We have been appointed agents for the

Great Majestic Range

\$55

This is the best Range in the World. Grand prize at the St. Louis Exposition—Gold Medal. Grand prize at Lewis and Clark Exposition—Two Gold Medals. A full line will be on exhibition in our store Monday. They are guaranteed forever.
Wm. Gadsby & Sons.

This neat China Closet, with mirror top and round glass ends, is 36 inches wide, 68 inches high; sells regularly at \$25.00, during the sale will be sold at **\$17.50**

Sideboard Bargains

6 \$30.00 Sideboards, now	\$22.50
20 \$25.00 Sideboards, solid oak, now	\$18.00
8 \$20.00 Sideboards, in golden ash, now	\$14.00
1 \$110.00 Sideboard reduced to	\$80.00
12 \$37.00 Sideboards reduced to	\$28.00

These Dining Tables are 44 inches in diameter when closed, they extend to 6 feet, are made of genuine oak, are regularly sold by us at \$18.00; tomorrow they go for **\$12.00**

This is a genuine oak box-seat Dining Chair, sells regularly at \$4.00 each. We have too many of one pattern; will close out 20 sets during this week at, each **\$3.00**

Buffet Bargains

4 \$25.00 Golden Oak Buffets, reduced to	\$18.00
7 \$37.50 Buffets, 42-inch, with large mirrors	\$25.00
8 \$75.00 Buffets now reduced to	\$50.00
11 \$42.00 Buffets reduced to	\$29.00
1 \$100.00 Buffet reduced to	\$65.00

Napoleon Beds, in quarter-sawn oak, beautiful creations, \$35.00 to **\$65.00**

Brass and Iron Beds

1 \$60.00 Brass Bed reduced to	\$40.00
1 \$45.00 Brass Bed reduced to	\$35.00
1 \$25.00 Brass Bed reduced to	\$16.00
1 \$38.00 Iron Bed reduced to	\$15.00
25 Iron Beds, ranging in price from \$20.00 to \$25.00, your choice for	\$15.00
17 Iron Beds, ranging from \$11.00 to \$15.00, your choice for	\$9.50
300 Iron Beds, regular \$6.50 kind, at	\$4.50
300 Beds, regular \$5.00 kind, at	\$3.50

Folding Bed, royal oak or mahogany finished, with handsome brace shelves, and French mirror on top, has cable supported springs; price **\$23.50**

25 of these splendid Morris Chairs in solid oak, with removable cushions; usually sold at \$12.50, will be sold at, each **\$9.50**

BARGAINS IN ALL DEPARTMENTS

Heating Stoves
Refrigerators
Baby Go-Carts
Curtains **Portieres**
Carpets

Iron Enamelled Bed, Colonial design, always sold at \$12.00; you can get them this week at just half price **\$5.50**

YOU CAN ALWAYS FIND A BARGAIN AT GADSBY'S

Six Edible Mushrooms Illustrated

Second Article on This Favorite Food, Written by Professor Albert R. Sweetser, State Biologist, University of Oregon.

No. 1 - SHAGGY MANE.
(*COPRINUS COMATUS*)

