Bar Association Will Place Ruef's Attorneys on Rack Before Grand Jury.

CERF KICKS UP A MUSS

Companion of Curly Boss Refuses to Answer Questions-Invites Hency to Fist-Fight in Street-Ruef Kept Under Close Guard.

SAN FRANCISCO, March 9 .- (Spe cial.)—The grand jury may soon be called upon to investigate all the cir-cumstances leading up the decision rendered by Judge Hebbard in which he granted Abe Ruef a writ of error. The charge has been made before the Bar Association of the city that Samuel Shortridge, Henry Ach and C. H. Fairall, attorneys for Ruef, are as culpable as Judge Hebbard. A scandal bigger than any the state bar has yet

higger than any the state bar has yet known is threatened.

The Grand Jury this afternoon began in investigation into the circumstances attending the disappearance of Ruef. Foreman Oliver of the Grand Jury, in galling to the stand Myrtile Cerf. Ruef's companion in hiding, said it was the intention to lay the basis of possible indictments for perjury against Ruef's atterneys, who took the witness stand before Judge Dunne and under outh declared they had no knowledge of the whereabouts of the boss.

whereabouts of the boss.

Cerf classied repeatedly with the jury. At the outset, he attempted to leave the juryroom, and when stopped by Percival Dolman, the doorkeeper, a fight ensued.

Later Cerf classied with Foreman Oliver and invited Assistant District Attorney Hency to the street to settle the matter Hency to the street to settle the matter in a more abrupt way. Foreman Oliver intervened and restored order. Cerf repeatedly refused to tell with whom he and Ruef had communicated from their hiding-place. He was taken before Judge Coffey, who ordered him to answer the questions propounded. Upon returning to the Grand Jury man Cerf refused to the Grand Jury room Cerf refused to answer on the grounds that he night incriminate himself. The matter was pu-over for the present and will be taken up

later.

Abe Ruef was a prisoner today in a room at the St. Fruncis Hotel. He was watched over by William J. Biggey, the special elisor, and four detectives. But a few feet from the spot where he is now held captive, Ruef addressed a large mass meeting six months ago and boasted of his power. The city government was his then from top to bottom.

Although Ruef is held a prisoner, he shown every courtesy. He is allowed to receive his friends and to carry on his histoness, always however under the watchful eye of detectives. He has been ovided with all of the current ten-cent terature. He takes his meals at the Francis grill, and is allowed to exerelse for a few minutes in the afternoon

ecompanied by a guard. Biggey has instructions to take Ruef ourt Monday. An effort is being made to have Heney agree to his release omorrow on bail. Hency was in conference with Biggey for an hour at the St. Francis Hotel tonight. He did not visit Ruef and refused to discuss the purpose of his thin with Biggey.

Ruef is crushed in spirit, but assumes an air of light-heartedness. At infer-vale he scores Judge Dunne and then lokes with his captors.

It is now believed that the purpose of Ruef's flight was to await the passage of a bill which his friends have intro-duced into the State Legislature allowing an accused person by affidavit to charge prejudice against a Judge and thus disallfy him from presiding at his trial. able to not through, was voted down yes-

Pneumonia Weather

Preumonia Weather.

From the New York Herald.

'The wide prevalence of coughs, colds, grip and pneumonia mark an experience of severa and protracted Winter weather the like of which we have not seen for many a year. The stubborn persistence of catarrhal troubles is also a marked feature of the depressing influences which follow a long slege of rapidly changing low and raw temperatures. The man is fortunate indeed who has not been at some time since Christmas confined to his bed with a 'cold' of some sort that he cannot succeed in curing. This condition of affairs has existed for months, and the end is not yet. In fact, it behowes all careful people to be on their quard against all entarreal troubles more than ever.

"March is a typical pneumonia month and gives a high rate of mortality for the disease. One reason for this is that after our long and hard Winters the system loses its natural resistance to cold. Only the hardy ones are likely to withstand the strain, and even these are by no means safe when grip is increasing almost to epidemic manflestation.

"The ordinary 'cold,' the grip and

is increasing almost to epidemic manifestation.

"The ordinary 'cold,' the grip and pneuments belong to the same family of Winter diseases. Although they may be excited by different infectious influences, their ultimate effects are the same when the attacks are sufficiently severe.

fluences, their uitimate effects are the same when the attacks are sufficiently severe.

"An acute catarrh is always the result of undue exposure to low temperatures. The tapid cooling of the surface, when not balanced by proper reaction, produces congestion and inflammation of the masal and bronchial membranes. Obviously such an allment is not communicable, in the ordinary sense, from one individual to another. As the slightest 'cold' predisposes the individual to attacks of the most severe and dangerous catarrhal affections, the necessity for its quick cure need not be enforced."

All these facts emphasize the necessity of extraordinary epicantionary measures against the ordinary cold. Everyone cannot change his climate at will, but many make the most of what he has at home, viz. take Chamberlain's Cough Remedy as soon as the first indication of the cold appears. It not only cures a cold quickly, but counteracts any tendency of the cold to result in pneumonia. This fact has neen fully proven during the epidemic of colds and grip of the past few years. No case of either of these diseases having resulted in pneumonia when this remedy was used has ever been reported to the manufacturers, which shows conclusively that it is not only the best and quickest cure for colds, but a certain preventive of that dangerous disease.
