the Summer, we believe it will turn out to be a mere bogry. We have taken the ouble to visit every hop-growing district on the Continent, and are strongly of the opinion that the Continent will not be able to send us as many bops as she did during the past 12 months, viz.: 75,000 to 80,000 owts, and that 50,000 owts, will be the utmost she can

of their own hope, and are paying flo per cwi. today for the new German hops as they arrive on the market. Germany lized will not produce as many hops as last year, but Austria and Belgium (where last year the crops were exceedingly small) have this year a good average crop, but as the Germans are now buying in Belgium, it is evident that they do not consider the crop in Austria suf-ficient to make up the deficiency of their own

There is a slight increase in the produc tion in America, but this will be balanced by the increase in the consumption of beer there, which has now reached nearly 50,000. us 85,000 to 60,000 cwts. it will be as much

The requirements of our brewers, exporters, to anufacturers of non-alcoholic drinks and yeast-makers are at least 150,000 evets annurally. Now, if England should produce 302,000 evets, and america 90,000 evets, thus showing a definiency of about 278,000 evets, which will have to be ratisfied out of the already depleted consumers stocks. How many hope will be left this time next year only the consumers can tell. The stocks on the market today are the smallest on record. This being the position of affairs, the producer is warranted in demanding such a price as will at least compensate him for the extraordinary expense he has incurred in producing the present crop, and also for the low prices he had to accept in 1800 and 1901, when he grew large crops for the benefit of consumers only, to his own serious loss. s it will be possible for her to do.

The requirements of our browers, exporters rops for the benefit of consumers only, to hi

SHOWN BY OPERATIONS IN NEW YORK STOCK MARKET.

Crop Prospects Better, Railway Earnings increasing and Labor Controversies Being Sattled.

NEW YORK, Sept. 10,-As a result largely of further heavy profit-taking, stocks moved rather irregularly today, though the undertone was undeniably firm. The tendency of many several of the more active issues, such as United States Steel preferred and common, touched new high records for the present movement. Susiness for the brief session was unusually heavy, though not widely distribunusually heavy, though not widely distributed. Southern Railway was the feature of the railway group in the early trading. Later, Union Pacific and other standard railway issues became very strong, but elsewhere in the list the activity was confined chiefly to the minor railway and industrial shares.

The market wavered slightly on the publication of the bank statement, which showed an annuality beavy therease in tours and a cashtion of the benk statement, which showed an unusually heavy increase in loans and a cash loss which aimost exceeded the highest. The grand total of loans and deposits is now at the highest in the history of the associated banks. Reports that the Government report on corn would be quite reassuring gave added stimulus to the list in the final trading and the closing was quite active and strong in apite of further heavy profit-taking. A very substantial advance in Colorado Fuel was not accompanied by any specific explanation, Total

substantial advance in Colorado Fuel was not accompanied by any specific explanation, Total sales of bonds, \$3,375,000.

The action of the stock market during the week has reflected speculative confidence and even enthusiasm. The number of shares sold rose to near 1,000,000 on several days and the advance for the week has been quite comprehensive, but not very great. The tone of the market has been cond throughout and the realhensive, but not very great. The tone of the market has been good throughout and the realising was well taken and opened the way in many cause for fresh advances. By a series of shifting operations, the whols list nearly has been included in the operations of the powers in control of the market and the sutaining influence of the new points of strength has proved sufficient to enable the taking of profits without materially hurting the price value. The bulk of business seemed to come value. The bulk of business seemed to comfrom firms credited with operating for speculative commissions of large capitalists and the general commission-house business has been small and little public interest in the market

has been reached.

The board room element has maintained a skeptical stitude toward the advance and has been constantly on the watch for its culmina-Sterling exchange steady, with actual business in bankers' bills at \$4.8705@4.8710 for demand, and at \$4.8450@4.8450 for 60-day bills; posted rates, \$4.854@4.85; commercial bills, \$4.854. been constantly on the watch for its culmina-tion and reaction. Their short selling and later forced covering have been factors in the occasional halts and the later renewed ad-vances. Selling was conspicuously in evi-dence on Tuesday, after the three-day holiday interval, during which the hank statement was published, showing an abrupt change from the long-extended rise in the surplus reserves of the banks. But this selling was absorbed with confidence and served to reassure the

