CROP OF ARCENTINA

News From That Country Anxiously Awaited.

RAIN MAY HAVE DONE DAMAGE

Wheat Output of the South American Republic is the Leading Factor, at Present, in the Trade. s

The great factor in the wheat market jus grain dealers in the United States and Eur are upon that country. While it is generally conceded that the South American country has largest crop in its history, yet reports have been received of heavy fains in the wheat belt in the last few days, though no definite oftimate has been made of the damage done. The crop of Argentina has been increasing rapidly during the past few years. Last year it amounted to over 100,000,000 bushels. This year the acreage is quoted at 12,250,000, which acre would make the crop over 158,000,000 busbels. That is about the crop figured on, providing nothing occurs to reduce it. The country is long and narrow and is subject to heavy rains. Harvest is well under way in a arge part of the territory now and heavy rains at this time might lower the yield by a third more. Owing to the inaccessability of the wheat fields and the lack of reliable sources formation that is of value,

The largest share of the Argentine crop is exported. The country has only some 8,000,000 people and the home consumption cannot be over 40,000,000 bushels, so it is easily understood why the markets of the world anxiously the crop would have a considerable effect on

Argentina is the only South American country producing cereals for export. Thirty years ago it imported cereals from the United States, from Chile, and even from Turkey, but in 1902 the value of the quantity exported was \$65,-000,000, and according to all calculations it will exceed \$100,000,000 in 1904.

The grain elevators, which are already be-ginning to work, and the mills which make the flour, encourage the hope that the quality of this article will be improved, from being more completely cleared of impurities and because the grain will reach the markets drier and in better condition, generally; besides, the expenses of bags will be saved.

PORTLAND MARKETS.

STEEL AGAIN THE LEADER IN THE STOCK MARKET.

Lively Demand Also for Other Active Shares_Bank Statement Regarded as Favorable.

ly of United States Steel issues, but before the end of the brief session business in-creased in volume and the market broad-ened until it embraced a great number of standard stocks. At the outset large blocks of Steel common and preferred came out at fractional advances and the bonds also gained. There were slight advances in such specialities as Colorado Fuel, Pressed Steel Car, and American Locomotive. Amalgam-ated Copper responded to buying by houses supposed to represent Boston interests. Tos-flat fluctuated for a brief period, but short-ity before the publication of the bank stateflat fluctuated for a brief period, but shortly before the publication of the hank statement a heavy buying movement set in. There was a lively demand for Union Pacific, Southern Pacific, Missouri Pacific, Southern Railway, Book Island, Louisville & Nashville, Pennsylvania and others in the same group. London bought Union Partific and Southern Pacific, and the extensive purchases of Erie were probably for the account of the professional interest. The market remained active to the close, and prices of many issues were then the best of the day.

The bank statement was regarded as favorable in the sense that the loan decrease as well as the cash loss showed better than had been expected. An inspection of the daily report of the Associated Banks refacts the recent sales of city bonds. Three banks which acted for the purchasers of these bonds—the National Bank and the Fourth National Bank reported balances of more National Bank, reported balances of more than \$21,000,000, while the National City \$5,500,000.

w high prices were registered by the

Steel Issues. Atchison made a slight gain in spite of its poor October report. Great Northern preferred advanced 7 points, mak-ling a 17-point gain in two days. Total bonds sales for the day, par value, were sales for the day, par value, were

The most striking feature of the week was the most striking feature of the week was heavy dealings and increasing high prices of the securities of the United States Steel Corporation. It is generally believed that some plan involving the further conversion of Steel preferred into the sinking fund 5 per cent bond is contemplated. Evidence ac-cumulated that the iron and steel trade are steadily improving. Some of the other high-ly speculative issues also had their gains of the past week. The earnings of new is-sues of securities, as exemplified in the sale of blocks of Union Pacific, Rock Island, Chicago, Burlington & Quincy, Pennsylvania and Marquette refunding bonds and other less important issues, revived discussion of refunding plans long dormant and of consolidations of groups of subsidiary com-panies of some of the great railroad sys-tems for convenience or financial policy. This marks clearly the passing of the era of indigestion in the securities market, which occasioned borrowing of enormous amounts by Pennsylvania, New York Central and other powerful corporations during the course of last year, and for which high rates of interest was paid. These borrow lags were made necessary to keep alive projects already entered upon and which would have involved heavy losses by inter-ruption. The ready sale of these securities is perhaps the best best evidence of the con-fidence and of the absorptive power of the

Market. Notwithstanding the long immunity of the money market from the many declines in the cash supplies, the rates of interest for the week have shown that the usual Fall influences are not wholly to be escaped. The decrease of over \$60,000,000 in the item of deposits of the banks reveals the source of the supply of stock market borrowing during the period from September 9 to November 10, while the loan item of the banks weak solution of the banks was \$3,125,600 net, \$1,062,500 less than the was actually contracting some \$20,000,000. Although the legal surplus of the banks but the discrepancy was doubtless due to the system of bank averages and about the simulation of the conservative financial world. It is noteworthy that the bank clearing all over the country show an increase inge all over the country show an increase week last year. The eager demand of Continental Europe for our gold yet remains undefined in its extent. It is expected, also, that the movement of the corn crop, although it was belated, will make large improvements when it develops. Beyond ile the year-end demands to be considered, and the influence of the result of funds after the system of banks of this city for the five days of the previous bank week. The loss of task the surplus against general though it was belated, will make large improvements when it develops. Beyond ile the year-end demands to be considered, and the influence of the result of funds after the provious bank week. The loss of the five days of the previous bank week. The loss of the five days of the previous bank week is at the construction of the country show an increase of the previous bank week. The loss of the five price in December was reached at \$1.08\frac{1}{2}\$ and on May at \$1.08\frac{1}{2}\$ for the day. The loss of the banks of the banks makes a total single demand throughout the entire day. Predictions of allbears in the visible supplies and throughout the entire day. Predictions of all bears in the visible supplies and throughout the entire day. Predictions of all bears in the supplies and throughout the supplies and throughout the supplies at the day. The blook of the banks of t

DEMAND AT SAN FRANCISCO FOR ALL SIZES IS IMPROVING.

Export Business Is Active and Market is Getting in Better Shape -Potatoes Are Steady.

-Raising are cleaning out so well and stocks of most other California cured fruits are so early turning to prunee. Stocks of prunes in the hands of Santa Clara co-operative organi-zations are not large and growers generally are carrying much less than last year at this time. The demand for all elses is increasing, export business is active and the market is firm at an advance and likely to go higher. Dried peaches are in more demand and firmer with stocks of leas than 90 cars left unsold Fresh fruits were quiet. Five more carload of oranges arrived, keeping the market weak Only a few hundred boxes, mostly seedlings were shipped by the regular steamer to Sound ports, as the northern markets are said to be well supplied with Japanese mandaring. celpts of lemons are increasing. Apples are

GOOD WEATHER IN ARGENTINA. Depresses Chicago Wheat Market at the

and Loss of Cash.

NEW YORK, Nov. 26.—The Financier says:
The official statement of the New York asacciated hanks showed, as the most striking
changes compared with the previous week, an
important decrease in loans, though somewhat
smaller than was expected, a loss of cash
closely corresponding with that which was indicated by the estimates that were based
upon the known movements of money, a decrease in deposits by an amount very nearly
agreeing with the sum of the reduction in loans
and the loss of cash, and a decrease in surplus reserve to a total more than \$1,000,000 below the amount of the beginning of the year.
The loan contraction was \$10,280,800, making
\$30,765,700 since October 29, in which period
there has been a buoyant speculation in the
stock market, calling logically for expansion
rather than contraction. It is quite likely,
however, that the trust companies are carrying a larger volume of loans. The loss of cash
was \$5,124,600 net, \$1,062,500 less than the
estimates, but the discrepancy was doubtless
for the restern of bank averages and about the partern of the pa Opening, CHICAGO, Nov. 28.—Private advices from Argentina, claiming that prospects were good for excellent barvest weather, had a depressing influence on the wheat market at the opening. Another hearish factor was increased shipments from Australia. Opening quotations on December were off 160% at \$1.00% \$1.00%. May was unchanged to he lower at \$1.10% \$1.10%. From the start pit traders were inclined to favor the ceiling side and with the exception of fair covering by shorts on the slight initial decline, offerings met with only small demand throughout the entire day. Predictions of a liberal increase in the visible supply caused bearishness late in the day. The opening. Another bearish factor was increased

