Commissioner Hoff Finds That 3370 Miners Are Employed at Average Wage of \$3 Per Day.

SALEM, Or., Sept. 22.-(Special.)-According to the statistical information furnished Labor Commissioner Hoff, by the United States Geological Survey Bureau, at Washington, D. C., there are 2176 mines of different kinds in the State of Oregon, under development, the greater number of which are gold and copper, while in some portions of the state deposits of some portions of the state deposits of some kinds of mineral are found which do not exist elsewhere in the United States. Notable among these latter are the cobalt mines of Grant County, said to be the only discovery of this valuable mineral to have been found in the coun-

Cobalt is used extensively and is of great value for coloring purposes and in the arts. It is found in combination with copper carrying a large per cent of gold. In his forthcoming blennial report, Ea-bor Commissioner Hoff will comment upon this statistical data as follows:

this statistical data as follows:

"A large number of the mines given in the table are not operated, some having been abandoned, and many are in the first stages of development, on account of the lack of capital to carry on the work. Considerable harm has been done the mining interests of the state by unscrupulous promoters who, by 'wildcatting,' have succeeded in swindling many unsuspecting investors and are responsible for retarding the development of the industry generally.

"The principal mining counties in the order of the number of miners employed are: Baker, Josephine, Jackson, Grant, Lane, Dougins and Coos. Other counties have extensive mining interests, and the industry, already of some magnitude, will continue to grow. At present there are about 2370 miners in the state who draw an average wage of \$3 per day. Estimating that they work, on an average, two-thirds of the time, the amount paid them annually in wages is \$2.022,000."

OREGON CITY, Sept. 22—(Special)— After sending various sums of money, aggregating \$147, with which to defray the expenses of her husband, Christian Christensen, in his trip to this country from Copenhagen, Denmark, Birgette Christensen has concluded that her spouse no longer cares for her, and today instituted divorce proceedings against her unresponsive husband.

In her complaint the wife recites that she was married to the defendant at Co-penhagen in September, 1898, and states that it was mutually agreed between them to emigrate to the United States in 1962. She preceded her husband to the United States and subsequently forwarded the husband money with which to come to America, on his representations that he did not have sufficient funds of his own with which to make the trip. Besides these evidences of desertion on the part of the husband the sufficient funds. of the husband, the wife complains that he is an habitual drunkard and was cruel and inhuman in his treatment of her.

BUTTEVILLE SAFE IS LOOTED

Cracksman Gets \$100 in Change and

Escapes on Stolen Horse. SALEM, Or., Sept. 22—(Special.)—Some time between 4 and 5 o'clock this morning the store of J. J. Ryan, of Butteville, 25 miles north of this city, was entered and a small safe blown. About 100 in nickels and dimes was secured and the robber made his escape without being discovered. The safecracker also stole a small black cayuse from Mr. Ryan's stable and took his departure by this means, as some of the neighbors heard the patter of horse's hoofs going in the

direction of Aurora, the nearet raffroad station, at about 5 o'clock in the morning.
Sheriff Culver was notified as soon as the robbery was discovered this morning and he immediately sent two men to Butteville.

PRUNES DROP FROM TREES

HALF THE CROP NEAR FOREST GROVE WILL BE LOST.

Dryers Are Unable to Handle the Great Quantity That Has Been Forced to Early Maturity.

FOREST GROVE, Or., Sept. 22 .- (Special.)-Postmaster Atwell, who is largely interested in prunegrowing, reports that juring the last three days of hot weather practically the entire crop of prunes in this district has fallen. Such large quan-titles of fruit thus prematurely forced upon the evaporators is proving far beyand their capacity to handle. Nothing like the rapidity of the drop thus early in the season has ever been known in the history of the industry. The loss caused by cracking, due to the recent rains, was very large, but the loss occasioned by the unseasonable drop will be much larger. A heavy percentage of fruit on the ground has fermented under the in fluence of the hot sun. The rain and the hot weather together will cause a loss of probably one-half the crop.

Opinion of Warehouse Receipts Law OLYMPIA, Wash., Sept. 22.-(Special.)-Attorney-General Atkinson has been called on by the Prosecuting Attorney of Whitman County for an opinion interpreting the law relating to warehouse recelpts. Grain buyers allege that the prac-tice of many of the ware-housemen in issuing receipts subject to all claims for bags and twine furnished" makes it im-possible for them in many instances to do business, and they want to find a way to eliminate such conditions from the receipts issued.

The Attorney-General holds that the provision quoted is a legal one under the present statutes, and he holds, moreover, that the farmer is not injured by it, but is in most instances benefited.

Deal Thought to Have Been Made With Western Pacific to Gain Entrance to California.

BOISE Idaho Sept. 22.-(Special.)-It is reported here that J. J. Hill has taken over the railway project known as the San Francisco, Idaho & Montana, organized for the purpose of building a line from San Francisco to Butte. This company recently announced it had made arrangements to build a line from the Snake River to a connection with the Western Pacific near Winnemuces, and it has been making some show of starting work westward from Caldwell.

work westward from Caldwell.

It has always been thought that if there were anything in it, Gould or Hill, or both, were somewhere in the background. When Donald Grant came in and became president of the company this impression was deepened. Now it is said Hill has taken it over. The story goes that he made an offer soon after the first stories respecting Harriman control of the Milwaukee came out. It is further said that Harriman made an offer soon afterward, but Hill's offer had been ac-

espted.

W. E. Foran, one of the promoters, is on his way East, and it is said he has gone to St. Paul or Chicago to close up the matter. The theory is that both Hill and Gould are in the deal, the plan being to give the Western Pacific direct outlet into Montana and points East and to afford Hill a short line into San Francisco.