of the banks. But this selling was posuroed with confidence and served to reassure the doubtful and withhold offerings from the market, thus facilitating the advance. Specific news to account for the rise has been as conspicuously lacking as at any time during the movement, but several features in the general situation were accepted as encouraging to prices. Little attention was paid couraging to prices Little attention as particular or or news. Crop prospects were regarded as being not materially altered during the week. The from and steel trade was a subject of constant discussion. Belief in a revival of the iron trade was an effective influence on the whole market. Of a similar effect was an evidence of a growth in milroad traffic. Last week's grain movement was effect was an evidence of a growth in nailroad traffic. Last week's grain movement was greatly improved and officials of Western reli-roads asserted that the Western movement of merchandine showed a large growth and augured a feeling of confidence in the mercan-tile community. The decision of the Pennsyl-vania to restore the full working time in its vania to restore the full working time in its shops, with effect on 20,000 workinen, was regarded as highly significant of better railroad conditions, and the New York Central's shoresse in gross earnings for August was viewed in the same light. The agreement arrived at over the wage disputs in the New York traction field and the formal abandonment of the meat strike lightened the labor elements from a stock-market standpoint.

CURED PEACH OUTPUT

CALIFORNIA CROP IS CUT DOWN THREE THOUSAND TONS.

Most of the Fruit Out of First Hands and Present Holders Are Advancing Prices.

SAN FRANCISCO, Cal., Sept. 10,-(Special.) Original estimates of the California cured peach output this year were 12,000 tons, but recent figures have reduced this to 9000. These are practically out of first hands and not more than 450 remain in growers' hands. Prices on choice Crawfords range from 7 to 74c, a few offering at 6%c. Mulra have advanced %c. Many dealers have virtually withdrawn quotations on standard and choice peaches, as few of those grades can be had. Another authority says this year's yield of cured peaches will not grade more than 3 per cent standard, against 17 to 25 in ordinary years. Apricots show a firm market and at present quotation are apparently cheap, compared with peaches. Prune trading is of small volume, with no noticeable improvement in prices or general condition. The raisin situation remains unchanged. Packers and the association are now conferring on the carry-over with a likelihood that a deal will be made of called off soon. Opening prices on walnuts will soon be

named. Almonds are firm at high values.

It was virtually another holiday in the local markets, the grain board being closed and people of Hebrew faith absenting themselves from business haunts. The fruit and farm roducts markets were dull with prices unchanged. Receipts of butter for two days, 28,000 pounds; cheese, 75,000 pounds; eggs, 27,000 dosen.

Grain freights are weak. A French ship arrived under prior charter for barley at

AWAITING GOVERNMENT REPORT. Truding in Chicago Wheat Pit of Evening-Up Character.

CHICAGO, Sept. 10.—The wheat market opened a triffe caster as a result of lower cables and continued favorable weather, December being off 1/2 at \$1.08%. The demand, Prices at Portland Union Stockyards which was very light at the immediate open-ing, soon showed considerable improvement, commission houses being fair buyers. The demand was principally for the December opyesterday were 30 cattle and 200 sheep. The following prices were quoted at the yards:
CATTLE-Rost steers, \$3; medium, \$2.75; mand was principally for the December op-tion, the price of which soon rose to \$1.08%. Trading during the remainder of the session was mainly of an evening-up character. The fact that the Government reports would be lesued late in the afternoon prevented any great amount of new business. A bullish fea-ture of the late market was the increased four business reported from the Northwest. HOGS-Best large, fat hogs, \$5.50@6; medium large hogs, \$5, SHEEP-Best Eastern Oragon and Valley, The market closed firm with December at

\$1.08%21.06%.
Favorable advices regarding the condition of the maturing crop and fear of a bearish Government report caused weakness in corn. December closed about %c lower at 51c. Onto were steady. December closed %6%c lower at 32%632%c.

Seiling by pit traders due to prospects of increased hog receipts was the chief reason for a small decline throughout the entire provision list. The votume of trading was small. At the close, January pork was 5c lower, lard 5c lower and ribs down 5c. The leading futures ranged as follows:

Sc lower; mixed and butchers, \$5.30@5.85; good to choice heavy, \$5.40@5.75; rough heavy, \$4.55@5.35; light, \$5.45@5.95; bulk of sales, \$6.4500.65,

Sheep-Receipts, 8000; sheep and lambe steady; good to choice wethers, \$3.5008.15; fair to choice mired, \$3.2503.60; Western lambs, \$4.5005.75.

SALEM, Or., Sept. 10.-(Special.)-Valley wheat continues at 80c in Salem, with numer ous sales being made.

GOVERNMENT CROP REPORT.