STRIKERS FIRE FROM AMBUSH

Employes of Leiter Are Attacked and State Troops Are Sent to Ziegler.

BENTON, Ill., Nov. 26.—State troops have been sent to the Zeigler mines, at the call of Sheriff Stein. This action is due to an attack on H. R. Platt, of Chicago, general attorney for the estate of L. Z. Leiter and William Browning, of Zeigler, farm oversæer for the Zeigler Coal Company, who were fired upon from ambush while returning to Zeigler form West Frankfort, where they had been to accompany Joseph Leiter, who boarded a train there for Chicago. Both Platt and Browning returned the fire, exchanging 39 shots, when the attacking party made its escape in some deep woods. One of the party la reported wounded.

Said He Was Robbed.

Calvin Latham last night reported to Policeman Endicott that he had been held up by an unknown man at Front and Ash street. Full investigation of the man's story failed to bring to light any facts, and as he was very drunk it was thought he imagined it all. He is a deckhand on the steamer Hassalo. He was advised to quit drinking North End boose and avoid the delirium tremens.

MARCONI WIRELESS TELEGRAPH STOCK

The Marconi system of wireless telegraphy has had a phenomenal growth. Few, even among the best-posted men of the day realize this fact. The Marconi system is now in daily commercial use all over the world, and its facilities for service are being extended as rapidly as is physically possible. It has been OFFICIALLY adopted by the leading governments of the world. It has been OFFICIALLY adopted by the great trans-Atlantic steamship companies.

companies.
It has been OFFICIALLY adopted by Lloyds.
It has been OFFICIALLY adopted by McAtes complained bitterly because, they stated, the special officer entered and searched their house without a warrant. McAtes said he found one ball in the coat pockets of each of the prisoners. They explained to Captain Moore

Lloyds.

It has been OFFICIALLY adopted by by the Associated Press.

It has been OFFICIALLY employed by Reuter's News Agency, by the London Times and the New York Herald.

It is OFFICIALLY co-operating with the Western Union and Postal Telegraph Companies.

The British government has contracted to use the Marconi system for all vessels of the navy for 14 years, and is using it in connection with its life-saving service and in the army.

The City of London has OFFICIALLY adopted it for fire-alarm service.

The British government has stations in China, in Formosa, at Malta, at Gibraliar, at Suez and Bermuda.

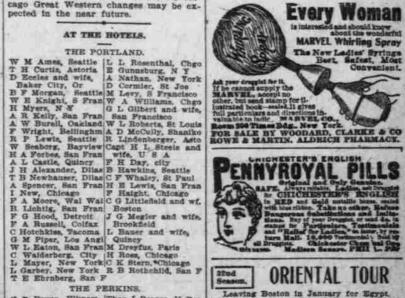

The securities of this company are considered a better investment than those of the Bell Telephone stock, or any of the great radical inventions of the present age, and are bound to increase in value month after month, On January first the wireless system across the ocean opens up. Now is the time to secure an investment in this stock on either a cash basis or on our easy payment plan. Correspond with us at once for fullest information and lowest market price of these securities. that they did not intend to steal them, but expected to return them the first thing this morning. They had to spend the night in Jall. Republican from Buena Vista, Colo., says that an attempt was made tonight to hold up Rio Granda passenger train No. 5 at a siding called Gordon, 25 miles west of here. Three men signalled the engineer to stop, but he suspected their intention and put on all steam. As the engine passed the mea, one of them fired twice.