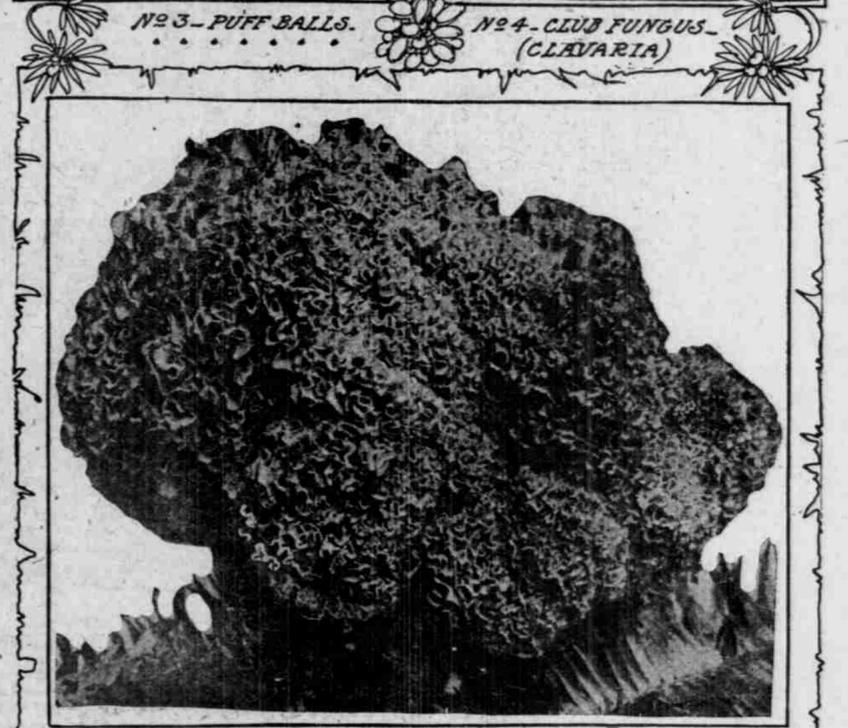

No. 2 - INK CAP.
(*COPRINUS ASTRAMENTARIUS*)

No. 3 - PUFF BALLS.

No. 4 - CLUB FUNGUS.
(*CLAVARIA*)

No. 5 - SPARASSIS CRISPA.

No. 6 - SATYR'S BEARD.
(*HYDNUM ERINACEUS*)

ILLUSTRATION No. 1 is of the Shaggy Mane (*Coprinus comatus*), described in our former notes, but whose characteristics may be briefly summarized again. Cap never fully expanding, as in most toadstools of its sort, covered with silky threads, brown in the center and scattered patches of brown all over. Stem firm and hollow and the last part of the plant to disappear. The gills on the under side of the cap at first white, then darkening and turning black, and eventually the whole cap disappears, dripping away as an inky fluid. Good eating when young.

Cut No. 2 shows a near relative of the Shaggy Mane, the Ink-Cap (*Coprinus astramentarius*). This is smaller and shorter, but, like the former, never fully opens. It is brown all over the cap, sometimes

smooth and sometimes bears more or less abundant scale. Its gills on the under side colorless, but soon darken and likewise disappear as ink. It is very common, occurring on old stumps and roots, and is good eating. In both of these, some old ones can usually be found in the cluster that are in the ink stage. This is characteristic of the genus, and any toadstools having this habit can be safely eaten if gathered before the gills have turned.

The Puff-Balls were also referred to in the previous article, and Cut No. 3 shows two common forms. That on the left is the small one so common in the fields and pastures; the one on the right, while not so common, yet when found occurs in considerable numbers. It is dark brown and broken into irregular patches by the light lines. All the puff-balls are excellent

eating if gathered while still white within. Those having the tough outer coat, similar to that of the right-hand variety, should be peeled.

The Club fungi, *Clavaria* and its kind are readily distinguishable from all other forms. The white kind is excellent for food, if gathered when young and free from grubs. A good method of preparation is to boil in salted water, as one would cook asparagus.

As a rule they prefer the shade. They occur in a variety of shapes and colors, one of the most common kinds being reproduced in illustration No. 4.

Another less common but very attractive representative of the Club fungi is the subject of our fifth reproduction. The specimen from which this photograph was made was collected at Fall Creek. It had the following dimensions: Horizontal circumference, 8 inches; vertical circumference, 20 inches; height, 8 inches; weight, 8 pounds 2 ounces. This would furnish a meal for a large family.

The "Satyr's Beard" (*Hydnum erinaceus*) shown in illustration No. 6 may be found growing on trees and stumps, usually hiding from the strong light.

It consists of long, slender, pendant white teeth so closely massed together as to give the appearance of a beard. It has several relatives which so closely resemble it as to be mistaken for one another, except when examined closely. They are all very good eating. In the notes thus far there has been an attempt to describe a few of the striking forms that might readily be distinguished. At some future time the deadly toadstool and its relatives will be described.

ALBERT R. SWEETSER,
State Biologist,
University of Oregon, Eugene.

Just a Peaceful Suggestion.

Albany Democrat.

The Oregonian should give another picture. The first saw those attending the love-feast leaving their knives and revolvers in a basket outside of the love-feast hall. The next should show them taking their knives and revolvers from the basket as they passed out of the hall.
