FEAR SUCCESS OF THE REBELS

St. Petersburg Doubts Report of Mutineers' Surrender.

CHICAGO, July 1.—(Special.)—Captain Mikoulin, of Odessa, writes the Daily News correspondent at St. Petersburg as follows: "The Kniaz Potemkin has surrendered, but 50 of the mutineers escaped on an English vessel. The Black Sea fleet sailed this morning, leaving in port the Georgi Pobiedonostoff. The situation is still threatening. Vessels of the volunteer fleet and many warehouses have been burned and foreign ships and warehouses have been damaged to the extent of 20,000,000 roubles (\$25,000,000). It has been well known for a long time that the men of the Black Sea fleet were in a dangerously mutinous condition. The conspiracy has been well organized and the conspirators are supplied with funds. The surrender of Nebogatoff's men in the Far East was anticipated. They were confidently drawn from the Black Sea fleet. Admiral Enquist's plight was also due to the revolt of his crews.

St. Petersburg is suspicious of the fleet's departure from Odessa. It is feared by many officials that the reports of the surrender of the mutineers is inaccurate and that the rebels have seized the other vessels and are intending to bombard the towns along the coast. English vessels are said to be waiting to help the rebels to escape. The censorship suppresses all news from Odessa.

Reservists in State of Mutiny.

Riots are reported from Kursk and Moscow. In some cases the men are said to have burned their officers alive. The reservists in this city are in a state of mutiny. The czar has summoned a war council at Peterhof.

The workers of the Nikolai Admiralty works have joined the revolutionists. Cronstadt is occupied by large bodies of troops on account of the harbor strikes. Cossacks are watching Reval and Liban. The sailors blame Grand Duke Alexis for the naval disasters.

M. Bouligand, the dictator of Russia, said to the Daily News correspondent today: "The troubles at Odessa are merely local. Mobilization is proceeding undisturbed and quiet will soon be restored."

Prince Peter Trubetskoy said: "The mutiny of the sailors was unexpected. It is inexplicable. I saw the czar and his ministers today. They were all surprised and distressed. Technical obstacles prevent the immediate convocation of the zemsky sobor. All sections of the country want peace, but they also desire honorable terms. The letter especially published, purporting to be from General Linievitch and urging the prosecution of the war, is fictitious.

Peace on Honorable Terms.

Kuropatkin writes that the army is in better shape than ever and able to stand between the country and shameful terms. I myself have sounded noble, peasants and merchants. They all desire an honorable peace, otherwise they prefer war to the end.

"For weeks past I have been reviewing military tactics on the way to the Far East. Both officers and men were patriotic and cheerful.

"The Mayors' congress is unable to form a revolutionary government. Its threats were therefore unnecessary. The constitution is coming in any case. The effect of ministerial alterations in the constitution for the new national assembly is to render it more democratic. The fear that a packed council of the empire would kill the project is unfounded. The czar realizes the gravity of the situation.

CALLS FOR HIS NOTE

Von Radolin Talks Two Hours With Premier Rouvier.

CONFERENCE IS FAVORED

Except as to the Details, the Controversy Between France and Germany Is Believed to Be Practically Settled.

PARIS, July 1.—Prince von Radolin, the German Ambassador, called at the Foreign Office this evening by appointment and during a two-hour talk with Premier Rouvier received from the latter the French response to Germany's last note concerning Morocco.

The response takes into consideration the assurances Germany has given relative to French interests in Morocco and modifies some of the objections at first raised against a conference.

The general tenor of the response is favorable to the principle of a conference. Diplomatic circles, therefore, regard the controversy as practically closed, in which nothing now remains to be done except to adjust the details. This, however, may take some time as each side is tenaciously contesting every step.

ENGLAND COVETED MOROCCO

Salisbury Made Proposal to Divide Territory With the Kaiser.

CHICAGO, July 1.—(Special.)—The Daily News prints a story on the Moroccan controversy in the Berlin correspondent, in which he says: "Germany six years ago was opposed and refused an offer to partition Morocco with England, according to a statement made to your correspondent by one of the Kaiser's foremost diplomatic representatives in London. This authority asserts that the late Lord Salisbury was ready to enter into an agreement with England, whereby Germany and England would have possessed themselves of 'spheres of interest,' the Sultan's kingdom practically exclusive of all other powers.

"Germany saw no advantage in the arrangement and professes to be no more anxious today than at that time for territorial aggrandizement in Morocco. While the project was under consideration, German warships secretly investigated the availability of the Moroccan coast for a naval station. It was reported that the conditions were altogether unfavorable.

"It is suggested by the diplomat who gave this statement that British suspicions of the disinterestedness of the German desire in Morocco at the present moment should be allayed by these facts which have not hitherto been published."

Radolin Delays Conference.

BERLIN, July 1.—Prince von Radolin, the German Ambassador at Paris, telegraphed that Premier Rouvier was indisposed yesterday afternoon, and that consequently the conference arranged to take place between them for that afternoon was postponed. The German Foreign Office does not know yet what decision, if any, the French Ministerial Council took yesterday.

