CHOLERA STALKS THROUGH GALICIA

Existence of the Plague Determined in Two Different Districts.

CORDONS BEING FORMED

Authorities Fear a Spread of Epidemic Because of Boatmen From Infected Prussian Sections--Drills Stopped.

WEICHEL, Silesia, Sept. 2.—The existence of cholera in two different districts of Galicia is confirmed by medical investigation. The first five fatal cases occurred in the village of Padewnarodowa, in the district of Mielec Tarnowski, and a sixth case in the village of Grodzisko, in the district of Lancutt.

A sick raftman, his wife and two children and a peddling watchmaker were attacked by the disease in Padew, in the Mielec Tarnowski district, and also a raftman in Grodzisko. The local authorities fear a spread of the epidemic, as boatmen in rafts are coming uninterruptedly down the Vistula River from the infected Prussian districts. The first steps taken by the local authorities against the epidemic were evidently insufficient, as after the burning of the belongings of the first victims at Padew the disease developed there, but now the central and local authorities are taking up the work energetically. A high official dispatched to Padew returned to Lemberg today and ordered physicians to go immediately to threatened villages and the formation of a sanitary cordon in Nadzdrze and Chrabrowice, both of which villages are situated close to the side of the Vistula. Every raftman returning from Prussia is subjected to a medical observation of five days.

At present the districts of Nisko and Lancutt are mostly threatened as most of the raftmen of the Vistula belong in these districts.

FEARS NO GENERAL OUTBREAK

Russian Scientist Says German Precautions Are Rigid in Extreme.

PARIS, Sept. 1.—Professor Eli Metchnikoff was seen at the Pasteur Institute today, and gave the Associated Press an interesting impression of his views on the outbreak of cholera in Germany. The professor is an important information that the Pasteur Institute had just received special detailed reports upon the actual cholera cases in Germany, and said he considered the bacteriological examination made under his personal direction that the cases are unquestionably Asiatic cholera.

Notwithstanding this proof, Metchnikoff expressed the hope that the German authorities could cope with the disease and prevent its spread in Europe. Metchnikoff's position as chief of the Pasteur Laboratory during its most famous contributions to science and his works on phagocytosis and immunity, give him a recognized place as one of the foremost authorities of the world upon cholera and other epidemics. "I can assure you," he said, "from the inquiry I have made and from personal familiarity with the cholera cases in Germany, that there is no ground for anxiety relative to a general outbreak of cholera or its spread through Europe. This opinion is based on knowledge of the extreme rigor of the effective measures the German authorities have adopted to prevent its spread. From the measures they have taken I am satisfied they can prevent a further outbreak within its present limits. Therefore, there is no reason to believe that the disease will become epidemic as in 1892. I have received minutely detailed reports upon the cases in Germany, which are really Asiatic cholera, that fact being thoroughly established by bacteriological examination. However, there is no fear concerning a general epidemic, owing to the thoroughness of the precautionary measures adopted."

"Could there be any danger to the United States owing to the steamship lines connecting Europe to America?" the professor was asked. "I do not think so," was the reply. "When everybody in Germany is on the alert to prevent the spread of the disease, and it is my opinion that extraordinary precautions will not be necessary in the United States."

Yves, then made to Dr. Saint Yves, director of the department for the prevention of epidemics, and to Dr. Aubert, director of the bureau of public health. Dr. Saint Yves said: "You may be sure there is not any cholera in or near Paris, and thus far we have had no occasion to adopt any precautionary measures."

Aubert stated that there was not the slightest apprehension of an attack of cholera in Paris.

GERMANY IS WELL PREPARED

All States Warned to Take Precautions Last January.

BERLIN, Sept. 2.—The government has long reckoned on the present situation. A circular dispatch was sent by the Imperial Department of the Interior to the Confederate States in January, calling attention to the possibility of cholera, and requesting them not to be unprepared to deal with an infection. "Resisting the spread of cholera," the official direction says, "has become much easier under the Imperial epidemic law of June 30, 1900, giving the health authorities proper powers. These powers have been fully exercised in sequestering persons that have cholera or have been exposed to it, or who have doubtful symptoms, and in watching over persons and property employed in traffic on the rivers, Weichsel, Brahe and Neize, and on the Bromberg Canal."

DISEASE SPREADS RAPIDLY.

Another Death at Hamburg and High Rates of Mortality.

BERLIN, Sept. 2.—(7:48 P. M.)—The cholera record tonight stands at 51 new cases and 15 deaths, a steady increase and a high percentage of mortality. The most uneasy news for America is that a second case exists at Hamburg. It

was officially reported late today that a laborer in St. George's Hospital, where the Russian emigrant died, has cholera, but it is added that the seizure is of a milder form than the previous one. Two of the other fresh cases are in East Prussia, indicating that the infected area has widened.

