Platt Announces Olcott as Candidate for County Chairman to Succced Halpin - Higgins Holds the Balance.

NEW YORK, Nov. 18:-(Special)-Proclaiming that President Roosevelt is in complete sympathy with him, Senator Platt began his effort today to dethrone State Chairman Odell and County Chairman Halpin with the announcement that Congressman J. Van Vechten Olcott is his candidate for chairman of the New York Republican County Committee, Odell retaliated by issuing summonses to all the New York County district leaders to confer with him at the Fifth-Avenue Hotel next Monday and co-operate with him in blocking the attempt to depose Halpin, Senator Platt withdrew his declaration against the renomination of Governor

Higgins, in the hope that the latter would turn his vast patronage against Odell. Odell, on the other hand, counts on aid from Higgins, whose nomination he made possible a year ago, and appears sanguine of dealing his venerable rival a final blow before the new year dawns. The first real test of the respective pow

ers of the aspirants for leadership will be at the New York County Convention, the last week in December, at which there is to be "organization," as Odell main-tains; "reorganization," as Platt insists, and "reconstruction," as William M. Ivins declares it, for the state campaign of 1906. With the "sympathy" of the President. Platt boasts that he will replace Halpin with Olcott. Odell and his allies sooff at this and prophesy that they will win by nearly two to one.

Almost every Platt district leader is a Federal officeholder, while nearly every Odell man has a state job. Thus the final attitude of Higgins, who controls state patronage, probably will settle the con test.

The Chief of Ordnance has adopted the practice of "targeting" every rifle before assue to the troops, the purpose being to make certain that the sights of each are practically placed. It has been ascer-tained by extended tests that the music velocity may be 100 feet per second less than originally contemplated with the gratifying result that twice the number of shots may be fired out before the bar-rel is sufficiently worn to noticeably affect accuracy for target practice, and this gain without loss of efficiency as a mili-

"This is a political strike," said the im-perturbable Witte to the Polish delegates "and I cannot reckon with it as I do with a strike for industrial betterment. The stopping of the posts and telegraphs, it is pointed out, would endanger the life of the state, and every employe joining the organization referred to will instantly be dismissed. The employes of the government railroads also are threatened with dismissal if they join the strike.

Opinion of French Authority on Upheaval in Russia.

PARIS, Nov. 18.-Anatole Leroy-Beauieu, a member of the French Academy, and an eminent authority on Russia, has addressed a notable letter to the Journal des Debats upon the Russian revolution. He said, in partz

"The events transpiring in the Russian Empire are nothing less than a great revolution, which promises to be as long and tragic as the French Revolution, although it is yet to be hoped that the Russian revolution may not bring about the fall of the throne and dynasty. The revolution will be social and political, whether it assumes a torrential character, sweeping over all boundaries, or whether it is guided in regular channels through the foresight of Count Witte.

"As in the case of the French Revolu-tion, there will be in Russia a transfer of power and property to new hands. In the eyes of most Russians, it is the bu-reaueratic autocracy which must end. It was never the army nor the fleet which was defeated by the Japanese, but the free vanouibed was the subconset. The vanquished was the autocracy. The re-cent savage violence and slaughter of Jews, with perhaps more victims than throughout the reign of terror of the French Revolution, is attributable to the autocratic regime."

Short Cutsin Clothes Making

Hot Flat-Iron Used Instead of the Needla

Did you ever notice what a feeling of Satisfaction there is when you wear a New Coat the first day or two?

It makes a fellow feel that he is Imma-culate, and that everybody knows it. You have wondered why it is that it wouldn't remain in that condition, instead of getting *kumpy*, *wrinkled* and *lwrsled* after the first damp day. Blamed it to the Weather, of course.

Naturally, Everybody does, Why? Because about 80 per cent of all clothing is affected by dampness.

People get used to things. They get in u. "What can't be Cured must be a rut, "What can't Endured", they say,

WASHINGTON, Nov. 15 .- "The Army is unofficered." says Lieutenant-General Adna R. Chaffee, Chief of Staff, in his annual report to the Secretary of War. He says this condition exists for the Army in peace, and in "time of war" it would be in a badly crippled condition. There are 517 officers absent on detailed
