## Russians Talk Big of What Rojestvensky Will Do When He Meets Togo.

Japanese Cannot Prevent Fleet From Reaching Vladivostok--Oyama Advances.

ST. PETERSBURG, May 6 .- (11:4 P. M.)-Admiral Nebogatoff's junction with Vice-Admiral Rojestvensky is now conlered by the Admiralty as practically assured and hope for a successful issue in the approaching struggle for mastery of the sea is greatly encouraged. Nebo-gatoff is regarded as the Blucher of the situation and, indeed, he is said to remble him greatly in temperament. He may lack his strategy and finesse, but, like the Prussian, he has bulldog courage and is a born fighter who goes straight

#### May Drive Togo From Sea.

Vice-Admiral Kamimura, like suchy at Waterloo, fails to prevent a iction of the Russian fleets, as the Admiralty here believes he has, the impression is strong that Vice-Admiral Togo will not dare risk an open battle against the united divisions of Rojestvensky and Nebogatoff, but will protect himself by torpedo attacks and possibly a long-range action, being prepared to draw off in the event that he is unable to make an impression.

Naval officers are prepared to see Rostvensky lose half his convoy, but in face of the united divisions it is believed that Togo will accomplish little or nothing in the way of opposition to the admake Viadivostok another Port Arthur. If the fleet reaches Vladivostok intact, day, however, naval officers here claim that victory is won. Although there is little ere than 100,000 tons of coal at Vladivostok, with the reinforcement of the fleet by the Gromobol, Rossia and Bogatyr and the torpedo-boats now in the harbor there, they claim that Rojestvensky could drive Togo off the sea and leave Oyama's army stranded in Man-

SPECIAL CABLE. SHANGHAL, May 6 .- Although there Russian fleets, it is reported here that a junction was effected late Friday night by the Russian Baltic fleet and the adron under Admiral Nebogatoff, and that the combined fleets can soon be found off the coasts of Luzon. That the Japanese know where the Russians are is certain, as the latter have not tried to screen their movements before, and, if it is true that Rojestvensky now has his combined fleet, he can be expected to strike the Japanese, in the hope that he will win a victory that will restore Russian prestige on the seas.

The Japanese fleet at last accounts was still off Formosa, while the Russian French Cochin-China. All of the Russian ships have been coaled and could, if necessary, make an extended detour out into the Pacific, where the objective would be Viadivostok. It is likely, however, that Rojestvensky will try to keep in the open and invite attack at the the Japanese, as his fleet is much the stronger and should give a good account of itself.

A number of British and American correspondents are reported to have chartered a ship and to be following the route that the Russians take. If it is so, then, in the event of a naval battle, the outcome should not be long in doubt.

Roosevelt Arrives at Glenwood Springs in Rugged Health and High Spirits.

### HAS KILLED FOUR BEARS

Entire Party Has Ten Bears and Four Bobcats to Its Credit. Storms of Last Week Prevented Hunting.

GLENWOOD SPRINGS, Colo., May 6.-Rising at 639 A. M., in a wild mountain camp 16 miles from Newcastle, President Roosevelt today rode in the saddle 30 miles to this city. He arrived at 3:10 P. M., visited the hot vapor baths, and participated in a local programme and made an address to the villagers at 5:30, had dinner with a few friends in a private dining-room, worked with Secretary Loeb on important matters of state, and retired at an early hour. This is what the President has done today after bringing his hunt to a close. He will pass a quiet day at the Hotel Colorado on Sunday, and will start for Washington at 5 o'clock on Monday morning, making stops at Denver and Chi-

The 30-mile horseback ride from the camp on West Divide Creek to Glenwood was made by the Preeldent, Dr. Lambert, P. B. Stewart, of Colorado Springs, and Elmer Chapman, the President's courier About two hours later the pack train arrived. This consisted of about 20 horses, 30 dogs and the camping outfit. The train was in charge of the guides, John Goff and Jake Borah.

#### He Arrives Mud-Bespattered.

The ride was uneventful. The roads were muddy and the members of the party were badly spattered. Several stops were made that the President might shake hands with the families of ranchers living along the route, and as the party neared Glenwood Springs Mr. Roesevelt and his friends good-naturedly posed for number of pictures.

Nearly the entire population of the Springs turned out to greet the President. As soon as he got off his horse the firing of a President's salute of 21 guns was started. He passed into the hotel at once and the people melted away, as it was given out that all would have an opportunity to see and hear him tonight.

The pack train was the cause of a serious accident about a mile from the hotel. Dr. R. K. McAllister, of New York, who has been living at the Springs for benefit of his health, was driving a fractious horse, which became unmanageable when it saw the train and doge. The doc tor's vehicle was overturned and he suffered a compound fracture of the left leg above the knee. Word was sent to the hotel and Dr. Lambert responded. He treated the injured man and ordered him brought to the hotel, where a local physician took charge of the case.

# Looks and Feels Well.

No other occasion has arisen during the unt for Dr. Lambert to use his surgical instruments or his medicine. They have not been unpacked during the entire stay ST. PETERSBURG, May 7.—(1:25 A. of the party in the mountains. The Pres-M.)—Private advices received here from ident and all of his party have enjoyed rest he needed, and says he never felt better in his life, and he is looking as well as he says he feels. He wears a thick coat of brown which is not particular

ularly becoming, but shows ruggedness. The hunt has been remarkably success ful, considering the fact that the party had less than one week of good weather. The rest of the time that they were in the mountains the hunters were huddled around campfires, trying to get away from the severe storms that made life in the wilds anything but pleasant. From Monday until Friday night of this week rain or snow, and sometimes both, fell continuously in the West Divide Creek country. The moisture froze on the trails and made them impassable most of the time. Regardless of conditions, the hunters went out vesterday and several bobcats were trailed. All of them got away except one that refused to tree, and it was killed by the dogs. Not a shot was fired by the hunters this week. As late as 11 clock last night the party had hopes of getting on the trail of a grizzly today. It began to rain again at midnight, and the party determined to get up early and ride to Glenwood Springs. It was thought useless to spend the day in the mountain under such weather conditions.

# Spoils of the Chase.

Ten bears and four bobcats were taken by the party during the fortnight's hunt. Of the bears killed, the President got four and Dr. Lambert the others. Most of his were small, and the half dozen were referred to by the President as Lambert's doilie set. The skins secured by the President are large and handsome. Dr. Lambert also got one fine skin, in spite of the amusement the other members of the party derived from the yearlings he killed. All of the pelts are at the shop of Frank Hayes, a local taxidermist. He has the skins cured and they are now ready for the tanner. When this process has been completed, the skine will be mounted as rugs. The mounting will be without felt edging. All of them will be made up with open mouths and open eyes.
