School Superintendent Files Sarcastic Report.

NOT ASHAMED OF ELECTION

Washington's Enrollment of Pupils Is Less by 12,000 Than in 1903, but Daily Attendance Is Higher This Year.

OLYMPIA, Wash., Dec. 24.-(Special.) The 17th biennial report of the State Superintedent of Public Instruction was received from the printers today. It covers 226 pages, and in addition to the infor-mation required by law to be conveyed to the Governor and the Legislature, it furnishes practically all information that any one interested in the schools of the

tate would desire to know. Besides a large number of statistical tables showing the attendance of pupils, numbers of teachers employed, wages paid, wealth of schools, etc., a chapter s devoted to each of the educational institutions of the state.

The report shows that there were 1#.753

children enrolled in the public schools of the state for the year 1994, as against 161,651 enrolled in 1903. The average daily attendance in 1904 was 110,774, and 101,068 n the preceding year.

For the year just closed there were 4775 trachers employed in the state, 1121 males and 3644 females, receiving an average salary for the men of \$60.24, and for the women \$46.70. There were 27,202 children of school age that did not attend school during the year at all, in spite of the compulsory law, and 7061 between the ages of 8 and 16 that attended less than three

The total receipts for school purposes in this state from state, county and special taxes, from the sule of bonds and other sources reached \$5.619.215.58. The total disbursements for educational purposes throughout the state were \$4,470,586.16; legying a cash balance of \$1,470,586.16; of the amount paid out during the year, the sum of \$2.26,62.6 was for salaries of

Of the effort made during the past Summer to take the State and County Superintendent's office out of politics, State Superintendent Bryan makes some caustle comments. On this subject of eliminating, Mr. Bryan says in part:

"Dirty Political Methods."

"The people of this great, happy and prosperous country are always unhappy, ome about one thing, some about another. The different groups or classes are not always unhappy about the same thing, but they are unhappy about one thing today and about another thing to-morrow. Their moods change from time to time, but each class must be unhappy most of the time about something. They are most miserable when they can find nothing to be unhappy about.
"As an instance of this kind, the idea

bored itself into the brains of a few leadeducational people of this state that whole school system is being damned by the fact that the State Superintend-ent and all County Superintendents are elected in just the same manner that all other state and county officers are elect-ed. It had not occurred to me before this excitement sprang up, but I am now astonished to think that I have not felt mertified and chagrined to think that 1 was elected by practically the same pro-cess that William McKinley was elected and by exactly the same process by which my colleagues in the Capitol building were

"I am happy to think that I now have a good and sufficient reason for be-ing unhappy during the remainder of my life, and it should be a sufficient and jus cause to make all County Superintend-ents in this state wretched, to reflect upon the fact that they, too, were as were their associate county officers And be it said to the everiasting discredit of that little clique, which made such herculean efforts to take these offices out of politics in the recent campaign that dirtier, more false and debasing po litical methods were never resorted to by the lowest ward politician than were resorted to by them.

Mr. Bryan then discussed the subject the benefit of the Legislature. The re-port will be ready for public distribution ring the coming week.

SEVEN SALOONS SHUT OUT. So Brewer Wants Result of Prohibi tion Vote Annulled.

ROSEBURG, Or., Dec. 24 .- (Special.) -An action has been commenced by Max Welss, the Roseburg brewer and ice manufacturer, against the County Court of Douglas County, for a writ of review of the proceedings in connection with the court's order declaring prohibition of the liquor traffic after January I, 1905, in those precincts of Douglas County wherein a majority of votes were cast in favor of prohibition at the November election.

The allegations set forth are that he petition for the submission of the prohibition question to the voters did not bear the signatures of the requisite per cent of the registered voters at preceding election; that the peti Itself was not fully signed according to law, and that the signatures were not compared with those on the registration books; that the notices of election were illegal in that they did not bear the seal of the County Court or the name of the County Clerk in his own handwriting, the latter having been printed instead; and finally, that the ballots specified a vote on prohibition for the "entire county of Douglas," while the precinct is made the basis of the County Clerk's order.