Condition of Spring Wheat Is 66.2, and of Corn, 84.6.

Corn, 54.6.

WASHINGTON, Sept. 10.—The monthly report of the Chief of the Bureau of Statistics of the Department of Agriculture will abow the condition of corn on September 1 to have been 84.6, as compared with 87.3 last month, 80.1 on September 1, 1903, 84.3 at the corresponding date in 1902 and a ten-year average of 79.6.

The average condition of Suring wheat was

The average condition of Spring wheat was 86.2. This being the first time that Spring wheat has been separately reported on September 1, the only comparison which can be made is with the condition one month ago, which was \$1.5. The condition in the five

principal states is reported as follows: Minn sota 69; North Dakota, 63; South Dakota, 56; lowa, 66, and Washington 80, a decline dur-ing the month of 23, 27, 29, 14 and 1 points

The average condition of the cat crop on September 1 was \$5.6, against \$6.6 hast month, 75.7 on September 1, 1903, \$7.2 at the cor-responding date in 1902 and a ten-year September average of 80.6. The average condition of barley on September 1 was 81.4, against 88.1 on August 1, 1804, 82.1 on September 1, 1902, 89.7 at the corresponding date in 1902, and a ten-year aver-

age of 82:1. The average condition of rye on September 1 was 95.9, against 84.1 on September 1, 1905; 90.2 at the corresponding date in 1902, and a ten-year average of \$5.8. ten-year average of 85.8.

The average condition of buckwheat September I was 91.5, against 92.8 one month ago.
91 on September I, 1803; 86.4 at the corresponding date in 1802, and a ten-year average.

age of 85.8.

age of \$5.8.

The average condition of flax on September 1 was \$5.8, as compared with 78.9 one month ago and \$0.5 on September 1, 1903.

The average condition of tobacco on September 1 was \$3.7, against \$3.9 one month ago, \$3.4 on September 1, 1903, and a five-year average of 79.5.

The average condition of potatoes on Sep tember 1 was 91.3, against 94.1 one month ago, 84.3 on September 1, 1903; 86.1 at the cor-responding date in 1962, and a ten-year aver-age of 77.3. The average condition of rice on September 1

was 80.7, sgainst 90.2 one month ago, and 80.6 on September 1, 1903.
Of the 30 principal clover seed producing states four, namely, Wisconein, Colorado, Utah and California, report increased averages, while all the other principal states report de-

In Indiana, Iowa and Colorado crops are below the ten-year average, while all other prin-cipal states report increases above the average. The number of stock hogs now being fat-tened is 2.4 per cent less than the number one year ago. Reports as to size and weight of stock hogs indicate a condition of 94.2, com-pared with 96.1 one year ago and a seven-year average of 94.3.

Coffee and Sugar.

NEW YORK, Sept. 10.—The market for coffee fatures closed 5 points higher to unchanged. Sales, 5900 bags. October, 6.70c; December, 6.80g6.85c; March, 7.50g7s55c; May, 7.30c. pot Rio, steady; No. 7 invoice, 8%c; mild

steady; Cordova, 10g13c.
Sugar-Raw, firm; fair refining, 3%c; centrifugal, 96 test, 45-16c; molasses sugar, 3%c; refined, steady; No. 8, 4.85c; No. 7, 4.80c; No. 8, 4.70c; No. 9, 4.65c; No. 10, 4.60c; No. 11, 4.50c; No. 12, 4.85c; No. 13, 4.40c; No. 14, 4.40c; confectioners' A, 5.10c; mould A, 5.60c; cut losf, 5.95c; crushed, 5.15c; powdered, 5.35c; granulated, 5.25c; cubes, 5.50c.

Imports and Exports. NEW YORK, Sept. 10.—Total imports of dry goods and general merchandise at the Port of New York for the week ending today were valued at \$10,882,468.

Exports of specie from New York for this week were \$502,345 gold and \$724,730 silver. Imports of specie at New York during the week were \$13,525 silver and \$25,400 gold.

Dairy Produce in the East. CHICAGO. Sept. 10.—On the produce exchange today the butter market was easy; creamery, 14810c; dairy, 121,615c.

Eggs.—Firm, 144,617c.

Cheese—Firm, 863c.

Fatal Quarrel Over Polo Game. GLENWOOD SPRINGS, Colo., Sept 10.-In a quarrel Sergeant Boyle has shot and killed Private Pearl Allen, of Fort Robin-son Cavairy Troop. The men quarreled
