

BREAK IN MELONS

Cars Come In So Fast They Cannot Be Unloaded.

MARKET BADLY SWAMPED

Other Fruit Generally in Good Supply and Moving Well—Strong Demand for Potatoes and Eggs—Potatoes Easier.

Portland had enough watermelons yesterday to supply all comers, and with plenty to spare. The fruit proved in so fast that it was difficult to keep track of receipts. At the close of the day there were seven carloads standing on the tracks at railroad yards that had not been opened, and which will be put on the market tomorrow. As there will be several cars on each of the two trains today and fresh supplies will be in tomorrow, it is not likely that Monday's market will be in a very healthy condition. Two cars that arrived yesterday, and three of Friday's receipts were unloaded, but that was all the street could stand, notwithstanding a good demand. Prices were hard to get. While the price was the nominal value, some dealers governed their rates by actual conditions, and took whatever was offered. Others that bought their fruit at prices lately ruling were not disposed to do any cutting.

A few crates of cantaloupes came up by express yesterday, and some were brought over from Seattle to tide the market over. A carload is due from Coquille Monday or Tuesday. The scarcity is due to the hot winds in the southern states, which caused the melons on the vine, and shippers were forced to wait until more had matured before they could fill orders. Cantaloupes sold yesterday at \$3.00 per crate, and Peaches at \$2.50 per crate.

A car of delicious fruit, peaches, plums and grapes arrived, also a car of yellow peaches. Another car of Crawford's late Monday. They sold yesterday around \$6. There was a large shipment of Washington peaches that brought \$1.75 per bushel. Raspberries came in heavily from Sumner and were sold at \$1.25 per bushel, as no one wanted to carry them over Sunday. A mixed car of oranges and lemons arrived in the morning and a car of Valencia lemons in the afternoon. Lemons are again down to \$5 a box.

SOUTHERN RICE CROP SHORT.

Reduction in Output Estimated at 25 Per Cent.

The Houston Rice Industry says: "From the reduced acreage and from a careful study of the reports and conditions affecting the crop, since the present crop was planted, the rice industry in that state is estimated to be reduced in output by 25 per cent. The rice crop of Texas and Louisiana, taking both states together will show, when harvested, a net reduction of 25 per cent in production, compared with last year's crop, under favorable conditions from now on. This, according to last year's yield (Government figures) of 5,774,000 bushels of rough rice, will make the crop of 1905 approximately a four-million bag crop. The rice crop is now entirely planted, and all of it is growing as well as could be expected under the favorable conditions of abundance of water and hot sun. At least 90 per cent of the crop was planted in the month of June, when the bulk of the seedlings should have been made in the months of April and May. This will make the crop full six weeks late over normal seasons. The protracted drought which followed the heavy spring rains and tended to make the whole planting season as unfavorable as possible, was broken about the middle of June with flooding rains extending along the coast from New Orleans to Victoria, Tex. There was some apprehension lest the clouds in localities had greatly damaged the young rice not then ready for water, but late arrivals indicate no serious losses from that source."

STRONG DEMAND FOR CHICKENS.

Eggs Have an Upward Tendency—No Change in Butter.

A great many crops of poultry were received yesterday, but dealers found no difficulty in working them off. "Everything except eggs was in strong demand. The ordinary run of old hens brought 12c, with an occasional sale of a fancy hen for better. Choice Springs sold around the 16c mark.

Eggs were firm and active. More dealers put out the 22c price, but others only asked 21c, and some split the difference. The open quotation on Eastern eggs was 21c, with reports of shading. The season for Eastern eggs is drawing to a close, and probably not many more will be brought in unless they can be bought cheaper. Everywhere there is an advancing market for Oregon stock.

Potato Market Weaker.

The potato market was weaker all around yesterday. New Oregon generally were quoted at 75¢ per sack, though some dealers reported sales at \$1. New California potatoes were quoted at \$5.00 per sack. A few sacks of old potatoes, both Oregon and Eastern, are still in the market, but there is absolutely no demand for them.

Tomatoes were easier at \$1.50 per bushel for the California variety, as the supply was excessive. Other vegetables were unchanged.

bank during May, and a decrease of 10,000 bushels during June, 1904.

Bank clearings of the Northwestern cities yesterday were as follows:

City	Clearings	Balance
Portland	\$1,000,000	\$1,000,000
Seattle	\$1,000,000	\$1,000,000
Tacoma	\$1,000,000	\$1,000,000