The Imperial Health Office, as shown by the statement made today to the Associated Press, is confident that it has the disease in hand. The most recently reported victims are among the Russian river men in quarantine. Germany's two greatest bacteriologists, Professor Robert Koch and E. von Leyden, are out of the country, one in Africa and the other in the Tyrol. Professor Adolph Kafka, also an eminent man, is Professor Koch's successor as head of the Institute of Infectious Diseases, and he has gone to the infected district to direct the measures to confine the disease.

SWEEPING OVER GERMANY.

Disease Reaching Across Empire From Eastern Borders.

BERLIN, Sept. 2.—The deadly plague of Asiatic cholera is sweeping over Germany from the country's eastern borders. The Reichsgerichter officially announced this morning that 439 cases of cholera and 17 deaths had occurred in the Prussian provinces up to noon today. The health authorities of the government are taking every precaution to check further spread of the epidemic. The Ministry of the Interior has issued a notice assuring the public that there is no reason for anxiety, but it is apparent that there is alarm even in government circles.

The United States Board of Immigration at Bremen has ordered that all steamer passengers for the United States shall be at the point of embarkation six days prior to sailing.

NO CHOLERA IN RUSSIA.

Health Department Again Denies Empire Is Infected.

ST. PETERSBURG, Sept. 2.—The health department gave its assurance today that there is no cholera in the empire, including the Vistula district. The Minsk district has just reported against the course down the Vistula of the raft on which two cases of cholera were discovered there. A special investigation is being conducted in the Warsaw district. The authorities are again tracing the course down the Vistula of the raft on which two cases of cholera were discovered in April last, while descending the river from the Government of Minsk to Culm, West Prussia.

PROOF OF CHOLERA IN RUSSIA

Six Deaths Occurred on Bug River Near Frontier.

ST. PETERSBURG, Sept. 2.—Although it is officially reported that no cases of cholera have occurred in the Vistula district itself or in Russian Poland, yet the Russian Government was notified by telegraph of the presence of cholera in the district of Vladimir Volynsky, in the Volynsky Government, on the Upper Bug River, a tributary of the Vistula, close to the Austrian frontier. Six fatal cases have occurred. Wood rafts descend this region along the Bug and Vistula Rivers.

RUSSIAN EMIGRANTS STOPPED

Hamburg-American Line Refuses Them Passage Abroad.

HAMBURG, Sept. 2.—On account of the appearance of cholera, the police authorities have forbidden the transportation through Hamburg of Russian emigrants until further notice. The Hamburg-American Steamship Company has issued instructions to all its Russian agencies to refuse steamer tickets to Russian emigrants.

Tracing the Infection.

BERLIN, Sept. 2.—The Institute of Infectious Diseases will be occupied tonight examining secretions taken from the digestive tubes of persons who died under circumstances suggesting cholera. From time to time couriers arrive from some port of Germany with portions of bodies done up hermetically. The Ministry of the Interior has issued an order covering all Prussia, requiring physicians, immediately after the death of any suspected patient, to send a messenger with sections of the alimentary canal to the Institute of Infectious Diseases for thorough examination.

Galicia Is Also Infected.

WARSAW, Russian Poland, Sept. 2.—It is reported here from Tarnobrzeg, Galicia, that cholera has appeared in the neighborhood of Tarnobrzeg. Three deaths from the disease were registered in one day.

VIENNA, Sept. 2.—The Abend Post reports that two cases of illness thought to be cholera have been discovered in the commune of Grodzisko, Galicia.

Warsaw on Guard.

WARSAW, Sept. 2.—A session of the special committee to devise measures for fighting cholera, should it make its appearance in Warsaw, will be held next Monday. Proposals to purchase water-boiling apparatus and to supplement the medical services will be considered by the committee.

Military Drills Must Wait.

PORDON, Prussia, Sept. 2.—Prince Albrecht of Prussia, who arranged to visit this part of the country on a tour of military inspection, has given up the plan because of cholera.

Schools Have Been Closed.

LANDESBERG, Prussia, Sept. 2.—The schools here have been closed on account of the cholera.

LESSON FOR RACE SUICIDE

Chicago Family in Rags and Sleeping in Alleys.

CHICAGO, Sept. 2.—"If President Roosevelt could only see the condition of some of the families brought to the attention of the police of the larger cities, he would, I believe, hesitate in his pet championship of large families," said Justice Woods, in the Chicago-Avenue Police Court today.