The action taken is primarily against ne operation of the order in Deer Creek Precinct, in which seven saloon The remainder of the saloons in Roseburg are in precincts which voted "wet." By the case will be argued before Judge Hamilton December 26.

Quite recently two London golfers nade a wager, according to which one of them had to tee his ball in the middle of Ludgate Circus and "hole out" in the fountain waters in Trafaigar Square in not more than 35 strokes from start to finish, while if the ball anywhere on the journey became unplayable through any street obstruc tion, it could only be picked out and teed again under the heavy penalty of five strokes. It was agreed that this curious match should be played very early in the morning, before the traf-

A very similar feat was both at-tempted and accomplished at Pittsburg, U. S. A., in 1890, several members of the Allegheny Golf Club wa-gering \$4000, or £300, that a golf ball could be driven over 4½ miles of the city streets in 150 strokes. At 5 o'clock in the morning the player who essayed the task, Mr. William Patten, began this curious game, in the presence a party of friends to the number of 25 He succeeded in driving the ball the required distance in 119 strokes, thu having a lot to spare but in performing the feat he did £100 worth of damage in breaking shop windows and street

The man with the champagne bottle won the match, which did not say much for the skill of his opponent. Some golfers are very proud of the cleanness of their drives from the tee. Many years ago a professional golfer engaged at the links on the North Inch, Perth, set an example which has since been often followed, though with varying success. He teed his ball on the face of a valuable gold watch, and then drove it with all his might. The ball was sent flying a good length, and the was sent flying a good length, and the giass of the watch was unbroken. At by the minor colleges of Oregon. Today's meeting was attended by O. M. was sent flying a good length, and the giass of the watch was unbroken. At Westbrook, U. S. A., three years ago, a player named Knapp wagered that he could drive a ball off the top of a hen's egg without cracking the shell, the egg being slightly dented at one end to begin with to enable the ball to rest upon it. He won his wager.

Some wonderful feats at golf have to rest upon it. He won his wager.

Some wonderful feats at golf have naturally been performed in Edinburgh, where nearly everybody is a golfer. Two players belonging to this city once played a match over an extemporized course, which began at the Bruntsfield links and ended at the top-of Arthur's Seat, which is about \$39 feet above the sea level. A few years praviously another Edinburgh golfer for a wager sent a number of balls.

BLOOD CELLS.

Man is a millionaire many times over in the possession of blood cells. Woman is not quite so rich, for scientists have proven that the normal number of red blood cells in adult men is five million; in women four and a half million, to the square millimeter, The normal cell is not be obtained. The normal cell is not absolutely round The normal cell is not absolutely round in health, but, in disease, becomes extremely irregular in shape. Every one can be in perfect health and possess the millions of rich red blood corpuscles if they only know how to go about it. Dr. R. V. Pierce, consulting physician to the Invalids' Hotel and Surgical Institute, at Buffalo, N. V., advises every man and woman to prepare for a long life by observing nature's laws. In the first place, if your ture's laws. In the first place, if your digestion is faulty, and the food you eat is not taken up by the blood and assimilated with the control of the cont ilated properly, you need a tonic and digestive corrector, something that will increase the red blood corpuscies; he believes in going about this in nature's own way. Years ago, in his active practice, he found that an alterative extract of certain herbs and roots, put up without the use of alcohol, would put the liver, lungs and heart into fuller and more complete action. This medicine he called Dr. Pierce's Golden Medical Discovery. By assimilating the food eaten, it nourishes the blood, and, instead of the ill-shaped corpuscies, the person's blood takes on a rich red color and the corpuscies are more nearly round. lated properly, you need a tonic and digesthe corpuscles are more nearly round rves for food, and when the nerves are

fed on rich red blood the person loses those irritable feelings, sleeps well at night and feels refreshed in the morning.