There is a feeling that American opinion leans towards France and Great Britain, and against Germany in this question. This causes regret, because from the German standpoint Germany is contending for the free-trade rights of all countries in Morocco. Germany, however, has established her diplomatic position with the Sultan, who feels that if he yields to the French proposal he is lost.

TALK TO FLYING TRAINS

Wireless Message Taken at Fifty Miles an Hour.

Chicago & Alton Will Install the De Forest System, Insuring Quadruple Protection on Its Road.

CHICAGO, July 1.—(Special.)—The Chicago & Alton Railroad has been experimenting with the De Forest telegraph system upon its Alton limited trains, running between Chicago and St. Louis, and the tests have proved absolutely satisfactory.

Wireless messages were received at a distance of over 30 miles from the sending station while trains were running 50 miles an hour.

The Alton has been experimenting with the wireless system for some time, realizing its importance, not only from the commercial standpoint to passengers, but particularly in the matter of safeguarding against accidents. Upon the completion of the wireless system the Alton will have four protective systems, the telegraph train orders, the station block system, the automatic electric block, and the wireless telegraph. The Chicago & Alton was the first railroad on which the wireless system has ever been successfully applied to the operation of a railroad.

GAS WILL NOT KILL

New Company in San Francisco Has Secret.

NO AID IN IT FOR SUICIDE

A Hint War About to Begin Between Rival Concerns Which Promises to Give Bay City Cheap Light.

SAN FRANCISCO, July 1.—(Special.)—There is every probability that the city will see a gas rate war within two weeks as the San Francisco Gas & Electric Company has announced that it will sell gas at the rate of 25 cents for 1000 feet when the San Francisco Gas & Electric Company will begin supplying gas in the districts which are already supplied by the older company.

Leopold Michel, president of the new gas company, says that he is not at all alarmed by the threat and declares that the concern of which he is the head has enough money behind it to see two fights to a finish.

Work has commenced this morning at the new plant at the corner of Beach and Mason streets in the manufacture of gas and coke, and the president of the corporation says that in about 14 days he will be supplying with gas the districts through which the mains run.

A new virtue is claimed for the gas which is to be manufactured by the San Francisco Gas & Electric Company, and that is that no person will be able to commit suicide by means of "asphyxiation." Mr. Michel remarked this morning that the illuminant was to be purified by a new method, of which the company alone possesses the secret.

"We purify the gas just as we get the poison out of it and people cannot kill themselves by letting the fluid flow. It will take us about two weeks to fill our pipes and blow them out so there will be no air in them. We intend to take every precaution and furnish the people in this city with the best gas in the world. We have also ordered 10,000 prepayment meters. These meters are on the nickel-in-the-slot machine order. A person can put in two bits and he will have two bits worth of gas supplied."

BOY PRODIGY'S HAIR CUT

Maurice Warner Did Not Want to Look Like "Sissy."

Mother Drops in Faint When Young Violinist Appears Without Flaxen Locks.

NEW YORK, July 1.—(Special.)—A pair of shears, a wig barber and a boy's desire not to look like a "sissy" are responsible for the transformation of little Maurice Warner, the boy violinist, for whose musical education the women of the Eclectic Club raised a fund of \$50,000, from a dreamy-looking prodigy with long, flaxen locks to a plain, ordie boy. The loss in the lad's marketable value has driven his friends to despair, caused the cancellation of contracts worth \$2000, and nearly broken Maurice's mother's heart.

Incidentally the barber faces a lawsuit. The boy's mother feels sure of getting damages, and says that personally she would not have taken \$20,000 for Maurice's locks. The boy's mother, who has been under a doctor's care suffering from nervous prostration.

CREDITORS ARE WAITING

Knight, Donnelly & Co. Uttering Denunciations.

HOW TO FIND OUT

Fill a bottle or common glass with your water and let it stand 24 hours; a sediment or settling indicates an unhealthy condition of the kidneys; if it stains the linen it is evidence of kidney trouble; too frequent desire to pass it, or pain in the back is also convincing proof that the kidneys and bladder are out of order.

WHAT TO DO.

There is comfort in the knowledge so often expressed that Dr. Kilmer's Swamp-Root, the great kidney remedy, fulfills every wise man's desire to get rid of the pain in the back, kidneys, liver, bladder and every part of the urinary passage. The mild and extraordinary effect of Swamp-Root is soon realized. It stands the highest for its wonderful cures of the most distressing cases. If you need a medicine you should have the best. Pennsylvania Insurance Commissionership Goes to Martin.

HARRISBURG, Pa., July 1.—Israel W. Durham, of Philadelphia, has resigned as State Commissioner of Insurance, and ex-Senator David Martin, whom Durham succeeded several years ago as the recognized Republican leader of Philadelphia, takes his place.

Simultaneously with the announcement of Martin's appointment, the Governor announced the appointment of Captain John C. Groome, of Rosemont, to be Superintendent of the State Constabulary, created by the last Legislature. Captain Groome is commander of the famous First Philadelphia City Troop. The Governor, in replying to Durham's letter of resignation, said in part:
