Mr. Knelsel and his associates have rarely played with so great a fervor and warmth, so exquisite a beauty of tone, so perfect a finish of detail, and so complete a union of all their powers in a homogeneous and halanced whole as they did last night; nor have they often exhibited the high, intangible qualities that go to make up what is called style—that which gives the supreme distinction to their playing. They were displayed at their fullest in the quartet by Besthoven, which is one of the least often heard of that early series, though surely it Besthoven, which is one of the least often heard of that early series, though surely it is not lacking in the freshness and spontaneity, the originality struggling for utterance, through the procepts of an earlier time that mark its fellows. SAILORS SIDE WITH OUTLAWS.

Serious Effect Expected on All Constwise Shipping.

SEATTLE, April 22.-By their action today in siding with the outlaw Long-shoremen's organization of this city as against the striking members of the accredited local, No. 552, the Sallors' Union has taken the first step in what it is believed will prove a prolonged fight between the two organizations.

For some years the international organizations of the sailors and long-

shoremen have been at loggerheads over a question of jurisdiction and the pres-ent trouble is the outcome of the dispute. Today representatives of the sallors' local went to President Humphrey, of the Washington Stevedoring Company, and informed him that they would refuse to sail on any coastwise vessels loaded by others than members of local 163, the discredited longshoremen's organization.
It is feared that this new move will have a serious effect on coastwise ship-

Coach Murphy is still holding the boys down to the acquirement of form, but has been dev. ing more attention to the finish this last week.

A smooth, continuous stroke that will enable the men to get in every pound of their weight is what Murphy insists on, and the boys are watched against over-reaching, with an insistence on a slow and easy slide that takes the weight off the seat. The stroke, as taught by Murphy, differs in many points from that used in past years by the club, but its superiority is being demonstrated even now. Lamberson, Patton, Gloss and Schmid are going out daily in the single scuils, and are rapidly getting into form, Lam-berson and Schmid are also working in the doubles. Monks is showing up well for a new man, and will probably work

in the double events. Within the next week the older men. that is in experience, will be asked to come out, and then the preparation for the crews will begin. From that time on it will be a matter of competition, and the men showing up in the best form will be chosen for the seats