Before the court stood Frank Frieberg, his wife and four small children, their clothes in rags. For a week, it is said, the family has slept in alleys, obtaining only such food as they could beg or scavenge from garbage boxes. The children were held to the Juvenile Court, and the justice continued the cases against Frieberg and his wife until Wednesday. The couple spoke to English. Frieberg is just out of the hospital, having been confined there suffering from rheumatism.

DID HUNT MARRY FLIPINO WOMAN?

Manager of Igorrotes Accused of Bigamy Committed in Islands.

AMERICAN WIFE ACCUSER

Arrested in New York on Complaint of Woman Who Says She Is True Wife—Was Married at St. Louis.

ST. LOUIS, Mo., Sept. 2.—(Special.)—A special to the Globe-Democrat from New York states that Dr. T. K. Hunt, who managed the Igorrotes at the Louisiana Purchase Exposition, and who was to have exhibited them at the Lewis and Clark Exposition, has been arrested on a charge of bigamy preferred by Mrs. Mary Hunt of New York, who claims she is his lawful wife.

In the complaint Mrs. Hunt alleges she and Dr. Hunt were married before he went to the Philippines and that she has just learned that he married a Philippine girl. Shortly before the close of the Louisiana Purchase Exposition Dr. Hunt married a young Louisville woman, formerly employed in a clerical capacity in the Igorrotes village. At the time of his marriage it was understood that the Louisville girl was the second Mrs. Hunt and that the first had been divorced when visiting friends in Germany.

Trouble With Former Wife.

Colonel John Hopkins, who is interested in Dr. Hunt's Igorrotes, was seen at Forest Park Highlands, where the group of Filipinos is on exhibition. He said he had received a message from Dr. Hunt telling him to ignore the story that he is in trouble. Colonel Hopkins, who recently returned from New York City, says that when there, he heard the same story of an effort being made to secure a financial settlement with Dr. Hunt for some alleged trouble with his former wife, but he knows nothing of the matter personally.

Soon Return to Philippines.

Dr. Hunt is said to be about to return to the Philippine Islands, taking with him the bodies of two Igorrotes who have died in this country, the contract with the insular government requiring "the bodies of dead Filipinos to be returned to their native country." Colonel Hopkins says that Dr. Hunt has closed out all his interest in the various bands of Igorrotes now on exhibition in the United States.

Manager Phillips of the Igorrotes colony at Forest Park Highlands, who was with Dr. Hunt during the World's Fair, recalled Dr. Hunt's marriage to a young woman employed in the concession. He knows nothing of any Filipino Mrs. Hunt, and had never heard the natives connected with the concession mention the doctor's having an Oriental matrimonial experience.

HE ROBBED DEAD LETTERS

POSTAL CLERK CONFESSES THEFT AND IS DISMISSED.

Took Railroad Tickets and Foreign Stamps From Dead Letters—Makes Strange Explanation.

WASHINGTON, Sept. 2.—Charles G. Moore, of Colorado, for ten years a clerk in the Postoffice Department, has confessed to taking railroad tickets from letters in the dead letter office and has been dismissed. Besides taking railroad tickets, Moore also is accused of taking foreign stamps from letters and selling them. He was in charge of the minor branch of the dead letter office and received a salary of \$1400 a year.

Many letters which reach the dead letter office contain railroad tickets. These are kept on file for a certain time and then destroyed. In his confession Moore said that there was no chance of the tickets reaching the persons for whom they were intended; that they had been paid for, and he thought he might as well reap the revenue from them.

The inspectors missed tickets from envelopes marked to contain them and traced the theft to Moore when he was confronted with the evidence, he confessed and when the case was laid before Acting Postmaster-General Hitchcock, Moore was dismissed. It is said at the Postoffice Department that Moore will not be prosecuted.

New Railroad for Nevada.

RENO, Nev., Sept. 2.—Articles of incorporation have been filed at Carson City for a railroad from Goldfield into Bullfrog, a distance of 80 miles. Work will start at once, the aim being to have the line in operation next Spring. It will connect direct with the Southern Pacific, that company completing its line into Goldfield next Monday.

Requisition Out for Glassford.

SPRINGFIELD, Ill., Sept. 2.—Governor Dineen today issued a requisition to the Governor of Oregon, when he returns to Pasco, to arrest Albert Glassford, under arrest in Baker City, Ore., on a charge of murder. It is alleged that on April 26, 1904, Glassford shot and killed his wife, Jennie Glassford.

Three Lives Snuffed by Fire.

LITTLETON, Mass., Sept. 2.—Two women and a little girl were burned to death tonight in a fire which destroyed a house owned by Warren Fletcher, two miles east of Littleton. Four other occupants of the house escaped. The victims were: Mrs. Nancy Nisid, 80 years old; Mrs. James Knox, 50, and a girl 12 years of age.
